**Palo Alto Public Safety Building**  
**Design Goals**

The following goals inform the design development of the proposed new Public Safety Building:

- To create a public safety building that is mission responsive and is designed to remain operational in the event of a disaster or earthquake;
- To address the facility program requirements of the police department, emergency communications, and emergency preparedness for the foreseeable future;
- To create a building that is neighborhood and community compatible;
- To implement a sustainable design strategies to achieve LEED Gold status
