City Council Staff Report

(ID # 8101)

Report Type: Consent Calendar

Meeting Date: 6/19/2017

Summary Title: Contract for Purchase of a Ford F-550 Sewer Rodder

Title: Approval of a Purchase Order With National Auto Fleet Group, in the Amount of \$214,782 for the Purchase of a 2017 Ford F-550 XL 4WD With a Knapheide 14' Value Master Platform With Weco Industries Equipment and Approve Budget Amendments in the Wastewater Collection Fund and Vehicle Replacement and Maintenance Fund

From: City Manager

Lead Department: Public Works

Recommendation

Staff recommends that Council:

1. Approve and authorize the City Manager to execute a purchase order with National Auto Fleet Group in the amount of \$214,782 for the purchase of a 2017 Ford F-550 XL 4WD with a Knapheide 14' Value Master Platform with Weco Industries Equipment; and
2. Amend the Fiscal Year 2017 Budget Appropriation Ordinance for
 - a. the Wastewater Collection Fund by:
 - i. Increasing the transfer to the Vehicle Replacement and Maintenance Fund in the amount of \$126,268; and
 - ii. Decreasing the Rate Stabilization Reserve in the amount of \$126,268; and
 - b. the Vehicle Replacement and Maintenance Fund by:
 - i. Increasing the transfer from the Wastewater Collection Fund by \$126,268; and
 - ii. Increasing the Scheduled Vehicle and Equipment Replacement Fiscal Year 2016 project VR-16000 in the amount of \$89,782; and
 - iii. Increasing the fund balance by \$36,486.

Background

The Vehicle and Equipment Use, Maintenance, and Replacement Policy section 4-1 provides for the on-going replacement of City fleet vehicles and equipment. Replacements are scheduled using guidelines based on age, mileage accumulation and obsolescence. The policy prescribes a replacement interval for trucks with service bodies of ten years or 100,000 miles.

In accordance with the policy, the Fleet Review Committee reviews all vehicles proposed for replacement and authorized this replacement during the Fiscal Year 2016 budget process. Approval was based on:

- An examination of each vehicle's current usage;
- An analysis of each vehicle's operating and replacement costs;
- A comparison of the age, mileage, operating cost and performance of each vehicle with others in the class; and
- An analysis of alternatives to ownership, such as mileage reimbursement; pooling/sharing; the reassignment of another underutilized vehicle, or renting.

Vehicle 8790, a 1990 GMC 4000 truck with a robotic sewer rodder is well beyond it's useful life; will be out of compliance with California Air Resources Board regulations when the approved extension expires May 1, 2017; and is no longer manufactured due to safety concerns.

Discussion

Staff recommends replacing the vehicle used by Utilities to clean out sewer mains with a 2017 Ford F-550 XL 4WD with a Knapheide 14' Value Master Platform with Weco Industries Equipment. The original model has now been replaced with this current model, which includes the latest safety revisions. The replacement vehicle can be used for tasks beyond just rodding and is also capable of accessing City alleyways that the old equipment was unable to reach.

Bid Process

Section 2.30.360 (j) of the Palo Alto Municipal code identifies the process that allows the use of Intergovernmental Cooperative Purchasing agreements. Bids for this purchase were obtained through the National Joint Purchasing Alliance

(NJPA), which is an approved cooperative group. A Request for Quotation was sent to NJPA on September 28, 2016, and a quote was received from National Auto Fleet Group on February 6, 2017, (Attachment A).

Staff recommends that council approve a purchase order with National Auto Fleet Group for one 2017 Ford F-550 XL 4WD with Knapheide 14' Value Master Platform with Weco Industries Equipment.

Resource Impact

The Scheduled Vehicle and Equipment Replacement Fund Fiscal Year 2016 CIP (VR-16000) does not have sufficient funding to purchase this vehicle.

Traditionally, vehicle procurements are pre-funded through annual charges to the department/fund that benefits from the vehicle.

This vehicle was estimated to be replaced at a cost of \$125,000 which was allocated for the replacement of this vehicle in VR-16000. The current vehicle is no longer manufactured and additional safety features and functionality, including accessing alleyways, reflects the main reasons the cost of this vehicle increased significantly to \$214,782 from the original replacement estimate, an increase of \$89,782.

Therefore, additional funding of \$89,782 to the Scheduled Vehicle and Equipment Replacement Fiscal Year 2016 CIP project (VR-16000) in the Vehicle Replacement and Maintenance Fund is recommended to be appropriated for the purchase of this vehicle. This increased expense is offset by a transfer of \$126,268 from the Wastewater Collection Fund. To date, \$88,514 has been collected from the Wastewater Collection Fund for this vehicle, leaving a shortfall of \$126,268 to fund the full replacement cost.

Policy Implications

Authorization of the contract does not represent any change to the existing policy.

Environmental Review

This vehicle will meet the EPA 2017 Emissions standards.
