

2018 POWER CONTENT LABEL

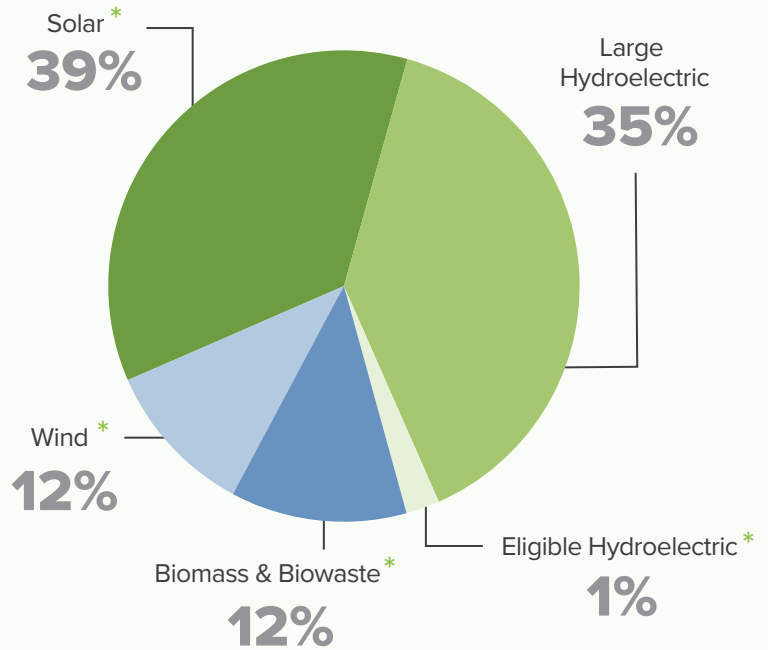

City of Palo Alto Utilities

cityofpaloalto.org/PowerContentLabel

This flyer informs customers of the sources of power purchased by City of Palo Alto Utilities (CPAU) for distribution within the City of Palo Alto. Information is provided on page 2 in the form of a Power Content Label, which is very much like a nutrition label and helps consumers make informed decisions.

Palo Alto electricity has been 100% “carbon neutral” since 2013. cityofpaloalto.org/CarbonNeutral

Carbon neutral electric power comes from a variety of sources. Some power comes from renewable, carbon-free resources such as solar, wind and small hydroelectric plants. Large hydroelectric sources are also carbon-free, but are not considered eligible renewables by the state.

* Eligible Renewables

POWER SOURCES

In 2018, CPAU’s hydroelectric generation was somewhat lower than long-term average levels due to relatively dry weather conditions. However, due to the number of renewable energy projects that it has under contract, CPAU still had a small energy surplus and sold the excess generation on the market. 100% of CPAU’s power remains carbon neutral. CPAU power sources include five solar photovoltaic (PV) projects in the Central Valley (Newman, Bakersfield, Kettleman City, and two in Lancaster), the High Winds and Shiloh wind projects, California landfill gas-fired projects in Watsonville, Half Moon Bay, Pittsburg, Gonzales, and Linden, the Calaveras hydroelectric project, and the Western Area Power Administration (Western) contract. Western power comes from California Central Valley Project hydroelectric facilities. Percentages vary annually based on the available output from our contracted hydroelectric, solar, wind and landfill gas generators.

POWER CONTENT LABEL—2018

City of Palo Alto Utilities

ENERGY RESOURCES	PALOALTOGREEN ^(b)	POWER MIX	2018 CA POWER MIX ^(e)
Eligible Renewable	100%	65%*	31%
Biomass & biowaste	0%	12%	2%
Geothermal	0%	0%	5%
Eligible hydroelectric	0%	1%	2%
Solar	1% ^(c)	39%	11%
Wind	99% ^(d)	12%	11%
Coal	0%	0%	3%
Large Hydroelectric	0%	35%	11%

For more information on Green-e Certified Energy, call **1-888-63-GREEN** or visit **green-e.org**

- (a)** “Unspecified sources of power” means electricity from transactions that are not traceable to specific generation sources.
- (b)** PaloAltoGreen is a voluntary renewable energy program from City of Palo Alto Utilities that matches up to 100% of your estimated monthly electricity usage with Green-e certified Renewable Energy Credits (RECs) from new renewable energy resources, specifically from generation facilities that first began commercial operation in the last 15 years.
- (c)** Sourced from solar installations located in Palo Alto.
- (d)** Sourced from wind energy RECs located in the western U.S.
- (e)** Percentages are estimated annually by the California Energy Commission based on the electricity sold to California consumers during the identified year.
