RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Other Pertinent Environmental Activity Identified at Site

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D011
Waste name: SILVER

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

CA WDS:

Facility ID: San Francisco Bay 431006606
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 2
Facility Telephone: 4087420195
Facility Contact: KORBUS K M
Agency Name: LOCKHEED MARTIN MISSILES & SPA
Agency Address: PO Box 3504
Agency City,St,Zip: Sunnyvale 940883504
Agency Contact: WESTON MARK
Agency Telephone: 4087420164
Agency Type: Private
SIC Code: 0

Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Other Pertinent Environmental Activity Identified at Site

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Other Pertinent Environmental Activity Identified at Site

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Historical Generators:

Date form received by agency: 09/24/1999
Facility name: THE HOME DEPOT NO 6603
Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D009
Waste name: MERCURY

Waste code: D016
Waste name: 2,4-D

Waste code: D018
Waste name: BENZENE

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Other Pertinent Environmental Activity Identified at Site

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Comments: In October 1992, EPA determined that aquifers on the western side of Moffett Field (OU4) were affected by the regional volatile organic compound plume emanating from the MEW Superfund site south of Moffett Field. EPA determined that these aquifers were subject to the 1989 record of decision (ROD), already written for the MEW site, that directed the remediation of these aquifers. Consequently, OU4 was deleted. Several interim source control measures (SCM) were completed at OU4. The final remedial action of the westside aquifer treatment system will start operation summer of 1997.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

California - Hazardous Waste Tracking System - Datamart

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Comments: The Operation and Maintenance Plan cover groundwater monitoring requirements. DTSC, reviewed the 2005 Annual Operations and Maintenance Summary Report. Review has found that the report meeting the Operation and Maintenance requirements for 2005. During the course of site investigations of AOI4, trichloroethene (TCE) and 1,2-dichloroethene (DCE) were detected in the groundwater. No connection with an on-site source of these chemicals could be found. Further investigations on the Orion ParApproved O&M Plan. Groundwater is currently being monitored and will continue to be monitored on a quarterly basis until the TPH concentrations are below established groundwater action levels (700 microgram per liter for TPH-diesel and 50 micrograms Groundwater TPH concentrations are observed to be decreasing over time. Groundwater monitoring will continue for at least two more quarters to determine if TPH concentrations will rebound. If concentrations remain low NASA proposes to request ending The goal of the follow-up sampling was to collect soil and groundwater samples in the vicinity of Tank 1 and former soil borings SB4-2 and 584-6 (near Tank 5) to obtain additional data regarding the

extent of petroleum hydrocarbons and chlorinated sRAW Fact Sheet mailed out. Fact sheet covering the draft Removal Action Workplan. The Sampling Report indicates that the cleanup goals for contaminant petroleum hydrocarbons defined in the RAW have already been achieved by natural means. The report concludes that the soil excavation and skimming of contaminated groundwater to remA select group of monitoring well in the AOI 4 have meet the groundwater monitoring requirement of TPH concentration detections below the clean up goals for four consecutive quarters. Groundwater monitoring at these wells will be discontinued. Signed VCA for AOI 4. The VCA includes the National Full Scale Aerodynamics Complex, a large wind tunnel for testing the aerodynamic characteristics of large-scale models. Twelve underground storage tanks were originally located within AOI 4; leak Approved the report with modifications. DTSC announces the certification of the AOI 4 hazardous substances cleanup at the NASA Ames Research Center. DTSC certification of AOI 4 signifies that all environmental cleanup activities mandated by the Removal Action Workplan are now complete. DTSC and NASA Ames have executed a land use control document which will be included in the NASA Ames Master Plan. Approved RAW specifying the following actions: 1) removal of free product hydrocarbons from the groundwater using skimming pumps; 2) excavation and on-site bioremediation of petroleum contaminated soil; 3) off site disposal of soil not meeting clea Completed Removal Action. Skimming pumps were planned to be installed in two monitoring wells (one existing well and one new well) to extract free product floating on the water table. Additional sampling data conducted in 1999 indicated that there Completed PEA. A PEA equivalent report was completed by NASA Ames for 12 Areas of Investigation (AOIs). This report summarizes and presents the results of investigations performed in Area of Investigation 4 (A01 4), located on the west side of the NASA Ames Research Center (NASA Ames) property, A01 4 includes the National Full-scale Aerodynamics Compk housing area, upgradient of A014, revealed elevated concentrations of TCE and DCE in the groundwater. Soil samples from the Orion Park area also revealed the presence of TCE and DCE. Based on this data NASA has concluded that the TCE and DCE c groundwater monitoring for qualified wells. nup levels; and 4) on-going groundwater monitoring for contaminants of concern. ing tanks were removed. Subsequent sampling events identified four primary locations, Tank 1, Tank 5, and SB4-6, located in the drum storage area. Soil and groundwater samples from these areas detected petroleum hydrocarbons and trichloroethylene is no longer free product in the shallow aquifer near Tank 1 and Tank 5. Based on this information skimming pumps were not required and proposed new groundwater monitoring well was not installed. Both Tank 1 and 5 were removed. Dissolved petroper liter for TPH-gasoline) for four consecutive quarters. lex and the surrounding area. olvent contamination in these areas. ove free floating product is not required. leum hydrocarbons in the groundwater will be monitored quarterly until such time that four consecutive quarters of data are analyzed indicating that the TPH concentrations are below cleanup levels and stable. A source point for the TCE concentration (TCE). ontamination found in the A01 4 groundwater is from a source upgradient of the NASA property. The source could be either the Orion Park housing area or the Middlefield-Ellis-Whisman (MEW) plume. The groundwater investigation has been refered to ths detected in the groundwater was not discovered during the remedial investigation phase of the project. Therefore, it is believed that

the source of the TCE detected in the groundwater is from an off-site source. Groundwater TCE contamination will be investigated separately from the AOI 4 project. Petroleum hydrocarbon contaminated soils exceeding the identified remediation levels (400 mg/kg) were planned to be excavated. Excavated soil with concentrations under 1,000 mg/kg was to be bioremediated and reused. Soil exceeding 1,000 mg/kg was to be disposed of offsite. Additional soil sampling conducted in 1999 indicated that the level of petroleum hydrocarbons in the soil and groundwater were lower than originally identified; they were below or close to the established cleanup goals. The sampling was repeated and the results confirmed; the soil excavation proposed in the RAW was not implemented.

 Comments: DTSC and NASA staff discussed draft Sampling Analysis Plan (SAP).
 Based on review of the plan, DTSC identified some organizational
 changes and edits to the text that are necessary. NASA agreed with
 the recommendations and will revise the SAP. Signed VCA. DTSC is
 providing oversight for the AOI 5 which is not under the oversight of
 the U.S. EPA. The VCA outlined the oversight duties of DTSC,
 including additional investigations and remediation of the site. AOI

5 includes six buildings uCompleted PEA. A PEA equivalent report was completed by NASA Ames and identified 12 areas of investigations (AOIs).The additional sampling conducted indicates that the remaining TPH contamination has attenuated to below the Site specific cleanup levels at the Site and therefore no further action is required.During the fieldwork is was discovered that the oil pipeline is connected to a AST. Before oil pipeline can be removed the AST must be closed. NASA will pursue the tank closure with Santa Clara County. Sampling event was completed as planned. No dissed as biosciences laboratories, the biomedical research facility and two electrical substations. AOI 5 also includes a drum storage area and one underground storage tank that were previously located within the site boundaries. The drum storage arcolored soil or strong odors were observed.ea was closed in the middle 1980s and the tank was removed in 1990. Analyses of soil and groundwater samples detected petroleum hydrocarbons, PCBs, and VOCs. Investigations conducted in 1998 and 1999 indicated two separate groundwater plumes. Thewestern plume contains PCE up to 72 micrograms per liter (ug/l). The eastern plume contains primarily TCE up to 80 ug/l. NASA is currently evaluating some in-situ remedial methods as an alternative to pump and treat for any groundwater contamination found.

 Comments: The Department of Toxic Substances Control certifies the completion of the removal actions implemented as described in the Final Removal Action Workplan. The completion of the approved Final Implementation Report documents the remedial actions under Approved RAW requiring soil with less than 1,000 mg/kg of TPH to be stockpiled and treated on the bioremediation pad, on site, and the soil with contamination greater than 1,000 mg/kg will be disposed off site. NASA Ames has completed the four consecutive quarters of groundwater monitoring at AOI 8 for the TPH contaminants of concern, required by the Operation and Maintenance Agreement. With the completion of the groundwater monitoring activities, no further DTSC announces the certification of

the AOI 8 hazardous substances cleanup at the NASA Ames Research Center. DTSC certification of AOI 8 signifies that all environmental cleanup activities mandated by the Removal Action Workplan are now complete. The Implementation Plan provides the details of how NASA intends to accomplish the Removal Action Alternative recommended in the approved Removal Action Workplan (RAW) for AOI 8. DTSC, reviewed the 2005 Annual Operations and Maintenance Summary Report. Review has found that the report meeting the Operation and Maintenance requirements for 2005. Approved Removal Action. Signed VCA for AOI 8. AOI 8 is located at the northwest corner of the NASA Ames Research Center, adjacent to the wetlands and formerly known as Mavarro Farms. AOI 8 is used for recycling and storage of excess vehicles and equipment. The site contDTSC and NASA Ames have executed a land use control document which will be included in the NASA Ames Master Plan. Completed PEA. A PEA equivalent report was completed by NASA Ames by combining the Center-wide Sampling and Analysis program with the listing site inspection. Approved O&M Plan. Groundwater will continue to be monitored for at least five years after the implementation of the RAW, to ensure that the groundwater doe not continue to be affected. ains one building, and a bioremediation pad. Soils contaminated with total petroleum hydrocarbons (TPH) as diesel and oil and grease have been identified at the site. An above ground diesel tank was formerly located on the site and spilled 100 galer action under the OMA or the VCA is required. rtaken at the Site. As outlined in the Operation and Maintenance Agreement and the Land Use Controls, the site requires further site specific operation and maintenance activities. ions of fuel in 1987. Soil samples detected TPH-diesel at 10,000 milligrams per kilogram (mg/kg) and TPH-oil and grease was 16,000 mg/kg. Other chemicals such as pesticides and VOCs have been detected at the site, but the concentrations have been low and not considered significant. Elevated levels of TPH concentrations in the groundwater have been detected during sampling events in the past, but have not been elevated for the past five years. Groundwater is being monitored by wells both up gradient (two wells) and down gradient (one well).

will be excavated, disposed of off site, and backfilled. The project has no possibility of significant effect on the Approved RAW requiring the excavation and disposal of soil contaminated with PCBs. After excavation, concrete will be used to backfill the hole. The remedial goal for PCB contamination is 50 mg/kg, for restricted areas, in accordance with 40 CFR rDTSC announces the certification of the AOI 10 hazardous substances cleanup at the NASA Ames Research Center. DTSC certification of AOI 10 signifies that all environmental cleanup activities mandated by the Removal Action Workplan are now complete. NASA requests the change to the selected alternative to assist in the overall reduction in non-source point PCB contaminated storm runoff at the Ames Research Center. The implementation of Alternative 2 would allow NASA to forego the bioremediation Approved RA for the N221C area. The PCB contaminated soil was excavated to the depth of seven feet below the ground surface. Verification sampling indicated PCB concentrations were reduced to less than 1 mg/kg (0.61 mg/kg). Concrete was used to backfill. N227D Removal Action was implemented and completed without proper notification to DTSC. The PCB and TPH contamination soil removal action at N227D Unitary Substation has been completed. Approximately 36 cubic yards of contaminated soil has been excavated and disposed of. Confirmation sampling indicates at the remaining TPH and PCB soil. Completed PEA. A PEA equivalent report was completed by NASA Ames for 12 Area of Investigation (AOIs). Signed VCA for AOI 10. AOI 10 consists of three electrical substations; N227 Unitary Substation, N238 Arc Jet Substation, and N221C substation located in the central part of the NASA Ames Research Center. The substations are fenced and access is limited. Cleanup Actions at the three electrical substations making up NASA Ames Research Center's Area of Investigation 10 (AOI 10) has been completed. No Operation and Maintenance is required for this Site. Concentration are below the site specific cleanup goals, established in the approved RAW. Environment limited to operation and maintenance personnel. There is no vehicular traffic through these areas. Concrete pads in each of the substations support transformers and other equipment. The ground surface surrounding the concrete pads is covered with vegetation pursuant to TSCA. For soil contaminated with petroleum, biological nutrients will be injected 2 to 4 feet into the ground to promote bioremediation. Bioremediation will continue until the petroleum concentrations are below 400 mg/kg in the excavation. The completion of the N221C Substation remedial activities do not complete the remedial action for AOI 10 as described in the approved Final RAW (January 2001). The shut down of the N227D Substation and remediation of the total technology at the N227D substation of AOI 10 and excavate the TPH contaminated soil along with the PCB contaminated soil. DTSC has determined that the request is an insignificant change and will not have a significant impact on the scope, performance. petroleum hydrocarbon (TPH) and polychlorinated biphenyls (PCBs), remain to be implemented. Access to the site is restricted and appropriate signage will be posted. Due to the need to have the substations de-energized during the remediation, the tasks of cleaning up substations N221C and N227D were divided. Work to six inches of gravel. The primary objectives of the work proposed for AOI 10 is to investigate the soil within the electrical substations for the presence of PCBs and extractable hydrocarbons (TEPHs). Transformer oil containing PCBs was historically used in many of the transformers at NASA Ames. The N227 Unitary Substation was constructed in the mid 1950s to supply

power to three wind tunnels. TEPHs were detected in concentrations above cleanup levels (400 mg/kg) in areas directly east and west of one of the transformer pads. The concentrations are the highest nearest the surface and are below cleanup levels at depths of five feet below. In identifying the extent of contamination, soil samples were collected near the substation. Concentrations of TEPHs were detected as high as 1200 mg/kg and the median was 83 mg/kg. Of those samples, only one detected PCB concentrations that exceeded the residential cleanup levels (1 mg/kg) at 2.1 mg/kg. No PCBs were detected at N238 Arc Jet Substation more than 0.2 mg/kg. TEPH was detected in soil samples collected at this location from 72 mg/kg to 160 mg/kg, which are all below the cleanup level. Only trace concentrations of TEPH were detected (maximum of 6.8 mg/kg) in the area of N221C. PCBs were found in one sampling location, measuring 310 mg/kg at 1.5 feet below the ground surface (bgs) down to 7.4 mg/kg at 5.5 feet. Two additional sampling events were conducted in January and February, 2001 to further evaluate the extent of the PCBs contamination. During the February sampling event, PCB concentrations of 330 mg/kg at 3 feet and 520 mg/kg at 4 feet were detected.

 Comments: NASA entered into a VCA for AOI 11, for DTSC oversight. AOI 11 encompasses 11 underground storage tanks, which were investigated to determine if a release of hazardous substances could be determined and if remedial action would be required. Soil aUnderground storage tanks were all removed by NASA Ames under oversight of Santa Clara County. At most of the Tank Sites contamination was not detected above cleanup levels. Where contamination was detected, the contaminated media was remediated. NoCompleted Site Screening.Completed PEA. A PEA equivalent report was completed by NASA Ames for 12 Areas of Investigation (AOIs).nd groundwater around these tanks were sampled and analyzed. After the samples were analyzed, two tanks required further remedial action, Tank U14 and Tank 7. The area surrounding U14 is an undeveloped gravel lot that stretches east from the PG&E sFurther Action Required.ubstation West N-225A to Parsons Avenue. In this area, groundwater can be found at eight feet below ground surface. Trichloroethylene (TCE) was not detected in the soil samples around Tank U14. Groundwater samples near the tank detected concentrations of TCE and dichloroethylene (DCE), above the California Maximum Contaminant Levels (MCLs) in drinking water. The highest concentrations were found in the monitoring wells up gradient from the site, 270 micrograms per liter (ug/l) of TCE and 120 ug/l of DCE. The sampling data suggests that the source of the contamination may be the Orion Park area, under Navy investigation or the MEW plume, under the oversight of the US EPA. Tank 7 is used to store jet fuel. The current tank replaceda tank, which was leaking. Remediation of the released hydrocarbons identified as TPH-JP5, has already occurred, but a fuel spill in the area occurred in 1995. Soil and groundwater contamination was investigated in 1999, identifying that both soiland groundwater are impacted with petroleum hydrocarbon concentrations above the cleanup levels. NASA is currently developing a workplan that focuses on the source(s).

Comments: The Operation and Maintenance Plan cover groundwater monitoring requirements. DTSC, reviewed the 2005 Annual Operations and Maintenance Summary Report. Review has found that the report meeting the Operation and Maintenance requirements for 2005. During the course of site investigations of AOI4, trichloroethene (TCE) and 1,2-dichloroethene (DCE) were detected in the groundwater. No connection with an on-site source of these chemicals could be found. Further investigations on the Orion ParApproved O&M Plan. Groundwater is currently being monitored and will continue to be monitored on a quarterly basis until the TPH concentrations are below established groundwater action levels (700 microgram per liter for TPH-diesel and 50 micrograms). Groundwater TPH concentrations are observed to be decreasing over time. Groundwater monitoring will continue for at least two more quarters to determine if TPH concentrations will rebound. If concentrations remain low NASA proposes to request ending. The goal of the follow-up sampling was to collect soil and groundwater samples in the vicinity of Tank 1 and former soil borings SB4-2 and 584-6 (near Tank 5) to obtain additional data regarding the extent of petroleum hydrocarbons and chlorinated sRAW Fact Sheet mailed out. Fact sheet covering the draft Removal Action Workplan. The Sampling Report indicates that the cleanup goals for contaminant petroleum hydrocarbons defined in the RAW have already been achieved by natural means. The report concludes that the soil excavation and skimming of contaminated groundwater to remA select group of monitoring well in the AOI 4 have meet the groundwater monitoring requirement of TPH concentration detections below the clean up goals for four consecutive quarters. Groundwater monitoring at these wells will be discontinued. Signed VCA for AOI 4. The VCA includes the National Full Scale Aerodynamics Complex, a large wind tunnel for testing the aerodynamic characteristics of large-scale models. Twelve underground storage tanks were originally located within AOI 4; leak. Approved the report with modifications. DTSC announces the certification of the AOI 4 hazardous substances cleanup at the NASA Ames Research Center. DTSC certification of AOI 4 signifies that all environmental cleanup activities mandated by the Removal Action Workplan are now complete. DTSC and NASA Ames have executed a land use control document which will be included in the NASA Ames Master Plan. Approved RAW specifying the following actions: 1) removal of free product hydrocarbons from the groundwater using skimming pumps; 2) excavation and on-site bioremediation of petroleum contaminated soil; 3) off site disposal of soil not meeting cleaCompleted Removal Action. Skimming pumps were planned to be installed in two monitoring wells (one existing well and one new well) to extract free product floating on the water table. Additional sampling data conducted in 1999 indicated that thereCompleted PEA. A PEA equivalent report was completed by NASA Ames for 12 Areas of Investigation (AOIs). This report summarizes and presents the results of investigations performed in Area of Investigation 4 (AOI 4), located on the west side of the NASA Ames Research Center (NASA Ames) property, AOI 4 includes the National Full-scale Aerodynamics Compk housing area, upgradient of AOI4, revealed elevated concentrations

of TCE and DCE in the groundwater. Soil samples from the Orion Park area also revealed the presence of TCE and DCE. Based on this data NASA has concluded that the TCE and DCE groundwater monitoring for qualified wells.nup levels; and 4) on-going groundwater monitoring for contaminants of concern.ing tanks were removed. Subsequent sampling events identified four primary locations, Tank 1, Tank 5, and SB4-6, located in the drum storage area. Soil and groundwater samples from these areas detected petroleum hydrocarbons and trichloroethyleneis no longer free product in the shallow aquifer near Tank 1 and Tank 5. Based on this information skimming pumps were not required and proposed new groundwater monitoring well was not installed. Both Tank 1 and 5 were removed. Dissolved petroper liter for TPH-gasoline) for four consecutive quarters.lex and the surrounding area.olvent contamination in these areas.ove free floating product is not required.leum hydrocarbons in the groundwater will be monitored quarterly until such time that four consecutive quarters of data are analyzed indicating that the TPH concentrations are below cleanup levels and stable. A source point for the TCE concentration(TCE).ontamination found in the AOI 4 groundwater is from a source upgradient of the NASA property. The source could be either the Orion Park housing area or the Middlefield-Ellis-Whisman (MEW) plume. The groundwater investigation has been referred to the detected in the groundwater was not discovered during the remedial investigation phase of the project. Therefore, it is believed that the source of the TCE detected in the groundwater is from an off-site source. Groundwater TCE contamination wille RWQCB.be investigated separately from the AOI 4 project. Petroleum hydrocarbon contaminated soils exceeding the identified remediation levels (400 mg/kg) were planned to be excavated. Excavated soil with concentrations under 1,000 mg/kg was to be bioremediated and reused. Soil exceeding 1,000 mg/kg was to be disposed of offsite. Additional soil sampling conducted in 1999 indicated that the level of petroleum hydrocarbons in the soil and groundwater were lower than originally identified; they were below or close to the established cleanup goals. The sampling was repeated and the results confirmed; the soil excavation proposed in the RAW was not implemented.

 Comments: DTSC and NASA staff discussed draft Sampling Analysis Plan (SAP). Based on review of the plan, DTSC identified some organizational changes and edits to the text that are necessary. NASA agreed with the recommendations and will revise the SAP. Signed VCA. DTSC is providing oversight for the AOI 5 which is not under the oversight of the U.S. EPA. The VCA outlined the oversight duties of DTSC, including additional investigations and remediation of the site. AOI 5 includes six buildings uCompleted PEA. A PEA equivalent report was completed by NASA Ames and identified 12 areas of investigations (AOIs). The additional sampling conducted indicates that the remaining TPH contamination has attenuated to below the Site specific cleanup levels at the Site and therefore no further action is required. During the fieldwork it was discovered that the oil pipeline is connected to a AST. Before oil pipeline can be removed the AST must be closed. NASA will pursue the tank closure with Santa Clara County. Sampling event was completed as planned. No disses as biosciences laboratories, the biomedical research facility and two electrical substations. AOI 5 also includes a drum storage area and one underground storage tank that were previously located within the site boundaries. The drum storage area colored soil or strong odors were observed. ea was closed in the middle 1980s and the tank was removed in 1990. Analyses of soil and groundwater samples detected petroleum hydrocarbons, PCBs, and VOCs. Investigations conducted in 1998 and 1999 indicated two separate groundwater plumes. The western plume contains PCE up to 72 micrograms per liter (ug/l). The eastern plume contains primarily TCE up to 80 ug/l. NASA is currently evaluating some in-situ remedial methods as an alternative to pump and treat for any groundwater contamination found.

Comments: The Department of Toxic Substances Control certifies the completion of the removal actions implemented as described in the Final Removal Action Workplan. The completion of the approved Final Implementation Report documents the remedial actions under Approved RAW requiring soil with less than 1,000 mg/kg of TPH to be stockpiled and treated on the bioremediation pad, on site, and the soil with contamination greater than 1,000 mg/kg will be disposed off site. NASA Ames has completed the four consecutive quarters of groundwater monitoring at AOI 8 for the TPH contaminants of concern, required by the Operation and Maintenance Agreement. With the completion of the groundwater monitoring activities, no further DTSC announces the certification of the AOI 8 hazardous substances cleanup at the NASA Ames Research Center. DTSC certification of AOI 8 signifies that all environmental cleanup activities mandated by the Removal Action Workplan are now complete. The Implementation Plan provides the details of how NASA intends to accomplish the Removal Action Alternative recommended in the approved Removal Action Workplan (RAW) for AOI 8. DTSC, reviewed the 2005 Annual Operations and Maintenance Summary Report. Review has found that the report meeting the Operation and Maintenance requirements for 2005. Approved Removal Action. Signed VCA for AOI 8. AOI 8 is located at the northwest corner of the NASA Ames Research Center, adjacent to the wetlands and formerly known as Mavarro Farms. AOI 8 is used for recycling and storage of excess vehicles and equipment. The site contains DTSC and NASA Ames have executed a land use control document which will be included in the NASA Ames Master Plan. Completed PEA. A PEA equivalent report was completed by NASA Ames by combining the Center-wide Sampling and Analysis program with the listing site inspection. Approved O&M Plan. Groundwater will continue to be monitored for at least five years after the implementation of the RAW, to ensure that the groundwater does not continue to be affected. Includes one building, and a bioremediation pad. Soils contaminated with total petroleum hydrocarbons (TPH) as diesel and oil and grease have been identified at the site. An above ground diesel tank was formerly located on the site and spilled 100 gallons action under the OMA or the VCA is required. Taken at the Site. As outlined in the Operation and Maintenance Agreement and the Land Use Controls, the site requires further site specific operation and maintenance activities. Leaks of fuel in 1987. Soil samples detected TPH-diesel at 10,000 milligrams per kilogram (mg/kg) and TPH-oil and grease was 16,000 mg/kg. Other chemicals such as pesticides and VOCs have been detected at the site, but the concentrations have been low and not considered significant. Elevated levels of TPH concentrations in the groundwater have been detected during sampling events in the past, but have not been elevated for the past five

 Comments: The cleanup activities for this project are confined within the fenced perimeter of two electrical substations. The contaminated soil will be excavated, disposed of off site, and backfilled. The project has no possibility of significant effect on the Approved RAW requiring the excavation and disposal of soil contaminated with PCBs. After excavation, concrete will be used to backfill the hole. The remedial goal for PCB contamination is 50 mg/kg, for restricted areas, in accordance with 40 CFR rDTSC announces the certification of the AOI 10 hazardous substances cleanup at the NASA Ames Research Center. DTSC certification of AOI 10 signifies that all environmental cleanup activities mandated by the Removal Action Workplan are now complete. NASA requests the change to the selected alternative to assist in the overall reduction in non-source point PCB contaminated storm runoff at the Ames Research Center. The implementation of Alternative 2 would allow NASA to forego the bioremediation Approved RA for the N221C area. The PCB contaminated soil was excavated to the depth of seven feet below the ground surface. Verification sampling indicated PCB concentrations were reduced to less than 1 mg/kg (0.61 mg/kg). Concrete was used to back N227D Removal Action was implemented and completed without proper notification to DTSC. The PCB and TPH contamination soil removal action at N227D Unitary Substation has been completed. Approximately 36 cubic yards of contaminated soil has been excavated and disposed of. Confirmation sampling indicates at the remaining TPH and PCB soil. Completed PEA. A PEA equivalent report was completed by NASA Ames for 12 Area of Investigation (AOIs). Signed VCA for AOI 10. AOI 10 consists of three electrical substations; N227 Unitary Substation, N238 Arc Jet Substation, and N221C substation located in the central part of the NASA Ames Research Center. The substations are fenced and access is limited. Cleanup Actions at the three electrical substations making up NASA Ames Research Center's Area of Investigation 10 (AOI 10) has been completed. No Operation and Maintenance is required for this Site. concentration are below the site specific cleanup goals, established in the approved RAW. e environment. mited to operation and maintenance personnel. There is no vehicular traffic through these areas. Concrete pads in

each of the substations support transformers and other equipment. The ground surface surrounding the concrete pads is covered with tegulations pursuant to TSCA. For soil contaminated with petroleum, biological nutrients will be injected 2 to 4 feet into the ground to promote bioremediation. Bioremediation will continue until the petroleum concentrations are below 400 mg/kg infill the excavation. The completion of the N221C Substation remedial activities do not complete the remedial action for AOI 10 as described in the approved Final RAW (January 2001). The shut down of the N227D Substation and remediation of the totaltechnology at the N227D substation of AOI 10 and excavate the TPH contaminated soil along with the PCB contaminated soil. DTSC has determined that the request is an insignificant change and will not have a significant impact on the scope, performancpetroleum hydrocarbon (TPH) and polychlorinated biphenyls (PCBs), remain to be implemented.the soil. Access to the site is restricted and appropriate signage will be posted. Due to the need to have the substations de-energized during the remediation, the tasks of cleaning up substations N221C and N227D were divided.wo to six inches of gravel. The primary objectives of the work proposed for AOI 10 is to investigate the soil within the electrical substations for the presence of PCBs and extractable hydrocarbons (TEPHs). Transformer oil containing PCBs was histoe, or cost of the remedy.rically used in many of the transformers at NASA Ames. The N227 Unitary Substation was constructed in the mid 1950s to supply power to three wind tunnels. TEPHs were detected in concentrations above cleanup levels (400 mg/kg) in areas directly east and west of one of the transformer pads. The concentrations are the highest nearest the surface and are below cleanup levels at depths of five feet below. In identifying the extent of contamination, soil samples were collected near the substation. Concentrations of TEPHs were detected as high as 1200 mg/kg and the median was 83 mg/kg. Of those samples, only one detected PCB concentrations that exceeded the residential cleanup levels (1 mg/kg) at 2.1 mg/kg. No PCBs were detected at N238 Arc Jet Substation more than 0.2 mg/kg. TEPH was detected in soil samples collected at this location from 72 mg.kg to 160 mg/kg, which are all below the cleanup level. Only trace concentrations of TEPH were detected (maximum of 6.8 mg/kg) in the area of N221C. PCBs were found in one sampling location, measuring 310 mg/kg at 1.5 feet below the ground surface (bgs) down to 7.4 mg/kg at 5.5 feet. Two additional sampling events were conducted in January and February, 2001 to further evaluate theextent of the PCBs contamination. During the February sampling event, PCB concentrations of 330 mg/kg at 3 feet and 520 mg/kg at 4 feet were detected.

Comments:

NASA entered into a VCA for AOI 11, for DTSC oversight. AOI 11 encompasses 11 underground storage tanks, which were investigated to determine if a release of hazardous substances could be determined and if remedial action would be required. Soil aUnderground storage tanks were all removed by NASA Ames under oversight of Santa Clara County. At most of the Tank Sites contamination was not detected above cleanup levels. Where contamination was detected, the contaminated media was remediated. NoCompleted Site Screening.Completed PEA. A PEA equivalent report was completed by NASA Ames for 12 Areas of Investigation (AOIs).nd groundwater around these tanks were sampled and analyzed. After the samples were analyzed, two tanks required further remedial action, Tank U14 and Tank 7. The area surrounding U14 is an undeveloped gravel lot that stretches east from the PG&E sFurther Action Required.ubstation West N-225A to Parsons Avenue. In this area, groundwater can be found at eight feet below ground surface. Trichloroethylene (TCE) was not detected in the soil samples around Tank U14. Groundwater samples near the tank detected concentrations of TCE and dichloroethylene (DCE), above the California Maximum Contaminant Levels (MCLs) in drinking water. The highest concentrations were found in the

monitoring wells up gradient from the site, 270 micrograms per liter (ug/l) of TCE and 120 ug/l of DCE. The sampling data suggests that the source of the contamination may be the Orion Park area, under Navy investigation or the MEW plume, under the oversight of the US EPA. Tank 7 is used to store jet fuel. The current tank replaced a tank, which was leaking. Remediation of the released hydrocarbons identified as TPH-JP5, has already occurred, but a fuel spill in the area occurred in 1995. Soil and groundwater contamination was investigated in 1999, identifying that both soil and groundwater are impacted with petroleum hydrocarbon concentrations above the cleanup levels. NASA is currently developing a workplan that focuses on the source(s).

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D009
Waste name: MERCURY

Waste code: U007
Waste name: ACRYLAMIDE

Waste code: U188
Waste name: PHENOL

California - Hazardous Waste Tracking System - Datamart

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

 Comments: No further action per EPA's preliminary assessment for this site only determined that its hazard ranking score (hrs) would not admit it into the National Priority List (NPL). Recommendation by dtsc on reevaluation of the site reflects DTSC's own cSITE SCREENING DONE NEED MORE INFORMATIONPRELIM ASSESS DONE DHS RECOMMENDATION IS PENDING, SINCE RWQCB IS THE LEAD AGENCYcriteria. This 3.6 acre currently active site, mostly paved or landscaped, has been the site of several interests associated with research and development in food, medicine, genetics and biology. Through various leases and subleases, Alza has been the lessee since 1972 and sole operator at the site since March 1986. Sampling since 1987 indicated that surface soil was contaminated with chloroform (520 mg/kg), carbon tetrachloride (250 mg/kg), freon (1.1 mg/kg) and DCE (120mg/kg) and groundwater in the uppermost interconnected aquifers was contaminated with chloroform (4100 mg/kg), carbon tetrachloride and TCE. Bore hole soil samples also detected presence of chloroform (2000mg/kg). Soil gas and groundwter treatment systems have been inoperation at site under oversight of Regional Water Quality Control Board. Deeper potable aquifer of wide use as drinking water source has not been impacted. This site screening was based in part on the CERCLA screening site inspection report prepared by Ecology and Environment

for USEPA (contained in DTSC file). DTSC files were reviewed. REQCB and county files were not located or reviewed. Extent of soil contamination was about 200 sf. groundwater contamination extends at least 200 feet from soil contamination area and one well screened in deeper aquifer detected 1.5 mg/l of chloroform.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 Comments: DTSC approved implementation of the Five-Year Review Workplan. Five-Year Report to be submitted by 2/28/05. Financial assurance for continued O&M also due at that time. Completed Public Participation Plan. Fact Sheet describes the progress made toward cleanup of chemical releases into the groundwater. Fact Sheet - Annual Performance Review Summary. Fact Sheet provides project update and announces a community meeting on June 23, 1993. Fact Sheet describes progress made on cleanup. Fact Sheet describes the progress made a cleanup. Fact Sheet outlines progress made on cleanup over the last year. Fact sheet updating the community on remedial activities. Fact Sheet describing progress on remedial investigation. Fact Sheet updating community on soil and groundwater investigations. Fact Sheet describing progress made on site investigations. Fact Sheet describing the progress made on site investigations. Fact Sheet informing the community about the feasibility study and announcing a community meeting on February 24. Fact Sheet announces the availability of the draft Remedial Action Plan and the upcoming public meeting. Fact Sheet provides site background, description of the process, and where to go for more information. Fact sheet describes progress made on cleanup over the past year. Fact Sheet Fact Sheet Amend Order to require implementation of the Remedial Action Plan and to remove Bicoastal Corporation as a responsible party. Approve Negative Declaration for the proposed groundwater extraction and treatment systems (IRMs #2, #3 and #4). Order amended to remove master lessees as respondents and to update the findings within the Order for the Teledyne-Singer Site located at 3176 Porter Drive in Palo Alto. Order amended to add three additional facilities and additional responsible parties, including master lessees, as respondents. Issued I or SE and RAO. Seventeen of the 21 RPs are in compliance with the Order. Remedial Action Plan approved. Public comment period ran from October 7 through November 7, 1994, with a public meeting held October 20, 1994. The approved remedy incorporates the interim remedial measures installed and adds more extraction wells. Approved with modifications. Amended PPP. Completed Five-Year Review. Groundwater flow patterns within Zone D and E are returning to prepumping conditions with no evidence of significant VOC concentration rebounds. Okay to continue the trial shutdown. Document reviewed, no comments or questions. Approve pilot study to evaluate use of bubblers to aerate Matadero Creek to remove low levels of VOCs in Creek water. Interim action to treat VOCs in Matadero Creek surface water using instream aeration system to bubble air into the Creek through diffusers, stripping the VOCs from the Creek. System was required to prevent contaminated creek water from recharging g. Approve Design for the Groundwater Treatment System. Completed FRIFS on Matadero Creek groundwater. Completed FRIFS

on Barron Park. The groundwater extraction and treatment system removed 3.7 pounds of VOCs in 2005. The consultant estimates that if the system had not been shutdown for five months in 2005, it would have removed approximately five pounds of VOCs. Approved O&M Plan. Completed Remedial Action. The final remedial action for the Hillview Porter Regional Plume consisted of installation and operation of a groundwater extraction and treatment system. Groundwater is extracted from two 750-foot long horizontal extract Approved revised remedial design to allow groundwater extracted from three wells located on McGregor Way to be discharge directly to the sanitary sewer under a permit from the Palo Alto Regional Water Quality Control Plant. This modification was reInstallation of a second horizontal extraction well located beneath portion of the VA Hospital property and the Watkins-Johnson Site. Extracted groundwater is conveyed via pipeline to a treatment plant located at 3215 Porter Drive where it is treat Groundwater extraction system installed consisting of a horizontal extraction well located beneath portions of the VA Hospital property. Extracted groundwater is conveyed via a pipeline to a treatment system located at 3215 Porter Drive in Palo Alt Groundwater is extracted from 11 extraction wells near the Bike Path in Bol Park and conveyed via pipeline to a treatment plant located at 3215 Porter Drive in Palo Alto. Extracted groundwater is treated with granular activated carbon and discharge Approve Design for installation of one of two horizontal wells. Approve design for interim action #2 (installation of one of two horizontal wells) ion wells and 15 vertical extraction wells and is treated using activated carbon at a treatment system located at 3215 Porter Drive. Treated water is discharged to Matadero Creek under an NPDES permit. Three additional wells discharge extracted wad to matadero Creek via the storm drain under an NPDES permit from the Water Board. ed with granular activated carbon before being discharged to Matadero Creek via the storm drain under an NPDES permit from the Water Board. roundwater and further contaminating groundwater and to prevent contaminated creek water from flowing into the Barron Park Neighborhood. quired due to unresolvable access issues. o. on the Veterans Administration property and in the Barron Park Neighborhood. ter directly to the sanitary sewer under a permit from the Palo Alto Regional Water Quality Control Plant.

Seventeen of the 21 RPs are in compliance with the Order. Remedial Action Plan approved. Public comment period ran from October 7 through November 7, 1994, with a public meeting held October 20, 1994. The approved remedy incorporates the interim remedial measures installed and adds more extraction wells. Approved with modifications. Amended PPP. Completed Five-Year Review. Groundwater flow patterns within Zone D and E are returning to prepumping conditions with no evidence of significant VOC concentration rebounds. Okay to continue the trial

shutdown. Document reviewed, no comments or questions. Approve pilot study to evaluate use of bubblers to aerate Matadero Creek to remove low levels of VOCs in Creek water. Interim action to treat VOCs in Matadero Creek surface water using instream aeration system to bubble air into the Creek through diffusers, stripping the VOCs from the Creek. System was required to prevent contaminated creek water from recharging groundwater. Approve Design for the Groundwater Treatment System. Completed FRIFS on Matadero Creek groundwater. Completed FRIFS on Barron Park. The groundwater extraction and treatment system removed 3.7 pounds of VOCs in 2005. The consultant estimates that if the system had not been shutdown for five months in 2005, it would have removed approximately five pounds of VOCs. Approved O&M Plan. Completed Remedial Action. The final remedial action for the Hillview Porter Regional Plume consisted of installation and operation of a groundwater extraction and treatment system. Groundwater is extracted from two 750-foot long horizontal extractors. Approved revised remedial design to allow groundwater extracted from three wells located on McGregor Way to be discharged directly to the sanitary sewer under a permit from the Palo Alto Regional Water Quality Control Plant. This modification was the reinstallation of a second horizontal extraction well located beneath a portion of the VA Hospital property and the Watkins-Johnson Site. Extracted groundwater is conveyed via pipeline to a treatment plant located at 3215 Porter Drive where it is treated. Groundwater extraction system installed consisting of a horizontal extraction well located beneath portions of the VA Hospital property. Extracted groundwater is conveyed via a pipeline to a treatment system located at 3215 Porter Drive in Palo Alto. Groundwater is extracted from 11 extraction wells near the Bike Path in Bol Park and conveyed via pipeline to a treatment plant located at 3215 Porter Drive in Palo Alto. Extracted groundwater is treated with granular activated carbon and discharged. Approve Design for installation of one of two horizontal wells. Approve design for interim action #2 (installation of one of two horizontal wells) and 15 vertical extraction wells and is treated using activated carbon at a treatment system located at 3215 Porter Drive. Treated water is discharged to Matadero Creek under an NPDES permit. Three additional wells discharge extracted water to Matadero Creek via the storm drain under an NPDES permit from the Water Board. Treated water with granular activated carbon before being discharged to Matadero Creek via the storm drain under an NPDES permit from the Water Board. Groundwater and further contaminating groundwater and to prevent contaminated creek water from flowing into the Barron Park Neighborhood. Required due to unresolvable access issues. Located on the Veterans Administration property and in the Barron Park Neighborhood. Treated directly to the sanitary sewer under a permit from the Palo Alto Regional Water Quality Control Plant.

FINDS:

Other Pertinent Environmental Activity Identified at Site

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

 Comments: Completed 2nd Five-Year Review. Remedial Investigation/Feasibility Study Addendum for OU2 approved. Completed Site Screening. WJC utilized trichloroethylene (TCE), perchloroethylene (PCE), freon, 1,1,1-trichloroethane (1,1,1-TCA), and other solvents in the manufacturing processes at the site. These solvents were stored as both products and waste. Remedial Investigation/Feasibility Study for OU1 approved. Completed FRIFS. Contaminants detected in soil and groundwater include: TCE, 1,1,1-TCA, freon, 1,2-dichloroethylene (1,2-DCE), PCE, 1,1-dichloroethane (1,2-DCA), and vinyl chloride. In addition, groundwater contamination has also migrated onto the site. Completed FRIFS. Soil contamination was detected near several of the former chemical storage areas. Workplan approved. ESD approves chemical oxidation for shallow groundwater. ESD fact sheet mailed out on 05/10/2006. Public Notice published. Fact sheet describing progress made on remedial investigations. Fact sheet updating community on soil and groundwater investigations. Fact sheet describing progress made on site investigations. Fact Sheet describing progress made on site investigations. Fact Sheet provides project update and announces a community meeting on June 23. Fact Sheet describes progress made on cleanup over the past year. Fact Sheet describes progress made on cleanup over the past year. Fact Sheet describes progress made on cleanup over the past year. Annual Performance Review Summary Fact sheet announces the start of a public comment period for the draft remedial action plan and a public meeting on February 3. KMnO4 injection completed. Report approved w/ changes and modifications. Fact Sheet Fact Sheet describes progress made on cleanup Fact Sheet Amendment to Order (HSA 89/90-012) issued. Certification of completion of all remedial actions. Operation and maintenance of implemented remedy required. Initial Study and Negative Declaration approved. I/SE Oder and RAO issued to Watkins-Johnson Company and Leland Stanford Jr. University. RAP consisting of groundwater extraction and treatment approved. Completed all remedial actions. On-going groundwater extraction and treatment will continue on a site-wide basis. Remedial design consisting of installation and operation of two separate groundwater extraction systems at Buildings 5 and 6 approved. Interim Remedial Measures completed for Building 6 Area. Interim Remedial

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Amount (Lbs): MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
2779

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 602

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Amount (Lbs): 4

Waste code: D004
Waste name: ARSENIC
Amount (Lbs): 2859

Waste code: D008
Waste name: LEAD
Amount (Lbs): 138

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Amount (Lbs): 10000

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Amount (Lbs): 10000

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT

Event date:	04/30/1994
Event:	Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.
Event date:	07/27/1994
Event:	Stabilization Measures Evaluation, This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.
Event date:	07/27/1994
Event:	CA Prioritization, Facility or area was assigned a medium corrective action priority.

Other Pertinent Environmental Activity Identified at Site

California - Hazardous Waste Tracking System - Datamart

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

NJ-NJEMS (New Jersey - New Jersey Environmental Management System). The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The

CA BOND EXP. PLAN:

Responsible Party:	RWQCB REFERRAL SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	Hewlett Packard, the responsible party, has assumed responsibility for cleanup activities under the direction of the RWQCB. The RWQCB will continue to have lead responsibility for monitoring Hewlett Packard's progress under an existing South Bay Enforcement Agreement between the RWQCB, EPA and DHS. The RWQCB is conducting the work with support from the EPA through a Cooperative Agreement. Until such time as the RWQCB refers the site for follow-up using Bond funds, no money will be budgeted from the fund for this site. The DHS regional facilities permitting unit is maintaining liaison with RWQCB and EPA.
Site Description:	Two divisions of this corporation share the facility's 50 acre site: Stanford Park Division, principally a plating and chemical millings shop, and the Hewlett-Packard Laboratories, a research and development branch for microelectronic components. The surrounding land use is both industrial and commercial. Several underground storage tanks existed at the site from 1965 to 1983. These tanks stored chemical products and wastes.
Hazardous Waste Desc:	In 1981 Chlorinated and aromatic solvents were discovered in soil and ground water. The following chemicals have been detected in soil and ground water: Freon, benzene, toluene, dichloroethane (DCA), trichloroethylene (TCE), ethylbenzene, methylcyclohexane and methylene chloride.
Threat To Public Health & Env:	About 56,000 people live within a 3 mile radius of the facility and depend on ground water as a standby source of drinking water. To date, no contamination of nearby wells has been detected. The closest well to the site is the Matadero well located near the southeast corner of Matadero Creek and Whitsell Street, a distance of 4,530 feet from contaminated monitoring wells.
Site Activity Status:	As an initial remedial measure, leaking tanks and contaminated soil have been removed.

 Primary Waste: Contaminated Ground Water
 Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive,
 ignitable or reactive substances and must be managed according to
 applicable DOHS standards.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The POTW Does not have an approved pretreatment program. Some POTWs
 may have local pretreatment programs that have not been approved by
 the regional board and/or EPA.
 Treat To Water: Moderate Threat to Water Quality. A violation could have a major
 adverse impact on receiving biota, can cause aesthetic impairment to a
 significant human population, or render unusable a potential domestic
 or municipal water supply. Awsthetic impairment would include nuisance
 from a waste treatment facility.
 Complexity: Category B - Any facility having a physical, chemical, or biological
 waste treatment system (except for septic systems with subsurface

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/02/2007	Source: EPA
Date Data Arrived at EDR: 12/03/2007	Telephone: N/A
Date Made Active in Reports: 12/28/2007	Last EDR Contact: 07/31/2007
Number of Days to Update: 25	Next Scheduled EDR Contact: 10/29/2007
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/02/2007	Source: EPA
Date Data Arrived at EDR: 12/03/2007	Telephone: N/A
Date Made Active in Reports: 12/28/2007	Last EDR Contact: 08/31/2007
Number of Days to Update: 25	Next Scheduled EDR Contact: 10/29/2007
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 11/15/2007
Number of Days to Update: 56	Next Scheduled EDR Contact: 02/18/2008
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007	Source: EPA
Date Data Arrived at EDR: 06/20/2007	Telephone: 703-412-9810
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 12/06/2007
Number of Days to Update: 70	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007	Source: EPA
Date Data Arrived at EDR: 07/23/2007	Telephone: 703-412-9810
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 12/06/2007
Number of Days to Update: 37	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 08/08/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/03/2007	Telephone: 202-564-6023

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/18/2007	Source: EPA
Date Data Arrived at EDR: 12/03/2007	Telephone: 800-424-9346
Date Made Active in Reports: 12/28/2007	Last EDR Contact: 12/03/2007
Number of Days to Update: 25	Next Scheduled EDR Contact: 03/03/2008
	Data Release Frequency: Quarterly

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Date Data Arrived at EDR: 12/03/2007

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/11/2007
Date Data Arrived at EDR: 12/03/2007

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Date Data Arrived at EDR: 12/03/2007
Date Made Active in Reports: 12/28/2007
Number of Days to Update: 25

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 10/02/2007	Source: Department of Toxic Substances Control

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

US 101 AUXILIARY LANE PROJECT
CORRIDOR STUDY OF 101 FROM PALO ALTO TO MOUNTAIN V
SANTA CLARA COUNTY, CA 94043

TARGET PROPERTY COORDINATES

Latitude (North):	37.43000 - 37° 25' 48.0"
Longitude (West):	122.1 - 122° 5' 60.0"
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	579628.1
UTM Y (Meters):	4142751.2
Elevation:	9 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	37122-D1 MOUNTAIN VIEW, CA
Most Recent Revision:	1999

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles SSE
Site Name:	Sierra Vista Properties
Site EPA ID Number:	CAD982400285
Surficial Aquifer Flow Dir.:	NOT AVAILABLE.
Measured Depth to Water:	12 feet.
Hydraulic Connection:	The surficial aquifer is confined and separated from the lower aquifer by an aquitard. However, the surficial and lower aquifers are interconnected within 1 mile southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: REYES

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0.20 Min: 0.06	Max: 6.50 Min: 3.60
2	14 inches	63 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0.20 Min: 0.06	Max: 6.00 Min: 3.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: mucky - clay
silty clay loam
loam
clay loam
silt loam

Surficial Soil Types: mucky - clay
silty clay loam
loam
clay loam
silt loam

Shallow Soil Types: clay

Deeper Soil Types: mucky - clay
cobble - clay loam
clay loam
stratified
silty clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. Page 5

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. SECTION 1: FACILITY SUMMARY

FACILITY	FACILITY 1
AREA	SAN ANTONIO ROAD AND OFF OF HGWY 101 OFF O SAN ANTONIO ROAD AND OFF OF HGWY 101 OFF O PALO ALTO, CA EDR ID #90165743
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSD)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	YES - p4
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in a county/local unique database (LOCAL)	NO
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
TOTAL (YES)	1

SECTION 2: FACILITY DETAIL REPORTS

WASTE MANAGEMENT

Facility has reported emergency releases to the soil

EPA notified:	False
Initial report:	True
Updated report:	True
Spill cause:	Not reported
Spilled material:	UNKNOWN MATERIAL
Spill total qty:	0.00 UNK
In water:	0.00 UNK
DOT #:	Not reported
CAS:	Not reported
Quantity (lbs):	0.00
Description:	CALLER SMELLED TOXIC FUMES WHILE PASSING BY A BUILDING BEING TORN DOWN
Action:	NONE
Comments:	CALLER RELATES SMELL TO CARBURATOR CLEANER AND BELIEVES GROUND MAY BE CONTAMINATED.

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-LQG: RCRA - Large Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-SQG: RCRA - Small Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-NonGen: RCRA - Non Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

BRS: Biennial Reporting System

Source: EPA/NTIS
Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005
Database Release Frequency: Biennially

Date of Last EDR Contact: 12/13/2007
Date of Next Scheduled Update: 03/10/2008

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

CORRACTS: Corrective Action Report

Source: EPA
Telephone: 800-424-9346

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/18/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

PADS: PCB Activity Database System

Source: EPA
Telephone: 202-566-0500

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 04/12/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 08/09/2007
Date of Next Scheduled Update: 11/05/2007

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission
Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/04/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008
Date of Next Scheduled Update: 03/31/2008

CA AST: Aboveground Petroleum Storage Tank Facilities

Source: State Water Resources Control Board
Telephone: 916-341-5712

Registered Aboveground Storage Tanks.

Date of Government Version: 09/17/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 11/13/2007
Date of Next Scheduled Update: 01/28/2008

CA UST: Active UST Facilities

Source: SWRCB
Telephone: 866-480-1028

Active UST facilities gathered from the local regulatory agencies

Date of Government Version: 10/10/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CA LUST: Geotracker's Leaking Underground Fuel Tank Report

Source: State Water Resources Control Board

Telephone: Not reported

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state. For more information on a particular leaking underground storage tank sites, please contact the appropriate regulatory agency.

Date of Government Version: 10/10/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/09/2008

Date of Next Scheduled Update: 04/07/2008

ERNS: Emergency Response Notification System

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2006

Database Release Frequency: Annually

Date of Last EDR Contact: 01/23/2008

Date of Next Scheduled Update: 04/21/2008

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4555

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 10/01/2007

Database Release Frequency: Annually

Date of Last EDR Contact: 01/17/2008

Date of Next Scheduled Update: 04/14/2008

WASTE DISPOSAL

NPL: National Priority List

Source: EPA

Telephone: Not reported

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/02/2007

Date Made Active at EDR: 12/28/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007

Elapsed ASTM Days: 25

Date of Last EDR Contact: 07/31/2007

Proposed NPL: Proposed National Priority List Sites

Source: EPA

Telephone: Not reported

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/02/2007

Date Made Active at EDR: 12/28/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007

Elapsed ASTM Days: 25

Date of Last EDR Contact: 08/31/2007

DELISTED NPL: National Priority List Deletions

Source: EPA

Telephone: Not reported

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/02/2007

Date Made Active at EDR: 12/28/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007

Elapsed ASTM Days: 25

Date of Last EDR Contact: 08/29/2007

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-412-9810

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007

Date Made Active at EDR: 08/29/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 06/20/2007

Elapsed ASTM Days: 70

Date of Last EDR Contact: 12/06/2007

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-412-9810

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/17/2008

ROD: Records Of Decision

Source: EPA

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 11/28/2007

Database Release Frequency: Annually

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 202-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Date Made Active at EDR: 03/30/1994

Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 02/02/1994

Elapsed ASTM Days: 56

Date of Last EDR Contact: 11/15/2007

CA SWF/LF (SWIS): Solid Waste Information System

Source: Integrated Waste Management Board

Telephone: 916-341-6320

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/10/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/13/2007

Date of Next Scheduled Update: 03/10/2008

MULTIMEDIA

TRIS: Toxic Chemical Release Inventory System

Source: EPA

Telephone: 202-566-0250

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2005

Database Release Frequency: Annually

Date of Last EDR Contact: 12/18/2007

Date of Next Scheduled Update: 03/17/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

SSTS: Section 7 Tracking Systems

Source: EPA

Telephone: 202-564-4203

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2005

Database Release Frequency: Annually

Date of Last EDR Contact: 01/15/2008

Date of Next Scheduled Update: 04/14/2008

TSCA: Toxic Substances Control Act

Source: EPA

Telephone: 202-260-5521

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002

Database Release Frequency: N/A

Date of Last EDR Contact: 01/15/2008

Date of Next Scheduled Update: 04/14/2008

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

Source: EPA/Office of Prevention, Pesticides and Toxic Substances

Telephone: 202-566-1667

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/12/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/17/2007

Date of Next Scheduled Update: 03/17/2008

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

Source: EPA

Telephone: 202-566-1667

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 10/12/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/17/2007

Date of Next Scheduled Update: 03/17/2008

FINDS: Facility Index System/Facility Registry System

Source: EPA

Telephone: Not reported

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/18/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

RMP: Risk Management Plans

Source: Environmental Protection Agency

Telephone: 202-564-8600

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/01/2007

Database Release Frequency: Varies

Date of Last EDR Contact: 11/15/2007

Date of Next Scheduled Update: 02/18/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

Date of Next Scheduled Update: 03/31/2008

INDIAN LUST R1: Leaking Underground Storage Tanks on Indian Land

Source: EPA Region 1
Telephone: 617-918-1313
A listing of leaking underground storage tank locations on Indian Land.

Date of Government Version: 12/01/2006
Database Release Frequency: Varies

Date of Last EDR Contact: 11/15/2007
Date of Next Scheduled Update: 02/18/2008

RADINFO: Radiation Information Database

Source: Environmental Protection Agency
Telephone: 202-343-9775
The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 10/30/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 10/31/2007
Date of Next Scheduled Update: 01/28/2008

LUCIS: Land Use Control Information System

Source: Department of the Navy
Telephone: 843-820-7326
LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005
Database Release Frequency: Varies

Date of Last EDR Contact: 12/10/2007
Date of Next Scheduled Update: 03/10/2008

CDL: Clandestine Drug Labs

Source: Drug Enforcement Administration
Telephone: 202-307-1000
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

CA HIST CAL-SITES: Historical Calsites Database

Source: Department of Toxic Substance Control
Telephone: 916-323-3400

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 11/26/2007
Date of Next Scheduled Update: 02/25/2008

CA CA BOND EXP. PLAN: Bond Expenditure Plan

Source: Department of Health Services
Telephone: 916-255-2118

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 05/31/1994
Date of Next Scheduled Update: Not reported

CA SCH: School Property Evaluation Program

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 08/28/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 11/28/2007
Date of Next Scheduled Update: 02/25/2008

CA TOXIC PITS: Toxic Pits Cleanup Act Sites

Source: State Water Resources Control Board
Telephone: 916-227-4364

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 10/26/2007
Date of Next Scheduled Update: 01/28/2008

CA CA WDS: Waste Discharge System

Source: State Water Resources Control Board
Telephone: 916-341-5227

Sites which have been issued waste discharge requirements.

Date of Government Version: 06/19/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/17/2007
Date of Next Scheduled Update: 03/17/2008

CA WMUDS/SWAT: Waste Management Unit Database

Source: State Water Resources Control Board
Telephone: 916-227-4448

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

CA SWRCY: Recycler Database

Source: Department of Conservation
Telephone: 916-323-3836
A listing of recycling facilities in California.

Date of Government Version: 10/09/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

CA CA FID UST: Facility Inventory Database

Source: California Environmental Protection Agency
Telephone: 916-341-5851
The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/28/1998
Date of Next Scheduled Update: Not reported

CA SLIC: Statewide SLIC Cases

Source: State Water Resources Control Board
Telephone: 866-480-1028
The SLIC (Spills, Leaks, Investigations and Cleanup) program is designed to protect and restore water quality from spills, leaks, and similar discharges.

Date of Government Version: 10/10/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

CA Sacramento Co. CS: CS - Contaminated Sites

Source: Sacramento County Environmental Management
Telephone: 916-875-8406
List of sites where unauthorized releases of potentially hazardous materials have occurred.

Date of Government Version: 10/29/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 10/26/2007
Date of Next Scheduled Update: 01/28/2008

CA CS: Contaminated Sites

Source: Alameda County Environmental Health Services
Telephone: 510-567-6700
A listing of contaminated sites overseen by the Toxic Release Program (oil and groundwater contamination from chemical releases and spills) and the Leaking Underground Storage Tank Program (soil and ground water contamination from leaking petroleum USTs).

Date of Government Version: 10/22/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/21/2008
Date of Next Scheduled Update: 04/21/2008

CA HIST LUST SANTA CLARA: Fuel Leak Site Activity Report

Source: Santa Clara Valley Water District
Telephone: 408-265-2600
A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

Date of Government Version: 03/29/2005
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/26/2007
Date of Next Scheduled Update: 03/24/2008

CA AOCONCERN: San Gabriel Valley Areas of Concern

Source: EPA Region 9
Telephone: 415-972-3178
San Gabriel Valley areas where VOC contamination is at or above the MCL as designated by region 9 EPA office.

Date of Government Version: 12/31/1998
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 04/14/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

CA HIST UST: Hazardous Substance Storage Container Database

Source: State Water Resources Control Board
Telephone: 916-341-5851

The Hazardous Substance Storage Container Database is a historical listing of UST sites.
Refer to local/county source for current data.

Date of Government Version: 10/15/1990
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 07/26/2001
Date of Next Scheduled Update: Not reported

CA LIENS: Environmental Liens Listing

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 08/27/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 11/05/2007
Date of Next Scheduled Update: 02/04/2008

CA PLACER CO. MS: Master List of Facilities

Source: Placer County Health and Human Services
Telephone: 530-889-7312

List includes aboveground tanks, underground tanks and cleanup sites.

Date of Government Version: 07/23/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 12/17/2007
Date of Next Scheduled Update: 03/17/2008

CA Fresno Co. CUPA: CUPA Resources List

Source: Dept. of Community Health
Telephone: 559-445-3271

Certified Unified Program Agency. CUPA's are responsible for implementing a unified hazardous materials and hazardous waste management regulatory program. The agency provides oversight of businesses that deal with hazardous materials, operate underground storage tanks or aboveground storage tanks.

Date of Government Version: 10/09/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 02/04/2008

CA CONTRA COSTA CO. SITE LIST: Site List

Source: Contra Costa Health Services Department
Telephone: 925-646-2286

List includes sites from the underground tank, hazardous waste generator and business plan/2185 programs.

Date of Government Version: 09/11/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 11/26/2007
Date of Next Scheduled Update: 02/25/2008

CA SAN JOSE HAZMAT: Hazardous Material Facilities

Source: City of San Jose Fire Department
Telephone: 408-277-4659

Hazardous material facilities, including underground storage tank sites.

Date of Government Version: 09/17/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 12/17/2007
Date of Next Scheduled Update: 03/03/2008

CA SWEEPS UST: SWEEPS UST Listing

Source: State Water Resources Control Board
Telephone: Not reported

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1980's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 06/03/2005

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/03/2008

CA DEED: Deed Restriction Listing

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 10/02/2007

Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/04/2008

Date of Next Scheduled Update: 03/31/2008

CA VCP: Voluntary Cleanup Program Properties

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 08/28/2007

Database Release Frequency: Quarterly

CA HAZNET: Facility and Manifest Data

Source: California Environmental Protection Agency
Telephone: 916-255-1136

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

CA ENVIROSTOR: EnviroStor Database

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. Page 7

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 1: FACILITY SUMMARY

FACILITY	FACILITY 1 988 SAN ANTONIO RD 988 SAN ANTONIO RD LOS ALTOS, CA EDR ID #2005610018
AREA	
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSD)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	YES - p4
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in a county/local unique database (LOCAL)	NO
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
TOTAL (YES)	1

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-LQG: RCRA - Large Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-SQG: RCRA - Small Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-NonGen: RCRA - Non Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

BRS: Biennial Reporting System

Source: EPA/NTIS
Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005
Database Release Frequency: Biennially

Date of Last EDR Contact: 12/13/2007
Date of Next Scheduled Update: 03/10/2008

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

CORRACTS: Corrective Action Report

Source: EPA
Telephone: 800-424-9346

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/18/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

PADS: PCB Activity Database System

Source: EPA
Telephone: 202-566-0500

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 04/12/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 08/09/2007
Date of Next Scheduled Update: 11/05/2007

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission
Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/04/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008
Date of Next Scheduled Update: 03/31/2008

CA AST: Aboveground Petroleum Storage Tank Facilities

Source: State Water Resources Control Board
Telephone: 916-341-5712

Registered Aboveground Storage Tanks.

Date of Government Version: 09/17/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/28/2008
Date of Next Scheduled Update: 04/28/2008

CA UST: Active UST Facilities

Source: SWRCB
Telephone: 866-480-1028

Active UST facilities gathered from the local regulatory agencies

Date of Government Version: 10/10/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CA LUST: Geotracker's Leaking Underground Fuel Tank Report

Source: State Water Resources Control Board

Telephone: Not reported

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state. For more information on a particular leaking underground storage tank sites, please contact the appropriate regulatory agency.

Date of Government Version: 10/10/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

ERNS: Emergency Response Notification System

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2006
Database Release Frequency: Annually

Date of Last EDR Contact: 01/23/2008
Date of Next Scheduled Update: 04/21/2008

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4555

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 10/01/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 04/14/2008

WASTE DISPOSAL

NPL: National Priority List

Source: EPA

Telephone: Not reported

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 07/31/2007

Proposed NPL: Proposed National Priority List Sites

Source: EPA

Telephone: Not reported

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 08/31/2007

DELISTED NPL: National Priority List Deletions

Source: EPA

Telephone: Not reported

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 08/29/2007

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-412-9810

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007

Date Made Active at EDR: 08/29/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 06/20/2007

Elapsed ASTM Days: 70

Date of Last EDR Contact: 12/06/2007

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-412-9810

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/17/2008

ROD: Records Of Decision

Source: EPA

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 11/28/2007

Database Release Frequency: Annually

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 202-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Date Made Active at EDR: 03/30/1994

Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 02/02/1994

Elapsed ASTM Days: 56

Date of Last EDR Contact: 11/15/2007

CA SWF/LF (SWIS): Solid Waste Information System

Source: Integrated Waste Management Board

Telephone: 916-341-6320

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/10/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/13/2007

Date of Next Scheduled Update: 03/10/2008

MULTIMEDIA

TRIS: Toxic Chemical Release Inventory System

Source: EPA

Telephone: 202-566-0250

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2005

Database Release Frequency: Annually

Date of Last EDR Contact: 12/18/2007

Date of Next Scheduled Update: 03/17/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

SSTS: Section 7 Tracking Systems

Source: EPA

Telephone: 202-564-4203

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2005

Database Release Frequency: Annually

Date of Last EDR Contact: 01/15/2008

Date of Next Scheduled Update: 04/14/2008

TSCA: Toxic Substances Control Act

Source: EPA

Telephone: 202-260-5521

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002

Database Release Frequency: N/A

Date of Last EDR Contact: 01/15/2008

Date of Next Scheduled Update: 04/14/2008

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

Source: EPA/Office of Prevention, Pesticides and Toxic Substances

Telephone: 202-566-1667

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/12/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/17/2007

Date of Next Scheduled Update: 03/17/2008

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

Source: EPA

Telephone: 202-566-1667

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 10/12/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/17/2007

Date of Next Scheduled Update: 03/17/2008

FINDS: Facility Index System/Facility Registry System

Source: EPA

Telephone: Not reported

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/18/2007

Database Release Frequency: Quarterly

Date of Next Scheduled Update: 03/31/2008

RMP: Risk Management Plans

Source: Environmental Protection Agency

Telephone: 202-564-8600

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/01/2007

CA TOXIC PITS: Toxic Pits Cleanup Act Sites

Source: State Water Resources Control Board
Telephone: 916-227-4364

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 01/28/2008
Date of Next Scheduled Update: 04/28/2008

CA CA WDS: Waste Discharge System

Source: State Water Resources Control Board
Telephone: 916-341-5227

Sites which have been issued waste discharge requirements.

Date of Government Version: 06/19/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/17/2007
Date of Next Scheduled Update: 03/17/2008

CA WMUDS/SWAT: Waste Management Unit Database

Source: State Water Resources Control Board
Telephone: 916-227-4448

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

CA SWRCY: Recycler Database

Source: Department of Conservation
Telephone: 916-323-3836
A listing of recycling facilities in California.

Date of Government Version: 10/09/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

CA CA FID UST: Facility Inventory Database

Source: California Environmental Protection Agency
Telephone: 916-341-5851
The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/28/1998
Date of Next Scheduled Update: Not reported

CA SLIC: Statewide SLIC Cases

Source: State Water Resources Control Board
Telephone: 866-480-1028
The SLIC (Spills, Leaks, Investigations and Cleanup) program is designed to protect and restore water quality from spills, leaks, and similar discharges.

Date of Government Version: 10/10/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

CA Sacramento Co. CS: CS - Contaminated Sites

Source: Sacramento County Environmental Management
Telephone: 916-875-8406
List of sites where unauthorized releases of potentially hazardous materials have occurred.

Date of Government Version: 10/29/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/28/2008
Date of Next Scheduled Update: 04/28/2008

CA CS: Contaminated Sites

Source: Alameda County Environmental Health Services
Telephone: 510-567-6700
A listing of contaminated sites overseen by the Toxic Release Program (oil and groundwater contamination from chemical releases and spills) and the Leaking Underground Storage Tank Program (soil and ground water contamination from leaking petroleum USTs).

Date of Government Version: 10/22/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/21/2008
Date of Next Scheduled Update: 04/21/2008

CA HIST LUST SANTA CLARA: Fuel Leak Site Activity Report

Source: Santa Clara Valley Water District
Telephone: 408-265-2600
A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

Date of Government Version: 03/29/2005
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/26/2007
Date of Next Scheduled Update: 03/24/2008

CA AOCONCERN: San Gabriel Valley Areas of Concern

Source: EPA Region 9
Telephone: 415-972-3178
San Gabriel Valley areas where VOC contamination is at or above the MCL as designated by region 9 EPA office.

Date of Government Version: 12/31/1998
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 04/14/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

CA HIST UST: Hazardous Substance Storage Container Database

Source: State Water Resources Control Board
Telephone: 916-341-5851

The Hazardous Substance Storage Container Database is a historical listing of UST sites.
Refer to local/county source for current data.

Date of Government Version: 10/15/1990
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 07/26/2001
Date of Next Scheduled Update: Not reported

CA LIENS: Environmental Liens Listing

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 08/27/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 11/05/2007
Date of Next Scheduled Update: 02/04/2008

CA PLACER CO. MS: Master List of Facilities

Source: Placer County Health and Human Services
Telephone: 530-889-7312

List includes aboveground tanks, underground tanks and cleanup sites.

Date of Government Version: 07/23/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 12/17/2007
Date of Next Scheduled Update: 03/17/2008

CA Fresno Co. CUPA: CUPA Resources List

Source: Dept. of Community Health
Telephone: 559-445-3271

Certified Unified Program Agency. CUPA's are responsible for implementing a unified hazardous materials and hazardous waste management regulatory program. The agency provides oversight of businesses that deal with hazardous materials, operate underground storage tanks or aboveground storage tanks.

Date of Government Version: 10/09/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 02/04/2008

CA CONTRA COSTA CO. SITE LIST: Site List

Source: Contra Costa Health Services Department
Telephone: 925-646-2286

List includes sites from the underground tank, hazardous waste generator and business plan/2185 programs.

Date of Government Version: 09/11/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 11/26/2007
Date of Next Scheduled Update: 02/25/2008

CA SAN JOSE HAZMAT: Hazardous Material Facilities

Source: City of San Jose Fire Department
Telephone: 408-277-4659

Hazardous material facilities, including underground storage tank sites.

Date of Government Version: 09/17/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 12/17/2007
Date of Next Scheduled Update: 03/03/2008

CA SWEEPS UST: SWEEPS UST Listing

Source: State Water Resources Control Board
Telephone: Not reported

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1980's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 06/03/2005
Date of Next Scheduled Update: Not reported

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

CA CHMIRS: California Hazardous Material Incident Report System

Source: Office of Emergency Services

Telephone: 916-845-8400

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 12/31/2005

Database Release Frequency: Varies

Date of Last EDR Contact: 11/15/2007

Date of Next Scheduled Update: 02/18/2008

CA NOTIFY 65: Proposition 65 Records

Source: State Water Resources Control Board

Telephone: 916-445-3846

Proposition 65 Notification Records. NOTIFY 65 contains facility notifications about any release which could impact drinking water and thereby expose the public to a potential health risk.

Date of Government Version: 10/21/1993

Database Release Frequency: No Update Planned

Date of Last EDR Contact: 01/15/2008

Date of Next Scheduled Update: 04/14/2008

CA LA Co. Site Mitigation: Site Mitigation List

Source: Community Health Services

Telephone: 323-890-7806

Industrial sites that have had some sort of spill or complaint.

Date of Government Version: 05/30/2007

Database Release Frequency: Annually

Date of Last EDR Contact: 11/13/2007

Date of Next Scheduled Update: 02/11/2008

CA Orange Co. Industrial Site: List of Industrial Site Cleanups

Source: Health Care Agency

Telephone: 714-834-3446

Petroleum and non-petroleum spills.

Date of Government Version: 08/01/2007

Database Release Frequency: Annually

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/03/2008

CA DEED: Deed Restriction Listing

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 10/02/2007

Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/04/2008

Date of Next Scheduled Update: 03/31/2008

CA VCP: Voluntary Cleanup Program Properties

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 08/28/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 11/28/2007

Date of Next Scheduled Update: 02/25/2008

Date of Last EDR Contact: 01/02/2008
Date of Next Scheduled Update: 03/31/2008

CA LOS ANGELES CO. HMS: HMS: Street Number List

Source: Department of Public Works
Telephone: 626-458-3517
Industrial Waste and Underground Storage Tank Sites.

Date of Government Version: 07/11/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 11/13/2007
Date of Next Scheduled Update: 02/11/2008

CA WIP: Well Investigation Program Case List

Source: Los Angeles Water Quality Control Board
Telephone: 213-576-6726

Well Investigation Program case in the San Gabriel and San Fernando Valley area.

Date of Government Version: 09/30/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 01/23/2008
Date of Next Scheduled Update: 04/21/2008

CA VENTURA CO. BWT: Business Plan, Hazardous Waste Producers, and Operating Underground Tanks

Source: Ventura County Environmental Health Division
Telephone: 805-654-2813

The BWT list indicates by site address whether the Environmental Health Division has Business Plan (B), Waste Producer (W), and/or Underground Tank (T) information.

Date of Government Version: 08/24/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/13/2007
Date of Next Scheduled Update: 03/10/2008

CA CDL: Clandestine Drug Labs

Source: Department of Toxic Substances Control
Telephone: 916-255-6504

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 09/30/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 01/21/2008
Date of Next Scheduled Update: 04/21/2008

CA SAN DIEGO CO. HMMD: Hazardous Materials Management Division Database

Source: Hazardous Materials Management Division
Telephone: 619-338-2268

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 05/16/2005
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/04/2008
Date of Next Scheduled Update: 03/31/2008

Date of Last EDR Contact: 10/09/2007
Date of Next Scheduled Update: 01/07/2008

CA RESPONSE: State Response Sites

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 08/28/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 11/28/2007
Date of Next Scheduled Update: 02/25/2008

CA HAZNET: Facility and Manifest Data

Source: California Environmental Protection Agency
Telephone: 916-255-1136

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

CA ENVIROSTOR: EnviroStor Database

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. Page 5

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-LQG: RCRA - Large Quantity Generators

Source: Environmental Protection Agency

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-SQG: RCRA - Small Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-NonGen: RCRA - Non Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

BRS: Biennial Reporting System

Source: EPA/NTIS
Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005
Database Release Frequency: Biennially

Date of Last EDR Contact: 12/13/2007
Date of Next Scheduled Update: 03/10/2008

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

CORRACTS: Corrective Action Report

Source: EPA
Telephone: 800-424-9346

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/18/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

PADS: PCB Activity Database System

Source: EPA
Telephone: 202-566-0500

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 04/12/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 08/09/2007
Date of Next Scheduled Update: 11/05/2007

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission
Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/04/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008
Date of Next Scheduled Update: 03/31/2008

CA AST: Aboveground Petroleum Storage Tank Facilities

Source: State Water Resources Control Board
Telephone: 916-341-5712

Registered Aboveground Storage Tanks.

Date of Government Version: 09/17/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/28/2008
Date of Next Scheduled Update: 04/28/2008

CA UST: Active UST Facilities

Source: SWRCB
Telephone: 866-480-1028

Active UST facilities gathered from the local regulatory agencies

Date of Government Version: 10/10/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CA LUST: Geotracker's Leaking Underground Fuel Tank Report

Source: State Water Resources Control Board

Telephone: Not reported

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state. For more information on a particular leaking underground storage tank sites, please contact the appropriate regulatory agency.

Date of Government Version: 10/10/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

ERNS: Emergency Response Notification System

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2006
Database Release Frequency: Annually

Date of Last EDR Contact: 01/23/2008
Date of Next Scheduled Update: 04/21/2008

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4555

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 10/01/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 04/14/2008

WASTE DISPOSAL

NPL: National Priority List

Source: EPA

Telephone: Not reported

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 01/28/2008

Proposed NPL: Proposed National Priority List Sites

Source: EPA

Telephone: Not reported

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 01/28/2008

DELISTED NPL: National Priority List Deletions

Source: EPA

Telephone: Not reported

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007

Date of Last EDR Contact: 01/28/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-412-9810

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007

Date Made Active at EDR: 08/29/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 06/20/2007

Elapsed ASTM Days: 70

Date of Last EDR Contact: 12/06/2007

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-412-9810

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/17/2008

ROD: Records Of Decision

Source: EPA

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 11/28/2007

Database Release Frequency: Annually

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 202-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Date Made Active at EDR: 03/30/1994

Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 02/02/1994

Elapsed ASTM Days: 56

Date of Last EDR Contact: 11/15/2007

CA SWF/LF (SWIS): Solid Waste Information System

Source: Integrated Waste Management Board

Telephone: 916-341-6320

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/10/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/13/2007

Date of Next Scheduled Update: 03/10/2008

MULTIMEDIA

TRIS: Toxic Chemical Release Inventory System

Source: EPA

Telephone: 202-566-0250

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2005

Database Release Frequency: Annually

Date of Last EDR Contact: 12/18/2007

Date of Next Scheduled Update: 03/17/2008

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

RMP: Risk Management Plans

Source: Environmental Protection Agency

Telephone: 202-564-8600

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

CA LIENS: Environmental Liens Listing

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 08/27/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 11/05/2007
Date of Next Scheduled Update: 02/04/2008

CA PLACER CO. MS: Master List of Facilities

Source: Placer County Health and Human Services
Telephone: 530-889-7312

List includes aboveground tanks, underground tanks and cleanup sites.

Date of Government Version: 07/23/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 12/17/2007
Date of Next Scheduled Update: 03/17/2008

CA Fresno Co. CUPA: CUPA Resources List

Source: Dept. of Community Health
Telephone: 559-445-3271

Certified Unified Program Agency. CUPA's are responsible for implementing a unified hazardous materials and hazardous waste management regulatory program. The agency provides oversight of businesses that deal with hazardous materials, operate underground storage tanks or aboveground storage tanks.

Date of Government Version: 10/09/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 02/04/2008

CA CONTRA COSTA CO. SITE LIST: Site List

Source: Contra Costa Health Services Department
Telephone: 925-646-2286

List includes sites from the underground tank, hazardous waste generator and business plan/2185 programs.

Date of Government Version: 09/11/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 11/26/2007
Date of Next Scheduled Update: 02/25/2008

CA SAN JOSE HAZMAT: Hazardous Material Facilities

Source: City of San Jose Fire Department
Telephone: 408-277-4659

Hazardous material facilities, including underground storage tank sites.

Date of Government Version: 09/17/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 12/17/2007
Date of Next Scheduled Update: 03/03/2008

CA SWEEPS UST: SWEEPS UST Listing

Source: State Water Resources Control Board
Telephone: Not reported

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1980's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994

Database Release Frequency: Annually

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/03/2008

CA DEED: Deed Restriction Listing

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 10/02/2007

Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/04/2008

Date of Next Scheduled Update: 03/31/2008

CA VCP: Voluntary Cleanup Program Properties

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 08/28/2007

Database Release Frequency: Quarterly

CA HAZNET: Facility and Manifest Data

Source: California Environmental Protection Agency
Telephone: 916-255-1136

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Next Scheduled Update: 03/10/2008

CA ENVIROSTOR: EnviroStor Database

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 08/28/2007

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. Page 6

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.

SECTION 1: FACILITY SUMMARY

FACILITY	FACILITY 1
AREA	1951 COLONY RD MOUNTAIN VIEW, CA EDR ID #97060138
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSD)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	NO
Facility has reported hazardous material incidents to DOT (HMIRS)	YES - p4
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in a county/local unique database (LOCAL)	NO
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
TOTAL (YES)	1

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-LQG: RCRA - Large Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-SQG: RCRA - Small Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-NonGen: RCRA - Non Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995
Database Release Frequency: No Update Planned

WASTE DISPOSAL

NPL: National Priority List

Source: EPA

Telephone: Not reported

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 01/28/2008

Proposed NPL: Proposed National Priority List Sites

Source: EPA

Telephone: Not reported

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 01/28/2008

DELISTED NPL: National Priority List Deletions

Source: EPA

Telephone: Not reported

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-412-9810

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007

Date Made Active at EDR: 08/29/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 06/20/2007

Elapsed ASTM Days: 70

Date of Last EDR Contact: 12/06/2007

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-412-9810

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/17/2008

ROD: Records Of Decision

Source: EPA

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 11/28/2007

Database Release Frequency: Annually

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 202-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Date Made Active at EDR: 03/30/1994

Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 02/02/1994

Elapsed ASTM Days: 56

Date of Last EDR Contact: 11/15/2007

CA SWF/LF (SWIS): Solid Waste Information System

Source: Integrated Waste Management Board

Telephone: 916-341-6320

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

RMP: Risk Management Plans

Source: Environmental Protection Agency

Telephone: 202-564-8600

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

CA DEED: Deed Restriction Listing

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

CA ENVIROSTOR: EnviroStor Database

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. Page 5

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-LQG: RCRA - Large Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-SQG: RCRA - Small Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-NonGen: RCRA - Non Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2007

Date of Next Scheduled Update: 02/18/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

BRS: Biennial Reporting System

Source: EPA/NTIS
Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005
Database Release Frequency: Biennially

Date of Last EDR Contact: 12/13/2007
Date of Next Scheduled Update: 03/10/2008

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

CORRACTS: Corrective Action Report

Source: EPA
Telephone: 800-424-9346

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/18/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

PADS: PCB Activity Database System

Source: EPA
Telephone: 202-566-0500

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 04/12/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 08/09/2007
Date of Next Scheduled Update: 11/05/2007

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission
Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/04/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-412-9810

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007

Date Made Active at EDR: 08/29/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 06/20/2007

Elapsed ASTM Days: 70

Date of Last EDR Contact: 12/06/2007

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-412-9810

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

RMP: Risk Management Plans

Source: Environmental Protection Agency

Telephone: 202-564-8600

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

CA DEED: Deed Restriction Listing

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Telephone: 619-338-2268

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 05/16/2005
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/04/2008
Date of Next Scheduled Update: 03/31/2008

CA Sacramento Co. ML: ML - Regulatory Compliance Master List

Source: Sacramento County Environmental Management
Telephone: 916-875-8406

Any business that has hazardous materials on site - hazardous material storage sites, underground storage tanks, waste generators.

Date of Last EDR Contact: 10/09/2007
Date of Next Scheduled Update: 01/07/2008

CA RESPONSE: State Response Sites

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 08/28/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 11/28/2007
Date of Next Scheduled Update: 02/25/2008

CA HAZNET: Facility and Manifest Data

Source: California Environmental Protection Agency
Telephone: 916-255-1136

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Government Version: 12/31/2006
Database Release Frequency: Annually

Date of Last EDR Contact: 11/07/2007
Date of Next Scheduled Update: 02/04/2008

CA EMI: Emissions Inventory Data

Source: California Air Resources Board

CA ENVIROSTOR: EnviroStor Database

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. Page 5

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-LQG: RCRA - Large Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-SQG: RCRA - Small Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-NonGen: RCRA - Non Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

BRS: Biennial Reporting System

Source: EPA/NTIS
Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005
Database Release Frequency: Biennially

Date of Last EDR Contact: 12/13/2007
Date of Next Scheduled Update: 03/10/2008

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

CORRACTS: Corrective Action Report

Source: EPA
Telephone: 800-424-9346

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/18/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

PADS: PCB Activity Database System

Source: EPA
Telephone: 202-566-0500

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 04/12/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 08/09/2007
Date of Next Scheduled Update: 11/05/2007

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission
Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/04/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008
Date of Next Scheduled Update: 03/31/2008

CA AST: Aboveground Petroleum Storage Tank Facilities

Source: State Water Resources Control Board
Telephone: 916-341-5712

Registered Aboveground Storage Tanks.

Date of Government Version: 09/17/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/28/2008
Date of Next Scheduled Update: 04/28/2008

CA UST: Active UST Facilities

Source: SWRCB
Telephone: 866-480-1028

Active UST facilities gathered from the local regulatory agencies

Date of Government Version: 10/10/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CA LUST: Geotracker's Leaking Underground Fuel Tank Report

Source: State Water Resources Control Board

Telephone: Not reported

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state. For more information on a particular leaking underground storage tank sites, please contact the appropriate regulatory agency.

Date of Government Version: 10/10/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

ERNS: Emergency Response Notification System

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2006
Database Release Frequency: Annually

Date of Last EDR Contact: 01/23/2008
Date of Next Scheduled Update: 04/21/2008

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4555

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 10/01/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 04/14/2008

WASTE DISPOSAL

NPL: National Priority List

Source: EPA

Telephone: Not reported

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 01/28/2008

Proposed NPL: Proposed National Priority List Sites

Source: EPA

Telephone: Not reported

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 01/28/2008

DELISTED NPL: National Priority List Deletions

Source: EPA

Telephone: Not reported

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 01/28/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-412-9810

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007

Date Made Active at EDR: 08/29/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 06/20/2007

Elapsed ASTM Days: 70

Date of Last EDR Contact: 12/06/2007

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-412-9810

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/17/2008

ROD: Records Of Decision

Source: EPA

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 11/28/2007

Database Release Frequency: Annually

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 202-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Date Made Active at EDR: 03/30/1994

Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 02/02/1994

Elapsed ASTM Days: 56

Date of Last EDR Contact: 11/15/2007

CA SWF/LF (SWIS): Solid Waste Information System

Source: Integrated Waste Management Board

Telephone: 916-341-6320

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/10/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/13/2007

Date of Next Scheduled Update: 03/10/2008

MULTIMEDIA

TRIS: Toxic Chemical Release Inventory System

Source: EPA

Telephone: 202-566-0250

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2005

Database Release Frequency: Annually

Date of Last EDR Contact: 12/18/2007

Date of Next Scheduled Update: 03/17/2008

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/17/2007

Date of Next Scheduled Update: 03/17/2008

FINDS: Facility Index System/Facility Registry System

Source: EPA

Telephone: Not reported

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/18/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

RMP: Risk Management Plans

Source: Environmental Protection Agency

Telephone: 202-564-8600

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

CA DEED: Deed Restriction Listing

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. Page 5

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-LQG: RCRA - Large Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-SQG: RCRA - Small Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-NonGen: RCRA - Non Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

BRS: Biennial Reporting System

Source: EPA/NTIS
Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005
Database Release Frequency: Biennially

Date of Last EDR Contact: 12/13/2007
Date of Next Scheduled Update: 03/10/2008

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

CORRACTS: Corrective Action Report

Source: EPA
Telephone: 800-424-9346

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/18/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

PADS: PCB Activity Database System

Source: EPA
Telephone: 202-566-0500

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 04/12/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 08/09/2007
Date of Next Scheduled Update: 11/05/2007

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission
Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/04/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008
Date of Next Scheduled Update: 03/31/2008

CA AST: Aboveground Petroleum Storage Tank Facilities

Source: State Water Resources Control Board
Telephone: 916-341-5712

Registered Aboveground Storage Tanks.

Date of Government Version: 09/17/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/28/2008
Date of Next Scheduled Update: 04/28/2008

CA UST: Active UST Facilities

Source: SWRCB
Telephone: 866-480-1028

Active UST facilities gathered from the local regulatory agencies

Date of Government Version: 10/10/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CA LUST: Geotracker's Leaking Underground Fuel Tank Report

Source: State Water Resources Control Board

Telephone: Not reported

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state. For more information on a particular leaking underground storage tank sites, please contact the appropriate regulatory agency.

Date of Government Version: 10/10/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

ERNS: Emergency Response Notification System

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2006
Database Release Frequency: Annually

Date of Last EDR Contact: 01/23/2008
Date of Next Scheduled Update: 04/21/2008

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4555

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 10/01/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 04/14/2008

WASTE DISPOSAL

NPL: National Priority List

Source: EPA

Telephone: Not reported

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 01/28/2008

Proposed NPL: Proposed National Priority List Sites

Source: EPA

Telephone: Not reported

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 01/28/2008

DELISTED NPL: National Priority List Deletions

Source: EPA

Telephone: Not reported

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 01/28/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-412-9810

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007

Date Made Active at EDR: 08/29/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 06/20/2007

Elapsed ASTM Days: 70

Date of Last EDR Contact: 12/06/2007

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-412-9810

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/17/2008

ROD: Records Of Decision

Source: EPA

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 11/28/2007

Database Release Frequency: Annually

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 202-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Date Made Active at EDR: 03/30/1994

Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 02/02/1994

Elapsed ASTM Days: 56

Date of Last EDR Contact: 11/15/2007

CA SWF/LF (SWIS): Solid Waste Information System

Source: Integrated Waste Management Board

Telephone: 916-341-6320

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/10/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/13/2007

Date of Next Scheduled Update: 03/10/2008

MULTIMEDIA

TRIS: Toxic Chemical Release Inventory System

Source: EPA

Telephone: 202-566-0250

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2005

Database Release Frequency: Annually

Date of Last EDR Contact: 12/18/2007

Date of Next Scheduled Update: 03/17/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

SSTS: Section 7 Tracking Systems

Source: EPA

Telephone: 202-564-4203

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2005

Database Release Frequency: Annually

Date of Last EDR Contact: 01/28/2008

Date of Next Scheduled Update: 04/14/2008

TSCA: Toxic Substances Control Act

Source: EPA

Telephone: 202-260-5521

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002

Database Release Frequency: N/A

Date of Last EDR Contact: 01/28/2008

Date of Next Scheduled Update: 04/14/2008

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

Source: EPA/Office of Prevention, Pesticides and Toxic Substances

Telephone: 202-566-1667

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/12/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/17/2007

Date of Next Scheduled Update: 03/17/2008

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

Source: EPA

Telephone: 202-566-1667

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 10/12/2007

Date of Last EDR Contact: 12/17/2007

Date of Next Scheduled Update: 03/17/2008

FINDS: Facility Index System/Facility Registry System

Source: EPA

Telephone: Not reported

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/18/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

RMP: Risk Management Plans

Source: Environmental Protection Agency

Telephone: 202-564-8600

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/01/2007

LUCIS: Land Use Control Information System

Source: Department of the Navy

Telephone: 843-820-7326

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005

Database Release Frequency: Varies

Date of Last EDR Contact: 12/10/2007

Date of Next Scheduled Update: 03/10/2008

CDL: Clandestine Drug Labs

Source: Drug Enforcement Administration

Telephone: 202-307-1000

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/01/2007

CA HIST CAL-SITES: Historical Calsites Database

Source: Department of Toxic Substance Control
Telephone: 916-323-3400

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 11/26/2007
Date of Next Scheduled Update: 02/25/2008

CA CA BOND EXP. PLAN: Bond Expenditure Plan

Source: Department of Health Services
Telephone: 916-255-2118

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 05/31/1994
Date of Next Scheduled Update: Not reported

CA SCH: School Property Evaluation Program

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 08/28/2007

CA SWRCY: Recycler Database

Source: Department of Conservation
Telephone: 916-323-3836
A listing of recycling facilities in California.

Date of Government Version: 10/09/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

CA CA FID UST: Facility Inventory Database

Source: California Environmental Protection Agency
Telephone: 916-341-5851
The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/28/1998
Date of Next Scheduled Update: Not reported

CA SLIC: Statewide SLIC Cases

Source: State Water Resources Control Board
Telephone: 866-480-1028
The SLIC (Spills, Leaks, Investigations and Cleanup) program is designed to protect and restore water quality from spills, leaks, and similar discharges.

Date of Government Version: 10/10/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

CA Sacramento Co. CS: CS - Contaminated Sites

Source: Sacramento County Environmental Management
Telephone: 916-875-8406
List of sites where unauthorized releases of potentially hazardous materials have occurred.

Date of Government Version: 10/29/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/28/2008
Date of Next Scheduled Update: 04/28/2008

CA CS: Contaminated Sites

Source: Alameda County Environmental Health Services
Telephone: 510-567-6700
A listing of contaminated sites overseen by the Toxic Release Program (oil and groundwater contamination from chemical releases and spills) and the Leaking Underground Storage Tank Program (soil and ground water contamination from leaking petroleum USTs).

Date of Government Version: 10/22/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/21/2008
Date of Next Scheduled Update: 04/21/2008

CA HIST LUST SANTA CLARA: Fuel Leak Site Activity Report

Source: Santa Clara Valley Water District
Telephone: 408-265-2600
A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

Date of Government Version: 03/29/2005
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/26/2007
Date of Next Scheduled Update: 03/24/2008

CA AOCONCERN: San Gabriel Valley Areas of Concern

Source: EPA Region 9
Telephone: 415-972-3178
San Gabriel Valley areas where VOC contamination is at or above the MCL as designated by region 9 EPA office.

Date of Government Version: 12/31/1998
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 04/14/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

CA HIST UST: Hazardous Substance Storage Container Database

Source: State Water Resources Control Board
Telephone: 916-341-5851

The Hazardous Substance Storage Container Database is a historical listing of UST sites.
Refer to local/county source for current data.

Date of Government Version: 10/15/1990
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 07/26/2001
Date of Next Scheduled Update: Not reported

CA LIENS: Environmental Liens Listing

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 08/27/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 11/05/2007
Date of Next Scheduled Update: 02/04/2008

CA PLACER CO. MS: Master List of Facilities

Source: Placer County Health and Human Services
Telephone: 530-889-7312

List includes aboveground tanks, underground tanks and cleanup sites.

Date of Government Version: 07/23/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 12/17/2007
Date of Next Scheduled Update: 03/17/2008

CA Fresno Co. CUPA: CUPA Resources List

Source: Dept. of Community Health
Telephone: 559-445-3271

Certified Unified Program Agency. CUPA's are responsible for implementing a unified hazardous materials and hazardous waste management regulatory program. The agency provides oversight of businesses that deal with hazardous materials, operate underground storage tanks or aboveground storage tanks.

Date of Government Version: 10/09/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 02/04/2008

CA CONTRA COSTA CO. SITE LIST: Site List

Source: Contra Costa Health Services Department
Telephone: 925-646-2286

List includes sites from the underground tank, hazardous waste generator and business plan/2185 programs.

Date of Government Version: 09/11/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 11/26/2007
Date of Next Scheduled Update: 02/25/2008

CA SAN JOSE HAZMAT: Hazardous Material Facilities

Source: City of San Jose Fire Department
Telephone: 408-277-4659

Hazardous material facilities, including underground storage tank sites.

Date of Government Version: 09/17/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 12/17/2007
Date of Next Scheduled Update: 03/03/2008

CA SWEEPS UST: SWEEPS UST Listing

Source: State Water Resources Control Board
Telephone: Not reported

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1980's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 06/03/2005

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/03/2008

CA DEED: Deed Restriction Listing

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 10/02/2007

Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/04/2008

CA HAZNET: Facility and Manifest Data

Source: California Environmental Protection Agency
Telephone: 916-255-1136

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

CA ENVIROSTOR: EnviroStor Database

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 08/28/2007

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. Page 5

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Site ID:	91466279
Site location:	3825 FABIAN WAY PALO ALTO, CA 94303-
County:	SANTA CLARA
Report number:	55249
EPA region:	09
Spill date:	01/14/1991
Spill time:	10:00
Medium affected:	Water
Damage:	False
Damage \$ amount:	0.00
Number of injured:	0
Number of fatalities:	0
Notes:	Not reported
Discharger:	SPACE SYSTEM/LORAL
Discharger address:	3825 FABIAN WAY PALO ALTO, CA 94303
Discharger county:	SANTA CLARA
C.G. Unit:	Not reported
EPA notified:	True
Initial report:	False
Updated report:	True
Spill cause:	Unknown
Spilled material:	ACETONE (117 PPM)
Spill total qty:	0.00 UNK
In water:	0.00 UNK
DOT #:	UN1090
CAS:	82550533
Quantity (lbs):	0.00
Spilled material:	1,1,1-TRICHLOROETHANE (97 PPM)
Spill total qty:	0.00 UNK
In water:	0.00 UNK
DOT #:	UN2831
CAS:	90945668
Quantity (lbs):	0.00
Spilled material:	ETHYLBENZENE (20 PPM)
Spill total qty:	0.00 UNK
In water:	0.00 UNK
DOT #:	UN1175
CAS:	87563985
Quantity (lbs):	0.00
Description:	WASTE WATER CONTAINMENT TANK / THE TANK SEAL LEAK, PROBABLY DUE TO FREEZING
Action:	SECURED THE TANK AND PUMPED IT OUT. TAKING SOIL SAMPLES FOR FURTHER ANALYSIS.
Comments:	TOTAL AMOUNT OF SPILLED WASTE WATER WAS APPROX 250 GALLONS.

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-LQG: RCRA - Large Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-SQG: RCRA - Small Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-NonGen: RCRA - Non Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

BRS: Biennial Reporting System

Source: EPA/NTIS
Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005
Database Release Frequency: Biennially

Date of Last EDR Contact: 12/13/2007
Date of Next Scheduled Update: 03/10/2008

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

CORRACTS: Corrective Action Report

Source: EPA
Telephone: 800-424-9346

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/18/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

PADS: PCB Activity Database System

Source: EPA
Telephone: 202-566-0500

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 04/12/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 08/09/2007
Date of Next Scheduled Update: 11/05/2007

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission
Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/04/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008
Date of Next Scheduled Update: 03/31/2008

CA AST: Aboveground Petroleum Storage Tank Facilities

Source: State Water Resources Control Board
Telephone: 916-341-5712

Registered Aboveground Storage Tanks.

Date of Government Version: 09/17/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/28/2008
Date of Next Scheduled Update: 04/28/2008

CA UST: Active UST Facilities

Source: SWRCB
Telephone: 866-480-1028

Active UST facilities gathered from the local regulatory agencies

Date of Government Version: 10/10/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CA LUST: Geotracker's Leaking Underground Fuel Tank Report

Source: State Water Resources Control Board

Telephone: Not reported

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state. For more information on a particular leaking underground storage tank sites, please contact the appropriate regulatory agency.

Date of Government Version: 10/10/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/09/2008

Date of Next Scheduled Update: 04/07/2008

ERNS: Emergency Response Notification System

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2006

Database Release Frequency: Annually

Date of Last EDR Contact: 01/23/2008

Date of Next Scheduled Update: 04/21/2008

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4555

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 10/01/2007

Database Release Frequency: Annually

Date of Last EDR Contact: 01/17/2008

Date of Next Scheduled Update: 04/14/2008

WASTE DISPOSAL

NPL: National Priority List

Source: EPA

Telephone: Not reported

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/02/2007

Date Made Active at EDR: 12/28/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007

Elapsed ASTM Days: 25

Date of Last EDR Contact: 01/28/2008

Proposed NPL: Proposed National Priority List Sites

Source: EPA

Telephone: Not reported

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/02/2007

Date Made Active at EDR: 12/28/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007

Elapsed ASTM Days: 25

Date of Last EDR Contact: 01/28/2008

DELISTED NPL: National Priority List Deletions

Source: EPA

Telephone: Not reported

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/02/2007

Date Made Active at EDR: 12/28/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007

Elapsed ASTM Days: 25

Date of Last EDR Contact: 01/28/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-412-9810

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007

Date Made Active at EDR: 08/29/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 06/20/2007

Elapsed ASTM Days: 70

Date of Last EDR Contact: 12/06/2007

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-412-9810

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/17/2008

ROD: Records Of Decision

Source: EPA

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 01/14/2008

Database Release Frequency: Annually

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 202-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Date Made Active at EDR: 03/30/1994

Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 02/02/1994

Elapsed ASTM Days: 56

Date of Last EDR Contact: 11/15/2007

CA SWF/LF (SWIS): Solid Waste Information System

Source: Integrated Waste Management Board

Telephone: 916-341-6320

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/10/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/13/2007

Date of Next Scheduled Update: 03/10/2008

MULTIMEDIA

TRIS: Toxic Chemical Release Inventory System

Source: EPA

Telephone: 202-566-0250

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2005

Database Release Frequency: Annually

Date of Last EDR Contact: 12/18/2007

Date of Next Scheduled Update: 03/17/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

FINDS: Facility Index System/Facility Registry System

Source: EPA

Telephone: Not reported

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/18/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

RMP: Risk Management Plans

Source: Environmental Protection Agency

Telephone: 202-564-8600

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/01/2007

CA CA FID UST: Facility Inventory Database

Source: California Environmental Protection Agency
Telephone: 916-341-5851
The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/28/1998
Date of Next Scheduled Update: Not reported

CA SLIC: Statewide SLIC Cases

Source: State Water Resources Control Board
Telephone: 866-480-1028
The SLIC (Spills, Leaks, Investigations and Cleanup) program is designed to protect and restore water quality from spills, leaks, and similar discharges.

Date of Government Version: 10/10/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

CA Sacramento Co. CS: CS - Contaminated Sites

Source: Sacramento County Environmental Management
Telephone: 916-875-8406
List of sites where unauthorized releases of potentially hazardous materials have occurred.

Date of Government Version: 10/29/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/28/2008
Date of Next Scheduled Update: 04/28/2008

CA CS: Contaminated Sites

Source: Alameda County Environmental Health Services
Telephone: 510-567-6700
A listing of contaminated sites overseen by the Toxic Release Program (oil and groundwater contamination from chemical releases and spills) and the Leaking Underground Storage Tank Program (soil and ground water contamination from leaking petroleum USTs).

Date of Government Version: 10/22/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/21/2008
Date of Next Scheduled Update: 04/21/2008

CA HIST LUST SANTA CLARA: Fuel Leak Site Activity Report

Source: Santa Clara Valley Water District
Telephone: 408-265-2600
A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

Date of Government Version: 03/29/2005
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/26/2007
Date of Next Scheduled Update: 03/24/2008

CA AOCONCERN: San Gabriel Valley Areas of Concern

Source: EPA Region 9
Telephone: 415-972-3178
San Gabriel Valley areas where VOC contamination is at or above the MCL as designated by region 9 EPA office.

Date of Government Version: 12/31/1998
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 04/14/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

CA HIST UST: Hazardous Substance Storage Container Database

Source: State Water Resources Control Board
Telephone: 916-341-5851

The Hazardous Substance Storage Container Database is a historical listing of UST sites.
Refer to local/county source for current data.

Date of Government Version: 10/15/1990
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 07/26/2001
Date of Next Scheduled Update: Not reported

CA LIENS: Environmental Liens Listing

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 08/27/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 02/05/2008
Date of Next Scheduled Update: 05/05/2008

CA PLACER CO. MS: Master List of Facilities

Source: Placer County Health and Human Services
Telephone: 530-889-7312

List includes aboveground tanks, underground tanks and cleanup sites.

Date of Government Version: 07/23/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 12/17/2007
Date of Next Scheduled Update: 03/17/2008

CA Fresno Co. CUPA: CUPA Resources List

Source: Dept. of Community Health
Telephone: 559-445-3271

Certified Unified Program Agency. CUPA's are responsible for implementing a unified hazardous materials and hazardous waste management regulatory program. The agency provides oversight of businesses that deal with hazardous materials, operate underground storage tanks or aboveground storage tanks.

Date of Government Version: 10/09/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 02/04/2008

CA CONTRA COSTA CO. SITE LIST: Site List

Source: Contra Costa Health Services Department
Telephone: 925-646-2286

List includes sites from the underground tank, hazardous waste generator and business plan/2185 programs.

Date of Government Version: 09/11/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 11/26/2007
Date of Next Scheduled Update: 02/25/2008

CA SAN JOSE HAZMAT: Hazardous Material Facilities

Source: City of San Jose Fire Department
Telephone: 408-277-4659

Hazardous material facilities, including underground storage tank sites.

Date of Government Version: 09/17/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 12/17/2007
Date of Next Scheduled Update: 03/03/2008

CA SWEEPS UST: SWEEPS UST Listing

Source: State Water Resources Control Board
Telephone: Not reported

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1980's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 06/03/2005
Date of Next Scheduled Update: Not reported

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

CA CHMIRS: California Hazardous Material Incident Report System

Source: Office of Emergency Services

Telephone: 916-845-8400

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 12/31/2005

Database Release Frequency: Varies

Date of Last EDR Contact: 11/15/2007

Date of Next Scheduled Update: 02/18/2008

CA NOTIFY 65: Proposition 65 Records

Source: State Water Resources Control Board

Telephone: 916-445-3846

Proposition 65 Notification Records. NOTIFY 65 contains facility notifications about any release which could impact drinking water and thereby expose the public to a potential health risk.

Date of Government Version: 10/21/1993

Database Release Frequency: No Update Planned

Date of Last EDR Contact: 01/15/2008

Date of Next Scheduled Update: 04/14/2008

CA LA Co. Site Mitigation: Site Mitigation List

Source: Community Health Services

Telephone: 323-890-7806

Industrial sites that have had some sort of spill or complaint.

Date of Government Version: 05/30/2007

Database Release Frequency: Annually

Date of Last EDR Contact: 11/13/2007

Date of Next Scheduled Update: 02/11/2008

CA Orange Co. Industrial Site: List of Industrial Site Cleanups

Source: Health Care Agency

Telephone: 714-834-3446

Petroleum and non-petroleum spills.

Date of Government Version: 08/01/2007

Database Release Frequency: Annually

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/03/2008

CA DEED: Deed Restriction Listing

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 10/02/2007

Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 01/04/2008

Date of Next Scheduled Update: 03/31/2008

CA VCP: Voluntary Cleanup Program Properties

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 08/28/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 11/28/2007

Date of Next Scheduled Update: 02/25/2008

CA DRYCLEANERS: Cleaner Facilities

Source: Department of Toxic Substance Control
Telephone: 916-327-4498

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaner's agents; linen supply; coin-operated laundries and cleaning; drycleaning plants, except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

Date of Government Version: 07/31/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 01/02/2008
Date of Next Scheduled Update: 03/31/2008

CA LOS ANGELES CO. HMS: HMS: Street Number List

Source: Department of Public Works
Telephone: 626-458-3517
Industrial Waste and Underground Storage Tank Sites.

Date of Government Version: 07/11/2007
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 11/13/2007
Date of Next Scheduled Update: 02/11/2008

CA WIP: Well Investigation Program Case List

Source: Los Angeles Water Quality Control Board
Telephone: 213-576-6726

Well Investigation Program case in the San Gabriel and San Fernando Valley area.

Date of Government Version: 09/30/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 01/23/2008
Date of Next Scheduled Update: 04/21/2008

CA VENTURA CO. BWT: Business Plan, Hazardous Waste Producers, and Operating Underground Tanks

Source: Ventura County Environmental Health Division
Telephone: 805-654-2813

The BWT list indicates by site address whether the Environmental Health Division has Business Plan (B), Waste Producer (W), and/or Underground Tank (T) information.

Date of Government Version: 08/24/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/13/2007
Date of Next Scheduled Update: 03/10/2008

CA CDL: Clandestine Drug Labs

Source: Department of Toxic Substances Control
Telephone: 916-255-6504

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 09/30/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 01/21/2008
Date of Next Scheduled Update: 04/21/2008

CA SAN DIEGO CO. HMMD: Hazardous Materials Management Division Database

Source: Hazardous Materials Management Division
Telephone: 619-338-2268

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 05/16/2005
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/04/2008

Database Release Frequency: Quarterly

Date of Last EDR Contact: 11/28/2007
Date of Next Scheduled Update: 02/25/2008

CA HAZNET: Facility and Manifest Data

Source: California Environmental Protection Agency
Telephone: 916-255-1136

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Next Scheduled Update: 03/10/2008

CA ENVIROSTOR: EnviroStor Database

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 08/28/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 11/28/2007
Date of Next Scheduled Update: 02/25/2008

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. Page 5

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.

Description: WASTE WATER CONTAINMENT TANK / THE TANK SEAL IS LEAKING, SUSPECTED CAUSE IS THAT
COLD WEATHER HAS DAMAGED THE SEAL.
Action: SECURED THE TANK AND PUMPED IT OUT. TAKING SOIL SAMPLES FOR FURTHER ANALYSIS.
Comments: TOTAL AMOUNT OF SPILLED WASTE WATER WAS APPROX 250 GALLONS.

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-LQG: RCRA - Large Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-SQG: RCRA - Small Quantity Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

RCRA-NonGen: RCRA - Non Generators

Source: Environmental Protection Agency
Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/11/2007
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/2007
Date of Next Scheduled Update: 02/18/2008

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

BRS: Biennial Reporting System

Source: EPA/NTIS
Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005
Database Release Frequency: Biennially

Date of Last EDR Contact: 12/13/2007
Date of Next Scheduled Update: 03/10/2008

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

CORRACTS: Corrective Action Report

Source: EPA
Telephone: 800-424-9346

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/18/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/03/2007
Date of Next Scheduled Update: 03/03/2008

PADS: PCB Activity Database System

Source: EPA
Telephone: 202-566-0500

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 04/12/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 08/09/2007
Date of Next Scheduled Update: 11/05/2007

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission
Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/04/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008
Date of Next Scheduled Update: 03/31/2008

CA AST: Aboveground Petroleum Storage Tank Facilities

Source: State Water Resources Control Board
Telephone: 916-341-5712

Registered Aboveground Storage Tanks.

Date of Government Version: 09/17/2007

CA LUST: Geotracker's Leaking Underground Fuel Tank Report

Source: State Water Resources Control Board

Telephone: Not reported

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state. For more information on a particular leaking underground storage tank sites, please contact the appropriate regulatory agency.

Date of Government Version: 10/10/2007
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/09/2008
Date of Next Scheduled Update: 04/07/2008

ERNS: Emergency Response Notification System

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2006
Database Release Frequency: Annually

Date of Last EDR Contact: 01/23/2008
Date of Next Scheduled Update: 04/21/2008

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation

Telephone: 202-366-4555

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 10/01/2007
Database Release Frequency: Annually

Date of Last EDR Contact: 01/17/2008
Date of Next Scheduled Update: 04/14/2008

WASTE DISPOSAL

NPL: National Priority List

Source: EPA

Telephone: Not reported

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 01/28/2008

Proposed NPL: Proposed National Priority List Sites

Source: EPA

Telephone: Not reported

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007
Elapsed ASTM Days: 25
Date of Last EDR Contact: 01/28/2008

DELISTED NPL: National Priority List Deletions

Source: EPA

Telephone: Not reported

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/02/2007
Date Made Active at EDR: 12/28/2007
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/03/2007

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-412-9810

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007

Date Made Active at EDR: 08/29/2007

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 06/20/2007

Elapsed ASTM Days: 70

Date of Last EDR Contact: 12/06/2007

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-412-9810

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/06/2007

Date of Next Scheduled Update: 03/17/2008

ROD: Records Of Decision

Source: EPA

Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 01/14/2008

Database Release Frequency: Annually

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

NPL LIENS: Federal Superfund Liens

Source: EPA

Telephone: 202-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Date Made Active at EDR: 03/30/1994

Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 02/02/1994

Elapsed ASTM Days: 56

Date of Last EDR Contact: 11/15/2007

CA SWF/LF (SWIS): Solid Waste Information System

Source: Integrated Waste Management Board

Telephone: 916-341-6320

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/10/2007

Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/13/2007

Date of Next Scheduled Update: 03/10/2008

MULTIMEDIA

TRIS: Toxic Chemical Release Inventory System

Source: EPA

Telephone: 202-566-0250

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2005

Database Release Frequency: Annually

Date of Last EDR Contact: 12/18/2007

Date of Next Scheduled Update: 03/17/2008

Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/02/2008

Date of Next Scheduled Update: 03/31/2008

RMP: Risk Management Plans

Source: Environmental Protection Agency

Telephone: 202-564-8600

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

CA DEED: Deed Restriction Listing

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Site Investigation Report
Highway 101 Auxiliary Lanes Project
04/SCL/101/ PM 48.97/52.17
EA 04-4A3301
VTA Contract Number S07065
URS Project Number: 28649951

Dear Mr. Mai:

Attached is a copy of the above referenced report. The conclusions and recommendations present our professional judgments and opinions based upon the findings identified in this report.

The report has been revised since the draft from August 2009, to incorporate the revised results from additional statistical analysis that has been undertaken with respect to lead. The groupings of soil samples used within the statistical analysis were amended to reduce the amount of soil that is subject to reuse restrictions.

The following table shows how the original sample groupings (from the August 2009 analysis and report) were re-grouped for the current statistical analysis and attached report. To avoid confusion, the revised report makes no mention of the original groupings.

Original Group (Aug 2009 Report)	Northern Limit Station	Southern Limit Station	Depth*	Revised Group (as used in attached report)
Southbound				
1	Northern end of project	50+00	0-1 ft	1A
1	Northern end of project	50+00	1-3 ft	1B
2A	50+00	113+00	0-1 ft	1A
2B	50+00	113+00	1-3 ft	1B
3A	113+00	197+00	0-0.5 ft	2A
3B	113+00	197+00	0.5-3 ft	2B

Original Group (Aug 2009 Report)	Northern Limit Station	Southern Limit Station	Depth*	Revised Group (as used in attached report)
4	197+00	Southern Project Limit	0-0.5 ft	2A
4	197+00	Southern Project Limit	0.5-3 ft	2B
Northbound				
5	Northern Project Limit	70+00	0-1.5 ft	3A
5	Northern Project Limit	70+00	1.5-3 ft	3B
6A	70+00	105+00	0-1.5 ft	3A
6B	70+00	105+00	1.5-3 ft	3B
7A	105+00	159+00	0-1.5 ft	4A
7B	105+00	159+00	1.5-3 ft	4B
8A	159+00	Southern Project Limit	0-1 ft	5A
8B	159+00	Southern Project Limit	1-3 ft	5B

Based on the revised groupings, the following reuse and disposal requirements apply.

Group	Northern Limit Station	Southern Limit Station	Depth*	Reuse Restriction	Disposal Requirement
Southbound					
1A	Northern Project Limit	113+00	0-1 ft	Below pavement, > 5' above the groundwater table	Cal-Hazardous, or out- of-state
1B	Northern Project Limit	113+00	1-3 ft	None	Non-Hazardous
2A	113+00	Southern Project Limit	0-0.5 ft	Below pavement, > 5' above the groundwater table	Cal-Hazardous, or out- of-state
2B	113+00	Southern Project Limit	0.5-3 ft	None	Non-Hazardous
Northbound					
3A	Northern Project Limit	105+00	0-1.5 ft	Below pavement, > 5' above the groundwater table	Cal-Hazardous, or out- of-state
3B	Northern Project Limit	105+00	1.5-3 ft	None	Cal-Hazardous, or out- of-state
4A	105+00	159+00	0-1.5 ft	Below pavement, > 5' above the groundwater table	Cal-Hazardous, or out- of-state
4B	105+00	159+00	1.5-3 ft	None	Non-Hazardous
5A	159+00	Southern Project Limit	0-1 ft	Below pavement, > 5' above the groundwater table	Cal-Hazardous, or out- of-state
5B	159+00	Southern Project Limit	1-3 ft	None	Non-Hazardous

Please note that as discussed in the August 2009 report, selected areas with higher than typical lead known as "hot spots" at 5 locations are to be preliminarily excavated and off-hauled. In addition to those 5 locations, samples associated with a hot spot at boring N-1-4 has also been removed from the sample set as the analytical results would have negatively impacted soil reuse potential. Soil associated with this boring will be separately excavated and managed.

In addition, sampling related to an additional right of way acquisition area identified as the "Peery Property" was performed subsequent to the initial draft; the results of this sampling effort are discussed in this revised report.

Please do not hesitate to contact us if there are any questions or comments.

Sincerely,
URS Corporation

EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

The U. S. 101 Auxiliary Lanes project consists of the segment of U. S. 101 between Embarcadero Road and State Route 85 (S.R. 85) located in the cities of Mountain View and Palo Alto, California. The project limits extend south from Embarcadero Road to S.R. 85, a distance of 3.2 miles (PM 48.97/52.17) and will be referred hereon as “the Site” (Figure 1). The purpose of this Site Investigation Report is to evaluate the soil conditions for on-site use, off-site disposal of site soils, assess the bridges and culverts that will need to be widened for the presence of asbestos or lead-based paint and to assess soil and groundwater to identify work safety issues for construction site workers. The following summarizes URS’ conclusions and recommendations.

Soil Reuse/Disposal

With the exception of aurally-deposited lead, no constituent was detected at a concentration limiting soil reuse or requiring disposal of soil as a hazardous waste. However, the detected concentrations of aurally-deposited lead have resulted in restrictions on the reuse and/or disposal of soil within the project limits. The attached Figures 2-18 and the following table summarize the reuse restrictions and disposal requirements of project soil. Please note that selected hotspot removal is assumed as discussed in detail in Section 7.1.2.

Table ES-1 - Soil Reuse/Disposal Requirements

Group	Northern Limit Station	Southern Limit Station	Depth*	Reuse Restriction	Disposal Requirement
Southbound					
1A	Northern Project Limit	113+00	0-1 ft	Below pavement, > 5' above the groundwater table	Cal-Hazardous, or out-of-state
1B	Northern Project Limit	113+00	1-3 ft	None	Non-Hazardous
2A	113+00	Southern Project Limit	0-0.5 ft	Below pavement, > 5' above the groundwater table	Cal-Hazardous, or out-of-state
2B	113+00	Southern Project Limit	0.5-3 ft	None	Non-Hazardous
Northbound					
3A	Northern Project Limit	105+00	0-1.5 ft	Below pavement, > 5' above the groundwater table	Cal-Hazardous, or out-of-state
3B	Northern Project Limit	105+00	1.5-3 ft	None	Cal-Hazardous, or out-of-state
4A	105+00	159+00	0-1.5 ft	Below pavement, > 5' above the groundwater table	Cal-Hazardous, or out-of-state
4B	105+00	159+00	1.5-3 ft	None	Non-Hazardous
5A	159+00	Southern Project Limit	0-1 ft	Below pavement, > 5' above the groundwater table	Cal-Hazardous, or out-of-state
5B	159+00	Southern Project Limit	1-3 ft	None	Non-Hazardous

*Samples typically collected at 0.5, 1.0, 1.5, 2.0, and 3.0 feet below ground surface

EXECUTIVE SUMMARY

Significant project costs may result due to the volume of soil with reuse restrictions or requiring disposal as a hazardous waste, and the presence of a shallow groundwater table. Steps to reduce these costs by minimizing disposal of soil as a hazardous waste, or finding locations to properly reuse the restricted soil, may be necessary.

Structures Scheduled for Retrofit or Demolition

Three structures within the project limits are scheduled for retrofit or widening, and this will involve the partial demolition of all or parts of each structure. Accordingly, an asbestos and lead-based paint inspection was conducted for the following structures:

- Adobe Creek Bridge
- Matadero Creek Bridge
- Permanente Creek box culvert

No asbestos containing materials were detected. Lead-based paint was detected at the Adobe Creek Bridge and the Matadero Creek Bridge. Applicable regulations regarding the demolition and disposal of debris from these bridges must be followed.

Potential Right of Way Acquisition Areas

Borings N-1, N-3-5 and N-3-10 were advanced within or adjacent to potential right-of-way acquisition areas, to classify soil in those areas for reuse and to preliminarily screen the sites for other contamination. Boring N-1 exhibited potential contamination of total Chromium; while borings N-3-5 and N-3-10 exhibited contamination of total petroleum hydrocarbons as motor oil (TPH-mo); and boring N-3-10 exhibited contamination of VOCs in groundwater. Additional characterization of these properties would be required to certify that they are free of hazardous contamination.

Impacts from Off-Site Contamination

Several locations at the project site were discussed during the Initial Site Assessment performed by Baseline Environmental Consultants, April 2008, to have likely been impacted by volatile organic compounds (VOCs) or pesticides originating at several properties adjacent to the project area. One groundwater sample and a full-suite of soil analytical data was collected for each of these areas.

These locations include:

- San Antonio Road area (Boring S-2-3)
- Caltrans yard area near Old Middlefield Way (Borings S-3-12 and S-3-13)
- Area south of Amphitheater Parkway (Boring S-3-14)

URS' investigation did not identify evidence that these potential off-Site sources impacted the project corridor.

EXECUTIVE SUMMARY

Groundwater

URS' investigation of groundwater did not reveal the presence of contamination that would require disposal as a hazardous waste. In general, groundwater was detected at depths varying from 8 feet to 15 feet below ground surface. Based on the terms of the Caltrans variance, these shallow depths could reduce the areas at which Aerial Deposited Lead contaminated soil may be reused.

The US 101 Auxiliary Lanes project consists of the segment of US 101 between Embarcadero Road and State Route 85 (S.R. 85) located in the Cities of Mountain View and Palo Alto, in Santa Clara County within District 4 of the State of California Department of Transportation (Caltrans) and within the Santa Clara Valley Transportation Agency (VTA) planning area (See Figure 1 for a Project Location and Vicinity Map). The project limits extend south from Embarcadero Road to State Route 85, a distance of 3.2 miles (PM 48.97/52.17) and will be referred hereon as “the Site”.

The purpose of this project is to relieve existing and future traffic congestion at freeway on-ramp and off-ramp connections, improve safety along the US 101 corridor, and provide for improved local access over this segment of the US 101 corridor. This project proposes to construct auxiliary lanes, extend existing second High Occupancy Vehicle (HOV) lanes, and undertake associated ramp improvements including ramp widening and installing/activating ramp metering in both directions. The proposed improvements include widening of creek crossings and relocation of sign structures, storm drainage and other utilities. As a result of these proposed improvements soil will be excavated along US 101, at interchanges, and at creek crossings.

The purpose of the Hazardous Materials Investigation was to evaluate the soil conditions for on-site use, off-site disposal of site soils, assess the bridges and culverts scheduled for retrofit for the presence of asbestos or lead-based paint and assess soil and groundwater to identify work safety issues for construction site workers. URS submitted the Hazardous Materials investigation workplan to VTA and Caltrans on March 16, 2009. Sampling and resulting laboratory analysis activities were performed between March 22 and April 13, 2009.

This Report has been prepared in accordance with the most recently issued Caltrans District 4 lead-impacted soil handling variance by DTSC. This variance describes reuse restrictions and disposal requirements for soils impacted by lead at various concentrations. These criteria and the corresponding regulatory restrictions are described in Section 3.1.

Soil samples were collected at a total of 91 locations, as described in the workplan included as Appendix A. Soil samples were collected at locations perpendicular from the edge of the roadway. Approximately one-third of samples were collected each at outer pavement edge, at the edge of the proposed widening area, or in the midpoint of the proposed widening area. Of the 91 locations, 47 were from adjacent to the northbound direction mainline or ramp lanes and 44 from adjacent to the southbound direction mainline or ramp lanes. A secondary, duplicate boring was advanced at six of the locations. Samples were generally collected at 0.5, 1.0, 1.5, 2.0, and 3.0 feet below ground surface (bgs), though isolated samples were collected to deeper depths where excavation was expected to be deeper than 3 feet, or where groundwater samples were to be collected. A total of 475 soil samples were collected.

Groundwater samples were collected from the first encountered groundwater zone, typically about 8-15 feet below ground surface (bgs). A total of 9 groundwater samples were collected. Groundwater samples were collected where deeper excavation is planned – at bridge and culvert construction areas and at a retaining wall location. Additionally, groundwater samples were collected at areas identified in the project Initial Site Assessment (ISA) as being potentially impacted by VOCs.

A total of 48 samples of potentially-asbestos containing materials, and 7 samples of potential lead-based paint, were collected from these structures requiring modification or widening. This Report provides analytical data of these materials for the following existing structures:

- Adobe Creek Bridge, 37-0174
- Matadero Creek Bridge, 37-0040
- Permanente Creek box culvert extension

Several locations at the project site were discussed during the Initial Site Assessment performed by Baseline Environmental Consultants, April 2008, to have likely been impacted by VOCs or pesticide use originating at several properties adjacent to the project area. One groundwater sample and a full-suite of soil analytical data was collected for each of these areas.

These locations include:

- San Antonio Road area
- Caltrans yard area near Old Middlefield Way, and
- Area south of Amphitheater Parkway.

2.1 DESCRIPTION OF SAMPLING AND ANALYSIS ACTIVITIES

This section describes the sampling and resulting laboratory analysis activities performed between March 22 and April 13, 2009.

2.1.1 Project Limits

The US 101 Auxiliary Lanes project consists of the segment of US 101 between Embarcadero Road and State Route 85 (SR 85) located in the Cities of Mountain View and Palo Alto, in Santa Clara County within District 4 of the State of California Department of Transportation and within the VTA planning area (See Figure 1 for a Project Location and Vicinity Map). The project limits extend south from Embarcadero Road to SR 85, a distance of 3.2 miles (PM 48.97/52.17) and will be referred hereon as “the Site”. General project results are discussed separately for the northbound and southbound directions. Smaller groups were created for statistical evaluation, as discussed in the Data Evaluation section.

2.1.2 Sampling Locations

Figure 1 shows the location of the site. Figures 2 through 18 shows the sampling locations. Sampling locations were surveyed using a Trimble ProXH Global Positioning System (GPS) instrument. Soil samples were collected at a total of 91 locations. Approximately 1/3 of samples were collected each at outer pavement edge, at the outer edge of the proposed widening area, or in the midpoint of the proposed widening area. A secondary, duplicate boring was advanced at six of the locations. A total of 475 soil and 9 groundwater samples were collected, and all samples were analyzed for one or more constituents as described in Table 1.

Three of the sampling locations were performed within or immediately adjacent to areas which are expected to be acquired to construct the proposed project. These samples were associated with borings N-1, N-3-5, and N-3-10.

2.1.3 Sampling Depths

Samples were generally collected at 0.5, 1.0, 1.5, 2.0, and 3.0 feet below ground surface (bgs), though isolated samples were collected to deeper depths where excavation was expected to be deeper than 3 feet, or where groundwater samples were to be collected.

2.1.4 Pre-Field Activities

2.1.4.1 Permits

URS used the existing encroachment permit for access to the Caltrans ROW. A copy of this permit is shown in Appendix B. Due to the shallow nature of the environmental borings, no additional permits were required for the environmental investigation.

2.1.4.2 Health and Safety Plan

A Site specific Health and Safety Plan was prepared for the project's field activities and was implemented by personnel working on-Site. Daily tailgate safety meetings were held before initiation of fieldwork with field personnel and subcontractors to discuss each day's activities and related safety precautions. Additionally, a URS Health and Safety representative performed a field visit to monitor implementation of the HASP.

2.1.4.3 Utility Clearance

URS reviewed utility records to place borings away from known utility lines. URS also reviewed ongoing potholing operations results to further determine optimal boring locations. Additionally, utility clearance at each sampling location was conducted through notification of Underground Services Alert (USA) and with the assistance of a private underground utility locator. In several cases, sample locations were moved slightly in the field to avoid utilities.

2.1.4.4 Traffic Control

Cal-Safety Inc., a Caltrans-certified traffic control subcontractor was retained to divert traffic away from the field crew and sampling rig when working along roadways. All work was performed between the hours of 9 PM to 5 AM, at which time URS was permitted to close the outermost lane of traffic.

2.1.5 Sample Collection Methods

A direct push (DPT) geoprobe soil sampling system operated by ECA, Inc. of Aptos, California (State of California Drilling Contractor License No. C57-695970) was used to collect soil cores for logging purposes and collect soil samples at discrete depths from geoprobe borings. In each of the DPT borings, samples were collected by driving an approximately 4-foot long, 2-inch diameter sample barrel equipped with clean plastic liners. Due to access issues or proximity to potential utilities, samples were collected at some locations using a hand auger. All geoprobe borings were logged by a geologist or environmental engineer familiar with soil sampling procedures. Geoprobe boring logs are included in Appendix C.

Sections of the plastic liner containing soil intervals intended for possible laboratory analysis were cut from the 4-foot long soil core, sealed with Teflon® tape, plastic end caps and masking tape, labeled with Site specific designations, and placed on ice in an ice-chest pending transport to Torrent Analytical Laboratory in Milpitas, California, a State of California certified laboratory, under URS Chain-of-Custody procedures.

Sampling equipment was cleaned after each use. Before leaving each sampling location, boring locations were filled to the surface grade with a mixture of Portland cement and bentonite grout. The limited cuttings related to the environmental investigation filled less than one drum, and were consolidated with cuttings resulting from the concurrent geotechnical investigation. These drums were stored beneath the SR 85 to SR 101 HOV ramp, at the southern end of the Site. These investigation-derived soils were sampled, characterized, and are scheduled to be disposed

of off-Site in accordance with applicable regulations. Limited volumes of decontamination water were generated and handled by the drilling contractor.

2.1.6 Changes to the Field Program

Minor modifications were made to the Field Program during the course of the investigation. These changes fall into one of the following categories:

- One boring was advanced to 2.5 feet, instead of 3.0 feet, due to drilling refusal. .
- Approximately 10% of sample locations were moved slightly because the original locations were at an inaccessible point or soil was not exposed in this area. The total number of sample locations was not reduced, and sample locations remained spaced approximately every 300-350 feet.

2.1.7 Soil Laboratory Analysis

Table 1 provides details of the soil analytical program, including soil sampling intervals and soil analyses conducted at each sampling location. Thirty of the soil samples were duplicated in the field for quality control purposes.

All the soil samples included in the analytical program were analyzed for total lead by EPA Method 6010B. Approximately 5-20% of samples collected at various intervals were analyzed for additional soil analytes. The number of soil samples analyzed for each analyte for the Site follows:

- 429 soil samples were analyzed for lead (Pb) by EPA 6010B
- 50 soil samples were analyzed for California Assessment Metals (CAM 17 metals) which includes lead, by EPA Methods 6010B and 7471
- 48 soil samples were analyzed for pH by EPA Method 9045C
- 14 soil samples were analyzed for total petroleum hydrocarbons (TPH) as diesel and motor oil (TPH-d/mo) by EPA Method 8015B
- 12 soil samples were analyzed for organochlorine pesticides (OCPs) and polychlorinated biphenyls (PCBs) by EPA Method 8081A
- 41 soil samples collected at intervals below the top 6 inches were analyzed for TPH as gasoline (TPH-g) by GC-MS
- 45 soil samples collected at intervals below the top 6 inches were analyzed for benzene, toluene, ethylbenzene, and xylenes (BTEX), using EPA Method 8260B
- 45 soil samples collected at intervals below the top 6 inches were analyzed for MTBE, TAME, t-Butanol, ETBE, and DIPE (5 Gas Oxygenates) using EPA Method 8260B
- 86 soil samples were collected and analyzed for asbestos using the Polarized Light Microscopy (PLM) method

Additionally, nine soil samples, specifically selected based on the recommendations of the ISA, or in potential right-of-way acquisition areas, were analyzed for VOCs by EPA Method 8260B.

The PLM method of asbestos analysis reveals the presence or absence of asbestos. The results of 5 of the 86 soil samples analyzed for asbestos indicated the presence of asbestos. These samples were subsequently analyzed for asbestos using the Carb 435 Level A (0.25% level of detection) method (Point Count Method).

When total concentration of any metal exceeded ten times its respective Soluble Threshold Limit Concentration (STLC) a sample was extracted with the Standard Water Waste Extraction Tests (WET) and, if the metal was lead, was extracted with the De-ionized Water Waste Extraction Test (DI-WET) and the extracts were analyzed for that metal. The WET test results were used for comparison with California hazardous waste criteria and the DI-WET test results were used to evaluate soils for on-Site use based on the DTSC variance governing soil reuse (a copy of this variance and its subsequent revisions are included as Appendix D). Samples in which the total concentration of any metal exceeded 20 times the STLC criteria were extracted using the (federal) Toxicity Characteristic Leaching Procedure (TCLP) and analyzed for the metal of concern, for further comparison with federal hazardous waste criteria.

Due to limited sample volume, two soil samples exceeding 50 mg/Kg could not be analyzed for DI-WET and five samples exceeding 100 mg/Kg could not be analyzed for TCLP lead. In URS' opinion, a sufficient number of samples have been analyzed using leachate procedures to accurately characterize soil for reuse and disposal.

The number of soil samples analyzed for various metals using WET, DI-WET, and TCLP methods for each project area are as follows:

Lead

- 165 soil samples tested using WET
- 163 soil samples tested using DI WET
- 120 soil samples tested using TCLP

Chromium:

- 21 soil samples tested using WET
- 1 soil samples tested using TCLP

Additionally, four samples were tested for Chromium VI speciation.

Nickel:

- 1 soil sample tested using WET

A complete set of the analytical results, including Chain of Custody forms, are presented in electronic format in Appendix E.

The following analytical quality control procedures were used to comply with Caltrans procedures. Thirty samples were duplicated in the field for quality control purposes. In the laboratory QC, one sample in ten field samples was spiked with lead to ten times the detection limit or at the analyte level. (Approximately one sample in 20 was spiked and a spike duplicate was also run on each spiked sample. This is equivalent to one spike for every ten samples).

A calibration blank sample was run for every ten samples, or per batch, whichever was more frequent.

2.1.8 Groundwater Laboratory Analysis

In the course of this hazardous materials investigation, URS collected groundwater samples near the existing Caltrans maintenance facility adjacent to Old Middlefield Way based on the conclusions of the ISA, in the vicinity of the each bridge or culvert scheduled for replacement due to the possibility of deep excavation and dewatering in those areas, and downgradient or within right of way acquisition areas. Table 1 provides details of the groundwater analytical program. A total of nine groundwater samples were collected. The number of groundwater samples analyzed for each analyte for the Site follows:

- 7 groundwater samples were analyzed for CAM 17 metals by EPA Methods 6010B and 7471
- 6 groundwater samples were analyzed for pH by EPA Method 9045C
- 7 groundwater samples were analyzed for TPH-d and TPH-mo by EPA Method 8015B
- 6 groundwater samples were analyzed for OCPs and PCBs by EPA Method 8081A
- 7 groundwater samples were analyzed for TPH-g by GC-MS
- 10 groundwater samples were analyzed for BTEX, using EPA Method 8260B
- 10 groundwater samples were analyzed for MTBE, TAME, t-Butanol, ETBE, and DIPE (5 Gas Oxygenates) using EPA Method 8260B
- 9 groundwater samples were analyzed for VOCs by EPA Method 8260B

Analyte concentrations in soil are presented in Tables 2 through 6. The analytical results are presented in the following sections, separated into discussions on soil and groundwater, and by analyte. Complete soil and groundwater analytical data are presented in the Analytical Laboratory Reports, attached in electronic format as Appendix E.

3.1 REGULATORY OVERVIEW

Based upon URS' Hazardous Materials Investigation Workplan, and the DTSC Lead Variance for Caltrans, the following soil criteria have been used to evaluate the condition of soil at the Site:

- Soil considered a hazardous waste due to any criteria other than lead may not be reused.
- Soil with total lead <50 mg/kg or extractable lead <5 mg/L with the standard waste extraction test (WET) test, are not considered hazardous waste and are not subject to the reuse restrictions of the Caltrans ADL variance.
- Soil meeting hazardous waste criteria for lead only, with total lead <1411 mg/kg, with <1.5 mg/L extractable lead with the deionized waste extraction test (DI-WET) can be used for fill on-Site as long as it is more than five feet above the water table and must be covered with at least 1.0 foot of non-hazardous cover.
- Soil meeting hazardous waste criteria for lead only, with <3397 mg/kg total lead and >0.5 mg/L and between 1.5 mg/L and 150 mg/L extractable lead with the DI WET can be used within the Right of Way (ROW) on-Site as long as it is more than five feet above the water table and must be covered with a pavement structure which will be maintained by Caltrans.
- Soil with >3397 mg/kg total lead cannot be reused and must be disposed off-Site as a California or Federal Hazardous waste.
- Soil with >5 mg/L extractable lead with TCLP cannot be reused and must be disposed off-Site as a Federal RCRA hazardous waste.
- For soil that must be disposed off-Site if removed from the Caltrans ROW:
 - Soil with <5.0 mg/L extractable lead with the standard WET test is a non-hazardous waste and can be disposed in a non-hazardous waste landfill if removed from the Caltrans ROW.
 - Soil with >5.0 mg/L extractable lead with the standard WET and <5.0 mg/L extractable lead with the TCLP test is a California hazardous waste and must be disposed off-Site in a hazardous waste landfill if removed from the Caltrans ROW, or alternatively can be disposed of out of state, as non-hazardous soil.
 - Soil with >5.0 mg/L extractable lead with the TCLP test is a Federal RCRA waste and must be disposed off-Site in a hazardous waste landfill.

Soil analytical results from the soil samples are discussed below.

3.2 SOIL SAMPLES

3.2.1 Lead

ADL was the primary focus of the soil investigation and the data in Table 2 presents the resulting lead data from the soil samples analyzed for lead as part of this investigation.

Total lead results varied from less than the detection limit of 1 mg/kg in multiple soil samples to 9,700 mg/kg in soil sample S-3-3@0.5 ft.

One-hundred sixty-five of the soil total lead results were above 50 mg/kg. These detections were greater than ten times the STLC criteria of 5 mg/kg (50 mg/kg) for lead, requiring that the WET and DI-WET test be conducted on these samples (limited sample volume prevented DI-WET testing for two of these samples). One-hundred twenty of the total lead results were equal to or greater than 20 times the STLC criteria of 5.0 mg/L (100 mg/kg) for lead. The TCLP test was also conducted on these samples (limited sample volume prevented TCLP testing for five of these samples). Table 3 lists results of all soil samples concentrations using the WET, DI-WET and TCLP tests, if applicable.

3.2.2 CAM 17 Metals

A total of 48 soil samples (including duplicates) were submitted for CAM 17 metals analysis, which includes antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium and zinc. Analytical results for metals and laboratory reporting limits are presented in Table 2.

With the exception of chromium and nickel, no metal was detected at a concentration that requires leachability testing. The results for these metals are discussed in more detail in the following section.

3.2.2.1 Chromium

Chromium concentrations in soil ranged from 18 mg/kg (N-3-5@0.5 ft) to 180 mg/kg (S-1-5@0.5 ft).

Twenty-one of the total soil chromium results were greater than ten times the STLC criteria for total chromium (5 mg/L). The WET test was conducted on these samples, and the concentrations of WET chromium indicate that they did not exceed the criteria for hazardous waste of 5 mg/L. One soil chromium result was greater than 20 times the STLC criteria for chromium. The TCLP test was conducted on this sample, and the concentration of TCLP chromium indicated that it did not exceed the criteria for hazardous waste of 5 mg/L. Four of the 21 soil samples with total chromium detected at concentrations greater than 50 mg/Kg were analyzed for hexavalent chromium (samples [N-1@1.0'](#), N-1-4@2.0', S-1-5@0.5', and S-1-14@3.0'). Hexavalent chromium was not detected in any sample above the detection limit of 0.200 mg/Kg. Analytical results for leachate tests and hexavalent chromium are presented in Table 3.

3.2.2.2 Nickel

Nickel concentrations in soil ranged from 25 mg/kg (S-1-5@1.5 ft) to 280 mg/kg (S-1-5@0.5 ft). One total soil nickel result was greater than 10 times the STLC criteria for nickel (20 mg/L). The WET test was conducted on this sample, and the concentration of WET nickel indicated that it did not exceed the criteria for hazardous waste of 1 mg/L. Analytical results for the nickel leachate test is presented in Table 3.

3.2.3 Other Constituents of Concern

Various other chemical analyses were conducted on soil samples collected adjacent to the northbound lanes. These analyses are discussed below. Results and detection limits are tabulated in Table 4.

3.2.3.1 pH

Forty-eight samples were analyzed for pH. Results ranged from 7.63 to 8.86. These pH detections are within the range noted in the DTSC reuse criteria. Therefore, levels of pH are not considered further in this soils evaluation.

3.2.3.2 Organochlorine Pesticides (OCPs)

Twelve samples were analyzed for OCPs. Various OCPs were detected in several samples. The following OCPs were detected in one or more samples at the following maximum concentrations:

4,4-DDD – 11.6 ug/Kg

4,4-DDE – 16.9 ug/Kg

4,4-DDT – 62.1 ug/Kg

Alpha-Chlordane – 18.5 ug/Kg

Dieldrin – 16.9 ug/Kg

Gamma-Chlordane – 18.6 ug/Kg

None of these detection of OCPs exceed the concentration at which leachate testing would be required to determine if the soil qualifies at a hazardous waste. Therefore, OCPs are not considered further in this soils evaluation.

3.2.3.3 Volatile Organic Compounds (VOCs)

Samples collected at three borings advanced within potential Right-of-Way takes, and near the existing Caltrans maintenance facility adjacent to Old Middlefield Way were analyzed for

VOCs. VOCs were not detected at or above the laboratory detection limits, except for sample [N-1@1.0'](#), where Methylene Chloride was detected at 12 ug/Kg. Detection limits for analysis of these constituents are included in Appendix E. While the EPA has not established a level at which Methylene Chloride constitutes a hazardous waste, in URS' opinion this concentration does not warrant performance of additional toxicity tests or the analysis of samples collected from deeper intervals. Therefore, VOCs are not considered further in this soils evaluation. However, the presence of VOCs may need to be considered for worker health and safety in the construction contract documents.

3.2.3.4 Polychlorinated Biphenyls (PCBs)

Twelve samples were analyzed for PCBs. PCBs were not detected at or above the laboratory detection limits. Detection limits for analysis of these constituents are included in Appendix E. Therefore, PCBs are not considered further in this soils evaluation.

3.2.3.5 Total Petroleum Hydrocarbon as gasoline (TPH-g)

Forty-one samples were analyzed for TPH-g. TPH-g was not detected at or above the laboratory detection limit of 100 ug/Kg in any soil sample. Therefore, TPH-g is not considered further in this soils evaluation.

3.2.3.6 Benzene/Toluene/Ethylbenzene/Xylenes and 5 Gas Oxygenates

Forty-five samples were analyzed for BTEX and for the constituents, TAME, DIPE, ETBE and t-Butanol (5 Gas Oxygenates). These chemicals were not detected at or above the laboratory detection limit in any soil sample. Therefore, they are not considered further in this soils evaluation. Detection limits for analysis of these constituents are included in Appendix E.

3.2.3.7 Total Petroleum Hydrocarbon as diesel (TPH-d)

Fourteen samples were analyzed for TPH-d. TPH-d was detected in two samples at a maximum concentration of 3.27 mg/kg. While the EPA has not established a level at which TPH-d constitutes a hazardous waste, in URS' opinion these concentrations do not warrant performance of additional toxicity tests or the analysis of samples collected from deeper intervals. Therefore, the presence of TPH-d is not considered further in this soils evaluation.

3.2.3.8 Total Petroleum Hydrocarbon as motor oil (TPH-mo)

Fourteen samples were analyzed for TPH-mo. TPH-mo was detected in all samples at concentrations ranging from 6.7 mg/Kg (N-1@7.0 ft) to 3540 mg/Kg (N-3-10@1.0 ft). While the EPA has not established a level at which TPH-d constitutes a hazardous waste, based on URS' experience these concentrations do not warrant performance of additional toxicity tests or the analysis of samples collected from deeper intervals. Therefore, the presence of TPH-mo is not considered further in this soils evaluation. However, the presence of TPH-mo in soil may need to be considered for health and safety purposes in the construction contract documents.

3.2.3.9 Asbestos in Soil

Eighty-six samples were analyzed for asbestos using the PLM method. The results of this analysis indicated that asbestos was present in 5 samples (see Table 4). For these five samples, the CARB 435 Level A method, which quantifies asbestos with a detection limit of 0.25%. Asbestos was detected at a concentration of <0.25% Chrysotile in four samples, and at 0.50% Chrysotile at sample N-2-11@1.0'. These detections are less than the concentration of asbestos at which the soil would be considered a hazardous waste of 1%, therefore, the presence of asbestos in soil is not considered further in this soils investigation. However, the presence of asbestos in soil may need to be considered for health and safety purposes in the construction contract documents.

3.3 GROUNDWATER

In the course of this hazardous materials investigation, URS collected groundwater samples near the existing Caltrans maintenance facility adjacent to Old Middlefield Way based on the conclusions of the ISA, in the vicinity of the each bridge or culvert scheduled for replacement due to the possibility of deep excavation and dewatering in those areas, and downgradient or within right of way acquisition areas. Analytical results from the groundwater samples are discussed below.

3.3.1 California Assessment Metals (CAM 17 Metals)

A total of 8 groundwater samples were submitted for CAM 17 metals analysis, which includes antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium and zinc. Analytical results for metals and laboratory reporting limits are presented in Table 5. No metal was detected at a concentration exceeding the STLC criteria. Therefore, metals are not considered further in this groundwater evaluation.

3.3.2 Other Constituents of Concern

3.3.2.1 pH

Six samples were analyzed for pH. Results ranged from 7.90 to 8.47. These pH detections do not exceed Title 22 corrosivity levels. Therefore, levels of pH are not considered further in this groundwater evaluation. Analytical results for this constituent are included in Table 6.

3.3.2.2 Organochlorine Pesticides (OCPs)

Six samples were analyzed for OCPs. OCPs were not detected in any sample. Therefore, OCPs are not considered further in this groundwater evaluation. Analytical results for this constituent are included in Table 6.

3.3.2.3 Volatile Organic Compounds (VOCs)

Nine samples were analyzed for VOCs. One or more of the following VOCs were detected in seven samples: 1,1,1-Trichloroethane, 1,1-Dichloroethane, 1,1-Dichloroethene, Chloroform, Tetrachlorethene, cis-1,2-Dichloroethene, trans-1,2-Dichloroethene, Trichloroethene, and Trichlorofluoromethane (see Table 6 for these results). No VOC detection exceeded the STLC criteria or were detected at concentrations typically considered a hazardous waste. Therefore, VOCs are not considered further in this groundwater evaluation. However, the presence of VOCs in groundwater may need to be considered for worker health and safety in the construction contract documents. Analytical results for this constituent are included in Table 6.

3.3.2.4 Polychlorinated Biphenyls (PCBs)

Six samples were analyzed for PCBs. PCBs were not detected at or above the laboratory detection limits. Detection limits for analysis of these constituents are included in Appendix E. Therefore, PCBs are not considered further in this groundwater evaluation. Analytical results for this constituent are included in Table 6.

3.3.2.5 Total Petroleum Hydrocarbon as gasoline (TPH-g)

Seven samples were analyzed for TPH-g. TPH-g was detected in three samples at concentrations up to 74 ug/L. While the EPA has not established a level at which TPH-g constitutes a hazardous waste, in URS' opinion these concentrations do not warrant performance of additional toxicity tests or the analysis of samples collected from deeper intervals. Therefore, the presence of TPH-g is not considered further in this groundwater evaluation. Analytical results for this constituent are included in Table 6.

3.3.2.6 Total Petroleum Hydrocarbon as diesel or motor oil (TPH-d/mo)

Seven samples were analyzed for TPH-d/mo. TPH-d/mo was not detected at or above the laboratory detection limits in any sample. Detection limits for analysis of these constituents are included in Appendix E. Therefore, TPH-d/mo is not considered further in this groundwater evaluation. Analytical results for this constituent are included in Table 6.

3.3.3 Groundwater Elevation

Based on URS' geotechnical investigation, which was performed in the summer of 2009, depth to groundwater varied throughout the Site, ranging from approximately 8 feet to 15 feet bgs. Accordingly, reuse of soil may be constrained, because a significant percentage of the soil is restricted to reuse at least five feet above the groundwater table.

This section provides our evaluation of the data presented in previous sections. The evaluation includes statistical analysis and comparisons to various regulation criteria and guidelines. A summary of statistical evaluations for total and leachable quantities of lead for the Site is included as Table 7. The boring logs for the soil borings are presented in Appendix C.

4.1 SOIL

To perform a statistical evaluation of total lead, WET lead, DI-WET lead, and TCLP lead the Site was split into several smaller segments that represent logical divisions within the project area for soil management purposes that correspond to the expected soil management to be implemented as part of the construction project. The concentration data were evaluated separately by depth to evaluate if depth dependence exists.

The smaller segments used in the statistical evaluation are described below.

Southbound

- Group 1: Construction adjacent to southbound lanes from northern project limit to Station 113+00. This group was further split into subgroups 1A and 1B, for soil shallower and deeper than 1-foot bgs, respectively.
- Group 2: Construction adjacent to southbound lanes from Station 113+00 to the southern project limit. This group was further split into subgroups 2A and 2B, for soil shallower and deeper than 6 inches bgs, respectively.

Northbound

- Group 3: Construction adjacent to northbound lanes from northern project limit to Station 105+00. This group was further split into subgroups 3A and 3B, for soil shallower and deeper than 1.5 feet bgs, respectively.
- Group 4: Construction adjacent to northbound lanes from Station 105+00 to Station 159+00. This group was further split into subgroups 4A and 4B, for soil shallower and deeper than 1.5 feet bgs, respectively.
- Group 5: Construction adjacent to northbound lanes from Station 159+00 to the southern project limit. This group was further split into subgroups 5A and 5B, for soil shallower and deeper than 1-foot bgs, respectively.

Statistical Evaluation Methodology

A statistical evaluation of the analytical sample results was conducted to assess whether there is a need for special handling of excavated soils, based on criteria set forth for total lead and leachable lead using WET and DI-WET extraction techniques. To accomplish this, representative soil concentrations were compared to relevant and applicable threshold concentrations. This representative concentration term was estimated by the 95% Upper Confidence Limit of the Mean (95% UCL) of the concentration for materials to be sent off-Site for disposal, and the 95% UCL for soils that may be managed on-Site (for comparison only). The ProUCL software version 4.00.04 was used to calculate the 95% UCL (Singh et al., 2009a).

The use of 95% UCL concurs with USEPA statistical guidance in developing a conservative estimator of the mean concentration of soil constituents or contaminants (USEPA, 2002b). The estimated 95% UCL was used to evaluate whether the soil concentrations of total lead and leachable lead exceeded the appropriate threshold criteria. If non-detects were present, the summary statistics (mean and standard deviation) and the 95% UCL were estimated based on the Kaplan-Meier (KM) method (Singh et al., 2009a) in this analysis. Also, the results of primary and duplicate samples were averaged in order to obtain a single value. Samples collected from various depths of the same boring location were considered to be independent data points in this statistical evaluation.

In general, total lead soil samples in which the respective concentrations did not exceed ten times the STLC criteria (50 mg/kg) were not extracted/analyzed with the WET and DI-WET techniques, and soil samples in which the respective concentrations did not exceed twenty times the STLC criteria (100 mg/kg) were not extracted/analyzed with the TCLP technique. As a result, this greatly reduced the number of data points which could be included in the statistical analysis for leachable lead and would also skew the 95% UCL results high (for WET, DI-WET, and TCLP estimates), as only the samples with high total lead concentrations would be included. Therefore, to estimate WET, DI-WET, and TCLP lead concentrations in locations where the samples were not extracted and analyzed, regression equations were developed between existing total and WET, DI-WET, and TCLP lead results. Using the regression equations, WET, DI-WET, and TCLP lead concentrations for samples which were not analyzed for them were estimated. The 95% UCLs for leachable lead, using these estimated WET, DI-WET, and TCLP lead concentrations, in combination with those analyzed by the laboratory, were then obtained as discussed below.

The Site representative concentrations were evaluated by first performing an exploratory data analysis. The objective of the exploratory data analysis was to discover trends and patterns in the data so that appropriate approaches and limitations in using the datasets could be identified. Both numerical and graphical methods of exploratory data analysis were performed.

For the numerical method, a table of basic summary statistics, including mean, standard deviation, minimum and maximum detected values, for raw data (i.e., no logarithmic transformation) was prepared. For WET and DI-WET lead, the summary statistics were also calculated for the combined dataset including both laboratory-reported values and regression-estimated values. These statistics are presented in Table 7 of this report and can be used to make inferences concerning the population from which the sample data were drawn.

The next step involved a test of distributional assumption for the dataset, and the ProUCL software was used in this process. The purpose of this step was to check whether the data (raw or log-transformed) could be assumed to be normally distributed and/or the data (raw only) could be assumed to follow a gamma distribution. Based on the results of this evaluation, an appropriate probability distribution could be assumed for the data to be used in the calculation of the 95% UCL in the next step.

The Shapiro-Wilk W test was used to test the normality of the dataset at a 5% significance level (i.e., 95% confidence level), as described in the USEPA guidance document titled *Data Quality Assessment: Statistical Methods for Practitioners* (USEPA 2006). The test was first applied to

raw data. If the raw dataset passed the normality test, the raw data were assumed to be normally distributed. If the raw data did not pass the normality test, a gamma distribution goodness-of-fit test (at a 5% significance level) was then applied to the data, and if the dataset passed the gamma distribution goodness-of-fit test, the data were assumed to follow a gamma distribution. Otherwise, the Shapiro-Wilk *W* test (at a 5% significance level) was applied to the log-transformed data. If the log-transformed data passed the normality test, the data were assumed to be lognormally distributed. If the data failed all three tests, the data were assumed to be non-parametric. In all cases, visual inspection of the shape of histograms and normal probability plots was performed to confirm the distributional assumption. The results of this distributional test are presented under the column heading “Goodness-of-Fit Test” “Distribution” in Table 7.

For datasets without nondetect:

If the data were determined to be normally distributed, the 95% UCL was calculated as follows (USEPA, 2002b):

$$UCL = \bar{x} + t_{1-\alpha, n-1} \frac{s}{\sqrt{n}}$$

where \bar{x} = sample mean

t = the Student t value at α significance level, with $n-1$ degree of freedom

α = 0.05 (one-tailed)

n = sample size

s = sample standard deviation

Otherwise, if the data were determined to follow a gamma or lognormal distribution, or if non-parametric assumption was used, the 95% UCL was determined based on the recommendation of the ProUCL software, which takes into account sample size and data skewness and ensures adequate coverage of the 95% UCL (Singh et al., 2009b). Depending on the sample statistics, the ProUCL software generally recommended one of the following methods:

- For gamma distribution, Approximate Gamma UCL or Adjusted Gamma UCL.
- For lognormal distribution, Chebyshev Theorem using the minimum variance unbiased estimator (MVUE) of the parameters for a lognormal distribution, or Land’s H-statistic.
- For a non-parametric assumption, Chebyshev Theorem using the sample arithmetic mean and standard deviation, or the Hall’s bootstrap method.

For datasets with nondetect(s):

For total lead datasets, data were censored at the laboratory reporting limit of <1 mg/kg. For WET and DI-WET lead datasets, because a combined laboratory-reported values and regression-estimated values were used, in addition to the laboratory-reporting censoring <0.1 mg/L, all regression-estimated values fell below 0.1 mg/L were also assigned to be <0.1 mg/L.

If the data were normally distributed and/or if the data were symmetric or approximately symmetric, the KM (t) method (i.e., Kaplan-Meier estimates using the Student’s t -distribution

cutoff value) was used to calculate the 95% UCL. The equation to compute UCL was the same as the one illustrated above, except that the sample mean and sample standard deviation were substituted by KM estimates of mean and standard deviation.

If the data were assessed to follow a gamma or lognormal distribution, or if the data were assumed to be non-parametric with moderate and high skewness, one of the following methods, in general, was recommended by the ProUCL software for the calculation of UCL:

- UCL based upon KM estimates using the Chebyshev inequality.
- UCL based upon KM estimates using the bias-corrected accelerated (BCA) bootstrap method.

The detailed statistical steps of the various methods described above are documented in the ProUCL software technical guide (Singh et al., 2009b). The recommended calculation methods and UCL results, by the ProUCL software, are presented under the column heading “Method of UCL Calculation” and “Assessed 95% UCL” in Table 7.

If all samples were nondetects, or if there was only one single detected result, the UCL was not calculated because of inadequate information on data distribution, and estimates of summary statistics, such as mean and variance, were unreliable. If the recommended UCL was greater than the maximum detected value, an alternative UCL may be selected from the ProUCL report (instead of the recommendation) to better and realistically represent the mean concentration term.

Statistical Evaluation Limitation

Statistical evaluations described below have been prepared for specific areas of the Site. Performing statistical evaluations on a specified segment of the project reduces the negative impacts of isolated areas with high concentrations of lead. If soils are not managed based on the stages and groups described above and analyzed below, or if limited excavation and disposal of soil is performed, the statistical evaluations become invalid and additional statistical evaluation or sampling may be required.

4.1.1 Initial Soil Disposal Assumptions

A total of five samples exceeded the maximum concentration of total lead or DI-STLC lead at which reuse is permitted. The five samples removed from the statistical evaluation are S-1-5@0.5', S-1-6@0.5', S-3-3@0.5', S-3-10@0.5', and N-2-11@1.0' (as a result of this boring, soil at N-2-11@0.5' will also be excavated and off-hauled and has been removed from the sample set). In addition, boring N-1-4 exhibited higher than typical lead concentrations that would have negatively impacted reuse opportunities, and so all results from this boring were removed from the analytical data set. Disposal recommendations for these areas are discussed in Section 7.1.2.

4.1.2 Group 1

The 95% UCLM/Maximum Detection for total lead in this Group's soils are shown in Table 7; in summary the results were as follows:

- 0-1 ft: 687 mg/Kg
- 1-3 ft: 48.0 mg/Kg

The 95% UCLM/Maximum Detection for DI-WET lead in this Group's soils are shown in Table 7; in summary the results were as follows:

- 0-1 ft: 20.3 mg/L
- 1-3 ft: As the 95% UCLM/Maximum Detection for total lead for soils deeper than 1 ft was less than 50 mg/Kg, the DI-WET concentration is not required for the reuse evaluation.

Based on the Caltrans variance, the results for total lead and for DI-WET lead indicate that soils in Group 1 that are shallower than 1 foot bgs may be reused on-Site but restricted to locations more than 5 feet above the water table and must be covered with a pavement structure that will be maintained by Caltrans. Group 1 soils that are at depths greater than 1 foot bgs are not considered hazardous waste due to lead, and are not subject to the reuse restrictions of the Caltrans variance.

It is not known if all soil in this group can be reused on-site. In the event that soils must be disposed of outside the Caltrans ROW, the following statistical analysis applies:

The 95% UCLM/Maximum Detection for WET lead in this Group's soils are shown in Table 7; in summary the result was as follows:

- 0-1 ft: 37.6 mg/L
- 1-3 ft: As the 95% UCLM/Maximum Detection for total lead for soils deeper than 1 foot was less than 50 mg/Kg, the WET concentration is not required for the disposal evaluation.

Statistical analysis of TCLP results was not undertaken, as no individual TCLP lead result was greater than 5 mg/L.

Based on the Caltrans variance, the WET and TCLP lead results indicate that soils from depths shallower than 1 foot in this Group must be disposed of in a California hazardous waste landfill if removed from the Caltrans ROW. Soils at depths deeper than 1 foot, will not be considered California hazardous wastes if removed from the Caltrans ROW.

4.1.3 Group 2

The 95% UCLM/Maximum Detection for total lead in this Group's soils are shown in Table 7; in summary the results were as follows:

- 0-0.5 foot: 583 mg/Kg
- 0.5-3 ft: 84.4 mg/Kg

The 95% UCLM/Maximum Detection for DI-WET lead in this Group's soils are shown in Table 7; in summary the result was as follows:

- 0-0.5 foot: 20.6 mg/L

- 0.5-3 ft: 1.43 mg/L

The 95% UCLM/Maximum Detection for WET lead in this Group's soils are shown in Table 7; in summary the result was as follows:

- 0-0.5 foot: 25.2 mg/L
- 0.5-3 ft: 4.70 mg/L

Based on the Caltrans variance, the results for total lead and for DI-WET lead indicate that soils in the top 0.5 foot of this Group may be reused on-Site but restricted to locations more than 5 feet above the water table and must be covered with a pavement structure that will be maintained by Caltrans. Group 2 soils that are at depths greater than 0.5 foot bgs are not considered hazardous waste due to lead, and are not subject to the reuse restrictions of the Caltrans variance.

Statistical analysis of TCLP results was not undertaken, as only one of 88 soil samples exhibited TCLP lead results greater than 5 mg/L (S-1-7@1.0' with 5.0 mg/L TCLP lead).

Based on the Caltrans variance, the WET and TCLP lead results indicate that soils in this Group from depths shallower than 0.5 foot must be disposed of in a California hazardous waste landfill if removed from the Caltrans ROW. Soils at depths deeper than 0.5 foot, will not be considered California hazardous wastes if removed from the Caltrans ROW.

4.1.4 Group 3

The 95% UCLM/Maximum Detection for total lead in this Group's soils are shown in Table 7; in summary the results were as follows:

- 0-1 ft: 484 mg/Kg
- 1-3 ft: 40.8 mg/Kg

The 95% UCLM/Maximum Detection for DI-WET lead in this Group's soils are shown in Table 7; in summary the results were as follows:

- 0-1 ft: 9.74 mg/Kg
- 1-3 ft: As the 95% UCLM/Maximum Detection for total lead for soils deeper than 1 foot was less than 50 mg/Kg, the DI-WET concentration is not required for the reuse evaluation.

Based on the Caltrans variance, the results for total lead and for DI-WET lead indicate that soils in the top 1 foot of this Group may be reused on-Site but restricted to locations more than 5 feet above the water table and must be covered with a pavement structure that will be maintained by Caltrans. The results for total lead indicate that soils below 1 foot are not subject to the reuse restrictions of the Caltrans variance.

It is not known if all the soil in this Group can be reused on-site. In the event that soils must be disposed of outside the Caltrans ROW, the following statistical analysis applies:

The 95% UCLM/Maximum Detection for WET lead in this Group's soils are shown in Table 7; in summary the results were as follows:

- 0-1 ft: 33.9 mg/L
- 1-3 ft: 8.18 mg/L.

Statistical analysis of TCLP results was not undertaken, as only one of 70 soil samples exhibited TCLP lead results greater than 5 mg/L (N-1-18@0.5' with 6.8 mg/L TCLP lead).

Based on the Caltrans variance, the WET and TCLP lead results indicate that soils in the top 3 foot of this Group must be disposed of in a California hazardous waste landfill if removed from the Caltrans ROW.

4.1.5 Group 4

The 95% UCLM/Maximum Detection for total lead in this Group's soils are shown in Table 7; in summary the results were as follows:

- 0-1.5 foot: 634 mg/Kg
- 1.5- 3 ft: 35.4 mg/Kg

The 95% UCLM/Maximum Detection for DI-WET lead in this Group's soils are shown in Table 7; in summary the result was as follows:

- 0-1.5 foot: 13.0 mg/L
- 1.5-3 ft: As the 95% UCLM/Maximum Detection for total lead for soils deeper than 1 foot was less than 50 mg/Kg, the DI-WET concentration is not required for the reuse evaluation.

Based on the Caltrans variance, the results for total lead and for DI-WET lead indicate that soils in the top 1.5 foot of this Group may be reused on-Site but restricted to locations more than 5 feet above the water table and must be covered with a pavement structure that will be maintained by Caltrans. Soils below 1.5 feet are not subject to reuse restrictions of the Caltrans variance.

It is not known if all the soil in this Group can be reused on-site. In the event that soils must be disposed of outside the Caltrans ROW, the following statistical analysis applies:

The 95% UCLM/Maximum Detection for WET lead in this Group's soils are shown in Table 7; in summary the result was as follows:

- 0-1.5 foot: 13.0 mg/L
- 1.5-3 ft: As the 95% UCLM/Maximum Detection for total lead for soils deeper than 1.5 feet was less than 50 mg/Kg, the WET concentration is not required for the disposal evaluation

Statistical analysis of TCLP results was not undertaken, as no individual TCLP lead result was greater than 5 mg/L.

Based on the Caltrans variance, the WET and TCLP lead results indicate that soils in the top 1.5 foot of this Group must be disposed of in a California hazardous waste landfill if removed from the Caltrans ROW. Soils at depths deeper than 1.5 foot, will not be considered California hazardous wastes if removed from the Caltrans ROW.

4.1.6 Group 5

The 95% UCLM/Maximum Detection for total lead in this Group's soils are shown in Table 7; in summary the results were as follows:

- 0-1 foot: 257 mg/Kg
- 1-3 ft: 23.3 mg/Kg

The 95% UCLM/Maximum Detection for DI-WET lead in this Group's soils are shown in Table 7; in summary the result was as follows:

- 0-1 foot: 19.4 mg/L
- 1-3 ft: As the 95% UCLM/Maximum Detection for total lead for soils deeper than 1 foot was less than 50 mg/Kg, the DI-WET concentration is not required for the reuse evaluation.

Based on the Caltrans variance, the results for total lead and for DI-WET lead indicate that soils in the top 1 foot of this Group may be reused on-Site but restricted to locations more than 5 feet above the water table and must be covered with a pavement structure that will be maintained by Caltrans. The results for total lead indicate that soils below 1 foot are not subject to the reuse restrictions of the Caltrans variance.

Because design of the Site has not been completed, it is not known if all soil in this Group can be reused on-Site. In the event that soils must be disposed of off-Site, the following statistical analysis applies:

The 95% UCLM/Maximum Detection for WET lead in this Group's soils are shown in Table 7; in summary the result was as follows:

- 0-1 foot: 64.1 mg/L
- 1-3 ft: As the 95% UCLM/Maximum Detection for total lead for soils deeper than 1 ft was less than 50 mg/Kg, the WET concentration is not required for the disposal evaluation.

Statistical analysis of TCLP results was not undertaken, as no individual TCLP lead result was greater than 5 mg/L.

Based on the Caltrans variance, the WET and TCLP lead results indicate that soils in the top 1 foot of this Group must be disposed of in a California hazardous waste landfill if removed from the Caltrans ROW. Soils at depths deeper than 1 foot, will not be considered California hazardous wastes if removed from the Caltrans ROW.

The US 101 Auxiliary Lane Project proposes to widen two bridges and one box culvert to add auxiliary lanes in both directions of US 101. An investigation was performed at each of these structures to determine the presence or absence of asbestos or lead-based paint and identify work safety issues for site construction workers.

On April 27 and 28, 2009, Mr. Eduardo Ortega of URS accompanied certified asbestos and lead based paint inspectors Mr. Derrik Quach and Mr. Phillip Bradley of Kellco-Macs Labs of Hayward, California, for the collection of potential asbestos containing material (P-ACM) samples and potential lead-based paint (P-LBP) samples at each of the three structures. The results of these investigations are discussed in this section. A copy of the Kellco-Macs Lab laboratory report is included as Appendix F. Analytical results related to the investigations are included as Tables 8, 9, and 10.

5.1 INSPECTED STRUCTURES

The subject structures are scheduled for partial demolition in order to complete the widening improvements. The survey sites consist of the following two bridges and one culvert:

- Adobe Creek Bridge, 37-0174
- Matadero Creek Bridge, 37-0040
- Permanente Creek box culvert extension

The inspection performed was both visual and tactile. Samples were taken of suspect materials located at exterior of the survey area. The inspection was a reasonable attempt to find suspect materials by a competent inspector. If any non-sampled materials are uncovered during demolition, these should be submitted for asbestos and/or lead paint analysis.

5.2 POTENTIAL-ASBESTOS CONTAINING MATERIALS (P-ACM) INSPECTION

The EPA defines Asbestos Containing Material as any material that contains greater than 1% asbestos. Materials containing greater than 1% asbestos must be removed prior to demolition or renovation. Materials containing less than 10% can be submitted for further analysis by the Point Count method as described in Appendix F. If the Point Count method (and only the point count method) determines that the material contains less than 1% asbestos, it can be disposed of as non-hazardous asbestos containing construction waste. If materials containing less than 10% asbestos by Polarized Light Microscopy are not submitted for point counting, they must be presumed to be asbestos containing material and disposed of as hazardous asbestos waste.

5.2.1 Asbestos Inspection Details

URS provided the consulting oversight services related to the inspection and analysis of P-ACM within the Site. Samples of P-ACM were collected from the exterior of the structures as shown in the figures in Appendix F. Each collected sample was stored in a Zip-Loc® bag, with its original location marked and photographed. The number of samples collected was judged sufficient to provide adequate characterization of these materials.

Samples of P-ACM were analyzed by a certified laboratory using Polarized Light Microscopy (PLM), the recommended method of the U.S. Environmental Protection Agency (EPA). A brief description of the analytical procedures is included in Appendix F. A summary of the laboratory analyses of sampled P-ACMs (positive and non-detect results) is included in the attached tables. Detailed analytical results for sampled materials are included in Appendix F. The determination of a material to be an ACM was made either by direct sample testing or by homogeneity with at least one positive sample of the same material. Kellco-Mac's laboratory credentials are included in Appendix F.

In the event that non-sampled P-ACM is uncovered during future renovation/demolition activities, these materials should be sampled and submitted for asbestos analysis.

5.2.2 Asbestos Analytical Quality Control

For every ten field samples, the laboratory performs a Quality Control (QC) duplicate sample. These samples were submitted and analyzed and compared to the original results. The QC analytical results are on file.

5.2.3 Asbestos Analytical Results

P-ACM samples were collected from each structure as follows:

- 15 samples were collected from Adobe Creek Bridge
- 15 samples were collected from Matadero Creek Bridge
- 18 samples were collected from the Permanente Creek box culvert

Figures and pictures displaying the locations of the samples collected and photographs are included in Appendix F. Laboratory analysis indicated that none of these bulk samples were ACM with at least 1% asbestos content. Table 8 list sampled material that tested non-detect, for ACM.

5.3 POTENTIAL-LEAD-BASED PAINT (P-LBP) INSPECTION

The EPA and define LBP as paint or other surface coatings that contain lead greater than 1 milligram per square centimeter (mg/cm²) which is equivalent to 50 parts per million (ppm), or that having a lead content at least 0.5% by weight. The regulations on lead exposure require that a Negative Initial Determination for lead exposure be made for paint that contains greater than 0.06% (600 ppm) of lead, and a worker protection program that incorporates elements such as work practices, training, personal protection equipment and respiratory protection be implemented pursuant to OSHA regulatory requirements. Removal or disturbance of material with any detectable amount of lead paint must be handled in accordance with OSHA regulations. Structural components with intact lead paint and no other hazardous materials can be disposed of as non-hazardous construction waste. Paint chips and debris must be disposed of as lead containing hazardous waste.

5.3.1 P-LBP Inspection Details

URS provided consulting oversight services related to the inspection and analysis of P-LBP within the Site. Samples of P-LBP were collected from the exterior of the structures. Each collected sample was stored in a sealed plastic container, its original location marked and photographed.

Samples of P-LBP were analyzed by a certified laboratory using Atomic Absorption (AA), the recommended method by the EPA. A brief description of the analytical procedures is included in Appendix F. A summary of the laboratory analyses of sampled P-LBP (positive and non-detect results) is included in Tables 8 and 9. A copy of detailed analytical results for sampled materials and Kellco-Mac's laboratory credentials are included in Appendix F.

In the event that non-sampled P-LBP is uncovered during future demolition activities, these materials should be sampled and submitted for lead analysis.

5.3.2 Lead Based Paint Analytical Quality Control

For every ten field samples, the laboratory performs a Quality Control (QC) duplicate sample. These samples were submitted and analyzed and compared to the original results. The QC analytical results are on file.

5.3.3 Lead Based Paint Analytical Results

P-LBP samples were collected from each structure as follows:

- 2 samples were collected from Adobe Creek Bridge
- 2 samples were collected from Matadero Creek Bridge
- 3 samples were collected from the Permanente Creek box culvert

Laboratory analysis indicated that both samples collected from the Adobe Creek Bridge and one sample collected from the Matadero Creek Bridge were LBP having at least 1 mg/cm² (50 ppm). The highest detected lead concentration at Adobe Creek Bridge was 113 ppm; the highest detected lead concentration at Matadero Creek bridge was 108 ppm. Tables 9 and 10 list sampled materials from the Site that are respectively above or below the regulatory limits for LBP. Figures illustrating the locations of the samples collected and photographs are included in Appendix F; field sample identifications shown on the figures are cross-referenced in Tables 9 and 10. A brief synopsis of LBP found in tested materials at the Adobe Creek and Matadero Creek Bridges follows:

- Adobe Creek Bridge:
 - Grey paint on concrete on NB 101 Adobe Creek Bridge Barrier Wall, near the southern end
 - Orange/grey/black paint on SB 101 southern wall
- Matadero Creek Bridge:

- Gray, flaking paint, on concrete, NE end of wall.

Paint of the same color on the same bridge, as those noted above, should be considered positive unless proven otherwise by direct sampling with results of non-detect (at or above the detection limit of 1.0 mg/Kg). Disposal requirements for materials containing LBP are discussed in Section 7.2.2.

In addition to the general soils investigation performed to determine soil reuse or disposal requirements, primarily due to the presence of ADL, several borings were advanced with soil and/or groundwater samples collected to preliminarily evaluate areas outside the existing right-of-way which may be acquired as part of the project, or to evaluate areas which were identified in the ISA as having been potentially impacted due to off-Site contamination. These areas are discussed in this Section.

6.1 POTENTIAL RIGHT-OF-WAY ACQUISITIONS

Soil and groundwater samples were collected at three potential right-of-way acquisition areas for preliminary evaluation (N-1, N-3-5 and N-3-10). These sampling efforts were primarily intended to determine the reuse and disposal requirements associated with the soil and to preliminarily screen the areas for contamination; the sampling efforts were not intended to provide sufficient information to certify the presence or absence of 'significant contamination' as typically required by Caltrans prior to right-of-way acquisition. The results of these sampling efforts are described below.

6.1.1 Boring N-1

Boring N-1 was advanced adjacent to the on-ramp from southbound Amphitheater Parkway to northbound US 101, adjacent to a property identified as the Peery Property. The boring was advanced to first encountered groundwater. One groundwater sample was collected and soil samples were collected from 1.0 and 7.0 ft bgs. Both soil samples and the groundwater sample were analyzed for Cam 17 Metals, DITPH-g, BTEX, 5 Gas Oxygenates, VOCs, TPH-d, and TPH-mo. In addition, the shallow soil sample was also tested for STLC Chromium and Hexavalent Chromium.

Total Lead was detected in both soil samples at concentrations at detections of 20 and 3.2 mg/Kg respectively. As this sample was collected at a later date than all other samples, and the detected concentrations were less than 50 mg/Kg, the results from this boring were not included in the statistical evaluation. Soil from this area is not subject to the Caltrans Variance.

Total Chromium was detected in sample N-1@1' at 63 mg/Kg, which is above the 10 x STLC level of 50mg/Kg, while sample N-1@7' had Total Chromium just below the 10 x STLC limit (49 mg/Kg). STLC Chromium and Hexavalent Chromium were run on the N-1@1' sample, but were not detected above the regulatory levels.

TPH-mo was detected in the two soil samples at concentrations of 140 and 6.7 mg/Kg respectively, while the VOC Methylene Chloride was detected at a concentration of 12 ug/Kg in sample N-1@7'. In the groundwater sample, the VOCs 1,1-Dichloroethane, 1,1-Dichloroethene, and cis-1,2-Dichloroethene were detected at concentrations of 0.79, 2.4 and 1.1 ug/L respectively. In URS' opinion, these concentrations do not require further testing to determine soil reuse and soil disposal, however they may qualify as contamination subject to further evaluation prior to right-of-way certification. No other constituent was detected at a concentration meriting further discussion.

6.1.2 Boring N-3-5

Boring N-3-5 was advanced at approximately station 175+00, directly adjacent to a potential right-of-way acquisition area that extends from approximately stations 173+00 to 179+00. The boring was advanced to first encountered groundwater. One groundwater sample was collected and soil samples were collected from 0.5, 1.0, 1.5, 2.0, and 3.0 ft bgs. One or more soil samples were analyzed for Cam 17 Metals, DI-WET Lead, WET Lead, TCLP Lead, pH, TPH-g, BTEX, 5 Gas Oxygenates, TPH-d, TPH-mo, PCBs, and OCPs. The groundwater sample was analyzed for the same list of analytes as well as for VOCs.

Total Lead, WET Lead, DI-WET Lead, and TCLP Lead were detected in one or more soil samples at concentrations within the typical range of detections for the project. These results were included in the statistical evaluation and therefore soil from this potential acquisition area is subject to the reuse and disposal recommendations discussed in Section 7. TPH-mo was detected at a concentration of 1,380 mg/Kg in the sample collected from 0.5' bgs. The VOC cis-1,2-Dichloroethene (cis-1,2-DCE) was detected at a concentration of 1.75 ug/L in groundwater. While these concentrations do not require further testing to determine soil reuse and soil and/or groundwater disposal, they may qualify as contamination subject to further evaluation prior to right-of-way certification. No other constituent was detected at a concentration meriting further discussion.

6.1.3 Boring N-3-10

Boring N-3-10 was advanced at approximately station 193+00, within a potential right-of-way acquisition area that extends from approximately stations 192+00 to 196+00. The boring was advanced to first encountered groundwater. One groundwater sample was collected and soil samples were collected from 1.0, 3.0, and 6.0 ft bgs. One or more soil samples were analyzed for Cam 17 Metals, pH, TPH-g, BTEX, 5 Gas Oxygenates, TPH-d, TPH-mo, PCBs, and OCPs. The groundwater sample was analyzed for the same list of analytes as well as for VOCs.

Total Lead was detected in at low concentrations compared to the typical range of detections for the project. These results were included in the statistical evaluation and therefore soil from this potential acquisition area is subject to the reuse and disposal recommendations discussed in Section 7. TPH-mo was detected at a concentration of 3,540 mg/Kg in the sample collected from 1.0 ft bgs; this detection represents the highest detection of TPH-mo within the Site. The VOCs cis-1,2-DCE, trans-1,2-Dichloroethene (trans-1,2-DCE), and Trichloroethene (TCE) were detected at concentrations of 61.8 ug/L, 5.8 ug/L, and 37.2 ug/L respectively in groundwater. While these concentrations do not require further testing to determine soil reuse and soil and/or groundwater disposal, they may qualify as contamination subject to further evaluation prior to right-of-way certification. No other constituent was detected at a concentration meriting further discussion.

6.2 POTENTIAL IMPACTS DUE TO OFF-SITE CONTAMINATION

Three locations at the project site were discussed during the Initial Site Assessment performed by Baseline Environmental Consultants, April 2008, to have likely been impacted by volatile

organic compounds (VOCs) or pesticides originating at several properties adjacent to the project area. Soil and groundwater samples were collected for each of these areas.

These locations include:

- San Antonio Road area (Boring S-2-3)
- Caltrans maintenance facility area near Old Middlefield Way (Boring S-3-12 and S-3-13)
- Area south of Amphitheater Parkway (Boring S-3-14)

Soil samples were collected from 0.5, 1.0, 1.5, 2.0, and 3.0 feet at each boring, and one groundwater sample was collected from Borings S-2-3, S-3-13, and S-3-14.

Based upon URS' Hazardous Materials Investigation Workplan, and the DTSC Lead Variance for Caltrans, the soil criteria soil criteria discussed in Section 3.1.1 have been used to evaluate the condition of soil at the Site.

7.1 CONCLUSIONS

A total of five samples exceeded the maximum concentration of total lead or DI-STLC lead at which reuse is permitted. The five samples removed from the statistical evaluation are S-1-5@0.5', S-1-6@0.5', S-3-3@0.5', S-3-10@0.5', and N-2-11@1.0' (as a result of this boring, soil at N-2-11@0.5' will also be excavated and off-hauled and has been removed from the sample set). In addition, boring N-1-4 exhibited higher than typical lead concentrations that would have negatively impacted reuse opportunities, and so all results from this boring were removed from the analytical data set. Soil associated with these borings may not be reused, and disposal recommendations for these areas are discussed in Section 7.1.2.

The smaller segments used in the statistical evaluation are described below.

Southbound

- Group 1: Construction adjacent to southbound lanes from the northern project limit to Station 113+00. This group was further split into subgroups 2A and 2B, for soil shallower and deeper than 1 foot bgs, respectively.
- Group 2: Construction adjacent to southbound lanes from Station 113+00 to the southern project limit. This group was further split into subgroups 2A and 2B, for soil shallower and deeper than 6 inches bgs, respectively.

Northbound

- Group 3: Construction adjacent to northbound lanes from northern project limit to Station 105+00. This group was further split into subgroups 3A and 3B, for soil shallower and deeper than 1.5 feet bgs, respectively.
- Group 4: Construction adjacent to northbound lanes from Station 105+00 to Station 159+00. This group was further split into subgroups 4A and 4B, for soil shallower and deeper than 1.5 feet bgs, respectively.
- Group 5: Construction adjacent to northbound lanes from Station 159+00 to the southern project limit. This group was further split into subgroups 8A and 8B, for soil shallower and deeper than 1 foot bgs, respectively.

The following conclusions have been prepared for specific areas of the Site based on analytical results obtained as part of this Site investigation. Performing statistical evaluations on a specified segment of the project reduces the negative impacts of isolated areas with high concentrations of lead. If soils are not managed based on the groups described above and analyzed in Section 4, or if limited excavation and disposal of soil is performed, the statistical evaluations become invalid and additional statistical evaluation and/or sampling may be required.

7.1.1 Lead – Soil Reuse

Soil reuse opportunities were summarized in Table ES-1, and shown on the attached Figures. Per the terms of the Caltrans variance, Caltrans may move lead-contaminated soil from one Caltrans project to another Caltrans project so long as it remains in the same Caltrans corridor, in this case US 101. This movement must comply with the terms of the variance. This Site Investigation Report has not evaluated the potential reuse of soil outside a Caltrans Corridor.

Southbound

Due to high concentrations of total lead and DI-WET lead, soil adjacent to the Southbound lanes from the following areas may be reused on-Site only at locations more than 5 feet above the water table and must be covered with a pavement structure that will be maintained by Caltrans:

- the top 1 ft of soil from the northern project limit to Station 113+00; and
- the top 6 inches of soil from Station 113+00 to the southern project limit

Soil excavated from deeper depths adjacent to the Southbound lanes exhibit lead and other constituents at concentrations which are not considered hazardous and therefore reuse of this soil will not be restricted.

Northbound

Due to high concentrations of total lead and DI-WET lead, soil adjacent to the Northbound lanes from the following areas may be reused on-Site only at locations more than 5 feet above the water table and must be covered with a pavement structure that will be maintained by Caltrans:

- the top 1.5 ft of soil from the northern project limit to Station 159+00; and
- the top 1 ft of soil from Station 159+00 to the southern project limit.

Soil excavated from deeper depths adjacent to the Northbound lanes exhibit lead and other constituents at concentrations which are not considered hazardous and therefore reuse of this soil will not be restricted.

7.1.2 Lead – Soil Disposal

In the event that soils must be disposed of off-Site, the following conclusions apply.

A total of five samples exceeded the maximum concentration of total lead or DI-STLC lead at which reuse is permitted. The five samples removed from the statistical evaluation are S-1-5@0.5', S-1-6@0.5', S-3-3@0.5', S-3-10@0.5', and N-2-11@1.0' (as a result of this boring, soil at N-2-11@0.5' will also be excavated and off-hauled and has been removed from the sample set). In addition, boring N-1-4 exhibited higher than typical lead concentrations that would have negatively impacted reuse opportunities, and so all results from this boring were removed from the analytical data set. Soil in the vicinity of these samples should be excavated and properly managed and disposed, prior to initiating soil reuse. Because these samples will be disposed of separately, they have been removed from the statistical evaluation. For each sample, excavation and disposal should be performed prior to initiating excavation for stockpiling and reuse.

Excavation for disposal should be performed along the entire width of excavation, for each area, and from the sample location to the midpoint between the sample and the nearest lateral samples. Excavation for disposal should be performed to the depth of sample for each area. Soil excavated associated with samples S-1-5@0.5' and S-3-3@0.5', should be managed as a RCRA hazardous waste due to presence of lead, while soil excavated associated with samples N-1-4 at all depths, S-1-6@0.5' S-3-10@0.5' and N-2-11@0.5 and 1.0 should be managed as a California hazardous waste due to the presence of lead. Limits of excavation and waste management associated with these locations are shown on the Figures.

Disposal of soil for the remainder of the project will be governed by California and/or RCRA hazardous waste regulations will vary based on excavation location and depth. Per the terms of the Caltrans variance, Caltrans may move lead-contaminated soil from one Caltrans project to another Caltrans project so long as it remains in the same Caltrans corridor, in this case US 101. This movement must comply with the terms of the variance.

Southbound

Due to high concentrations of WET lead, soil excavated at certain depths adjacent to the Southbound lanes, if removed from the Caltrans ROW, must be disposed of as a California hazardous waste, or disposed of out-of-state, due to the presence of lead. The affected areas are as follows:

- the top 1 ft of soil from the northern project limit to Station 113+00; and
- the top 6 inches of soil from Station 113+00 to the southern project limit

Soil excavated from deeper depths adjacent to the Southbound lanes exhibit lead and other constituents at concentrations which are not considered hazardous.

Northbound

Due to high concentrations of WET lead, soil excavated at certain depths adjacent to the Southbound lanes, if removed from the Caltrans ROW, must be disposed of as a California hazardous waste, or disposed of out-of-state, due to the presence of lead. The affected areas are as follows:

- the top 3.0 ft of soil from the northern project limit to Station 105+00
- the top 1.5 ft of soil from Station 105+00 to Station 159+00; and
- the top 1 ft of soil from Station 159+00 to the southern project limit.

Soil excavated from deeper depths adjacent to the Northbound lanes exhibit lead and other constituents at concentrations which are not considered hazardous and therefore reuse of this soil.

7.1.3 Other Contaminants of Concern in Soil

As described in detail in Sections 3.1.3, various numbers of samples were analyzed for pH, asbestos, OCPs, PCBs, TPH-g, TPH-d, TPH-mo, BTEX, VOCs, and for the 5 Gas Oxygenates.

None of these constituents were detected at a value or concentration which exceeded applicable State or Federal hazardous waste criteria, or for constituents for which no specific criteria has been established, require additional testing or evaluation, in the opinion of URS. Therefore, these constituents do not restrict reuse of soil or require disposal of soil as a California or RCRA hazardous waste. Results are included as Table 4, and raw analytical reports are included on CD as Appendix E.

7.1.4 Right-of-Way Acquisition

Limited sampling was performed within or immediately adjacent to areas which are expected to be acquired to construct the proposed project. These samples were associated with borings N-1, N-3-5 and N-3-10. Samples collected in the latter two of these areas were included in the statistical evaluation of soils scheduled for reuse, and the soil is thus subject to the conclusions for soil reuse and disposal based on the presence of lead, discussed in Sections 7.1.1 and 7.1.2. Samples collected from the N-1 boring were not included in the statistical evaluation, however lead was not detected at concentrations above the 10 x STLC limit, and therefore soil from this area is not subject to the Caltrans Variance or the conclusions in Sections 7.1.1 and 7.1.2 of this report.

All three of the above samples were also analyzed for additional constituents, and the results of those analysis indicated that the soil represented by these samples do not constitute a hazardous waste. URS notes that the highest detected concentration of TPH-mo within the Site of 3540 mg/Kg was collected at sample N-3-10@1.0', within a right-of-way acquisition. Several VOCs were detected in groundwater samples N-1-GW and N-3-10-GW, including TCE at a concentration of 37.2 ug/L, and the VOC Methylene Chloride was detected in soil sample N-1@1' at a concentration of 12 ug/Kg. These detections indicate that additional characterization of these areas are necessary to certify the presence or absence of 'significant contamination' as typically required by Caltrans prior to right-of-way acquisition.

7.1.5 Groundwater

During URS' environmental investigation, groundwater was typically encountered at a depth of approximately 10 feet bgs. Based on URS' geotechnical investigation, which was performed in the summer of 2009, depth to groundwater varied throughout the Site, ranging from approximately 8 feet to 12 feet bgs. Accordingly, reuse of soil may be constrained because soil reuse restrictions limit reuse to at least 5 feet above the groundwater table.

Groundwater samples associated with the environmental investigation were collected primarily adjacent or downgradient of properties identified as potentially impacting the Site in the ISA, at properties scheduled for right-of-way acquisition, or at the locations of bridges where the deepest excavations might be expected. As discussed in Section 3.2, no constituent of concern was detected at a concentration which exceed State or Federal hazardous waste criteria, or for constituents for which no specific criteria has been established, require additional testing or evaluation, in the opinion of URS. Therefore, these constituents do not require disposal of groundwater as a California or RCRA hazardous waste.

7.1.6 Asbestos/Lead Based Paint

The following subject structures are scheduled for partial demolition as part of the widening improvements and were surveyed for asbestos and lead-based paint.

- Adobe Creek Bridge
- Matadero Creek Bridge
- Permanente Creek box culvert extension

Asbestos was not detected in any sample, at any bridge. Lead based paint was detected in the following samples:

- Adobe Creek Bridge:
 - Grey paint on concrete on NB 101 Adobe Creek Bridge Barrier Wall, near the southern end
 - Orange/grey/black paint on SB 101 southern wall
- Matadero Creek Bridge:
 - Gray, flaking paint, on concrete, NE end of NB 101 wall.

7.2 RECOMMENDATIONS

URS makes the following recommendations relating to soil, groundwater, and demolition debris handling during construction:

7.2.1 Soil

If soil is to be excavated and removed from the Caltrans ROW, the disposal location should be reviewed and approved by the VTA and Caltrans prior to granting approval for the contractor to move the soil. The investigation data results reported herein are considered sufficient to characterize the soil for reuse or disposal.

If soils of unusual color or odorous soils are encountered during the project excavations or soil management activities, those soils should be stockpiled separately and subjected to additional sampling and analysis to further evaluate potential contamination.

The following recommendations have been prepared for specific areas of the Site. Performing statistical evaluations on specified segments of the project reduces the negative impacts of isolated areas with high concentrations of lead. If soils are not managed based on the groups described above and analyzed in Section 4, or if limited excavation and disposal of soil beyond that specifically described in Section 4.1.1 is performed, the statistical evaluations become invalid and additional statistical evaluation or sampling are required.

Reuse and disposal of soil for the Site is discussed in detail in Sections 7.1.1 and 7.1.2. Based upon reuse recommendations significant volumes of excavated material used for backfill must be placed at least 5 feet above the groundwater table. The lead-impacted soil may be reused as a component of lime-treated subbase. The depth to groundwater varies from approximately 8 to 15 feet.

Because of high concentrations of lead throughout the project site, URS recommends development and implementation of a site-specific health and safety plan to protect workers and the public from exposure risks due to lead. This health and safety plan will likely require workers to receive HAZWOPER 24 or 40 hour training prior to beginning field work. The health and safety plan should consider concentrations of all detected constituents, and in particular the presence of arsenic, nickel, chromium, lead, asbestos, OCPs, and TPH-mo in soil.

7.2.2 Right-of-Way Acquisition Area

A work plan should be developed to evaluate potential right-of-way acquisition areas for contamination due to detected concentration of TPH-mo in boring N-3-5, and TPH-mo and VOCs in borings N-1 and N-3-10.

7.2.3 Groundwater

Based upon reuse recommendations most excavated material used for backfill must be placed at least 5 feet above the groundwater table. The depth to groundwater varies from approximately 8 feet to 15 feet throughout the project corridor.

Based upon URS' groundwater investigation, groundwater at the Site may be disposed of as a non-hazardous waste.

If groundwater observed in excavations or during dewatering exhibit odors or sheet, this groundwater should be stored separately additional sampling and analysis to further evaluate potential contamination, prior to continued worker contact or disposal.

URS recommends development and implementation of a site-specific health and safety plan to protect workers and the public from exposure risks due to contact with groundwater.

7.2.4 Structural Demolition Debris

Asbestos has not been detected in any sample at any of the three bridges scheduled for retrofit and/or widening as part of the Project. Lead based paint has been detected in samples collected from both the Adobe Creek Bridge and the Matadero Creek Bridge. URS recommends that all paint from both bridges be considered lead-containing. One sample of gray paint, collected from the northeast end of the NB 101 wall, was identified as flaking. Any flaking paint identified as lead-containing must be scraped to the concrete substrate and properly managed and disposed as a lead-containing hazardous waste. Provided that the remainder of the paint remains in good condition (no chipping and peeling), it may be disposed of by the disposal contractor with the demolition debris as non-hazardous, construction waste, following all proper waste profiling

procedures, and all proper procedures and disposal regulations for demolition of a structure. Lead removal and demolition activities should be performed in compliance with all federal, state and local regulations under proper engineering control procedures. Abatement supervision, environmental area, and clearance air monitoring should be performed during the lead removal and demolition by a third party environmental firm employed by the property owner or owner's representative. The abatement contractor, per Cal-OSHA requirements, should conduct employee exposure monitoring of individuals working in proximity of the lead containing material during abatement and/or demolition activities.

This report was prepared for the Santa Clara Valley Transportation Agency and any use by third parties is at the third parties sole risk. No investigation is sufficient enough to explore the presence of hazardous material at every location on the site. It is assumed that the samples collected and analyzed in accordance with the agreed scope of work are representative of conditions at the Site at the time of the planned construction. If soil or groundwater conditions are observed that differ from those in this report, URS Corporation should be notified so that additional recommendations can be made.

It would be extremely expensive, and perhaps impossible, to conduct a Site reconnaissance or investigation that would ensure detection of all materials at the subject property that might be considered hazardous now or in the future. URS' failure to discover hazardous materials through a reasonable and mutually agreed-upon limited scope of work does not guarantee that hazardous materials do not exist in an area. Similarly, an area that is unaffected by hazardous materials at the time of our assessment may later, due to natural phenomena or human intervention, become contaminated.

Notes:

EPA = US Environmental Protection Agency
mg/Kg = milligrams per kilogram
STLC = Soluble Threshold Limits Concentrations
TCLP = Toxicity Characteristic Leaching Procedure
NE = Not Established
-- = sample not analyzed for specified analyte

Bold indicates value exceeds 10 x STLC

The symbol "<" (less than) indicates that the analyte was not detected at a concentration above the laboratory detection limit specified.

Notes:

EPA = US Environmental Protection Agency

mg/L = milligrams per liter

mg/Kg = milligrams per kilogram

STLC = Soluble Threshold Limits Concentrations

TCLP = Toxicity Characteristic Leaching Procedure

NE = Not Established

-- = sample not analyzed for specified analyte

Bold indicates value exceeds Criteria

The symbol "<" (less than) indicates that the analyte was not detected at a concentration above the laboratory detection limit specified.

EPA = US Environmental Protection Agency

NE* Due to insufficient sample mass available, no extraction was performed on requested sample.

Notes:

EPA = US Environmental Protection Agency

mg/Kg = milligrams per kilogram

ug/Kg = micrograms per kilogram

STLC = Soluble Threshold Limits Concentrations

TCLP = Toxicity Characteristic Leaching Procedure

NE = Not Established

-- = sample not analyzed for specified analyte

Bold indicates value exceeds 10 x STLC

The symbol "<" (less than) indicates that the analyte was not detected at a concentration above the laboratory detection limit specified.

* Asbestos samples with detections above reporting limits were further tested using EPA Method 600/R-93/116 with CARB 435 Prep (Milling) Level A for 0.25% Target Analyte Sensitivity

Notes:

EPA = US Environmental Protection Agency

mg/L = milligrams per liter

ug/L = micrograms per liter

STLC = Soluble Threshold Limits Concentrations

TCLP = Toxicity Characteristic Leaching Procedure

NE = Not Established

-- = sample not analyzed for specified analyte

Bold indicates value exceeds 10 x STLC

The symbol "<" (less than) indicates that the analyte was not detected at a concentration above the laboratory detection limit specified.

Table 7 - Highway 101 Auxiliary Lanes Project: Summary Statistics and 95% UCL Results (Revised: 3/22/2010)

Parameter	Unit	Group	Summary Statistics - Raw Data				Detected and Nondetect Values			Summary Statistics - Data Included Predicted Values from Regression			Goodness-of-Fit Test	Upper Confidence Limit (UCL)		Notes	
			No. of Samples	Detection Rate	Mean	Std Dev	Min Detected	Max Detected	Reporting Limit of NDs	No. of Samples	Mean	Std Dev		Distribution	Method of UCL Calculation		Assessed 95% UCL
