Notes:																	
(1) If duplicates exist, the average of the duplicate results is used as a single data point.																	
(2) All samples collected at various depths at the same location are considered independent data points.																	
(3) If the dataset contains nondetects, summary statistics and UCLs are estimated by the Kaplan-Meier (KM) method when possible.																	
(4) Goodness-of-Fit Test at 5% significance level is used to test for distributional assumption.																	
(5) The distributional assumption from (4) is used to select the appropriate UCL calculation method. For normal distribution, the UCL is based on the t-statistics. For lognormal distribution, gamma distribution, and non-parametric assumption, the UCL is based on the recommendations from USEPA (2002) and Singh (2007).

March 12, 2009

BACKGROUND INFORMATION AND PROJECT DESCRIPTION

The U. S. 101 Auxiliary Lanes project consists of the segment of U. S. 101 between Embarcadero Road and State Route 85 (S.R. 85) located in the Cities of Mountain View and Palo Alto, in Santa Clara County within District 4 of the State of California Department of Transportation and within the VTA planning area (See Figure 1 for a Project Location and Vicinity Map). The project limits extend from Embarcadero Road and State Route 85, a distance of 3.2 miles (PM 48.97/52.17) and will be referred hereon as “the Site”.

The purpose of this project is to relieve existing and future traffic congestion at freeway on-ramp and off-ramp connections, improve safety along the US 101 corridor, provide for improved local access over this segment of the U.S. 101 corridor. Auxiliary lanes would improve traffic operations on the freeway by providing more room for traffic entering and exiting the freeway at each interchange to merge and by allowing local traffic that is only going from one interchange to the next to use the freeway without impacting the main through lanes.

This project proposes to construct auxiliary lanes, extend existing second High Occupancy Vehicle (HOV) lanes, and undertake associated ramp improvements including ramp widening and installing/activating ramp metering in both directions. The proposed improvements include widening of creek crossings and relocation of sign structures, storm drainage and other utilities. As a result of these proposed improvements soil will be excavated along U.S. 101, at interchanges, and at creek crossings.

Two creek crossing bridge structures and one box culvert crossing structure are planned to be widened:

- Adobe Creek Bridge, 37-0174 - the proposed improvements will include widening both sides of the Adobe Creek Bridge by approximately 11 feet in the northbound and southbound directions, closing the gaps between the U.S. 101 bridges and the adjacent frontage road bridges. The proposed structure type is a single-span precast, prestressed rectangular girder with a cast-in-place concrete deck.
- Matadero Creek Bridge, 37-0040 - the proposed improvements will include widening on both sides of the structure by approximately 12 feet in the northbound and southbound directions. This will close the gaps between the U.S. 101 bridges and the adjacent frontage road bridges. The proposed structure type is a two-span precast, prestressed concrete voided slab.
- Permanent Creek box culvert crossing – the proposed improvement will likely include either extending the box culvert or building a small bridge structure adjacent to the current culvert.

This Hazardous Waste Materials Investigation Work Plan describes the procedures for completing Task 2.6 “Initial Hazardous Waste Soil Investigation” and Task 2.16 “Asbestos/Lead Based Paint Investigation” included in the US 101 Auxiliary Lanes Project Scope of Work dated January 8, 2009. The overall purposes of Hazardous Waste Materials Investigation are evaluate the soil conditions for on-site use, off-site disposal of

site soils, assess the bridges and culvert scheduled for retrofit for the presence of asbestos or lead-based paint and identify work safety issues for site construction workers.

This hazardous waste materials investigation will provide analytical data of soil materials and bridge materials in locations of the following existing structures requiring modifying and widening, and new structure:

- Adobe Creek Bridge, 37-0174
- Matadero Creek Bridge, 37-0040
- Permanente Creek box culvert extension
- Highway soil materials

Several locations at the project site were discussed during the Initial Site Assessment performed by Baseline Environmental Consultants, April 2008, to have likely been impacted by VOCs originated at several properties adjacent to the project area. These issues are being evaluated in this work plan. Samples will be collected within the existing Caltrans Right of Way at the nearest location to these areas as possible.

These locations include at least:

- San Antonio Road area
- Caltrans yard area near Old Middlefield Way, and
- Area south of Amphitheater Parkway.

A site and project specific Health and Safety Plan for personnel completing field activities has been prepared for the hazardous materials and geotechnical investigations during this project and is attached in Appendix A.

CONTACT INFORMATION

The following table lists VTA's, Caltrans's and URS' contacts for this task.

Contact	Function	Office Phone
Lam Trinh	VTA Project Manager	(408) 952-4217
Paul Mai	Caltrans Project Manager	(510) 622-0754

Lisa Griggs	URS Health & Safety Manager	(408) 297-9585
Christopher Lillie	URS Project Engineer	(408) 297-9585
Stephen Huang	URS Geotechnical Task Leader	(408) 297-9585

INITIAL HAZARDOUS WASTE INVESTIGATION

URS will conduct a hazardous waste investigation study on the 3.2-mile U.S. Highway 101 Auxiliary Lanes Project from Embarcadero to State Route 85 (the Site) in the Cities of Mountain View and Palo Alto, in Santa Clara County. The primary focus of the investigation will be Aerial Deposited Lead (ADL) at the top 3 feet soil, historically deposited from leaded gasoline automotive emissions. The investigation will also include testing for other roadway potential contaminants for sites identified in the Initial Site Assessment (ISA) prepared by Baseline Environmental Consultants dated April 2008. These constituents include California Assessment Manual (CAM 17) Metals, Total Petroleum Hydrocarbons as Diesel and Motor oil (TPH-d/mo), TPH as Gasoline (TPH-g), Volatile Organic Compounds (VOCs) and 5 Gasoline Oxygenates, Polychlorinated Biphenyl (PCBs) and Organo-chlorine Pesticides (OCPs), pH, and Asbestos. Additionally, groundwater samples will be collected at select locations and analyzed for the same constituents except asbestos.

Soil excavation will be performed along the highway and sections of associated ramps, at Matadero Creek bridge and Adobe Creek bridge bents locations and at the area of the Permanente Creek box culvert extension. Soil excavation will be performed along the highway and sections of associated ramps, between the edge of the current asphalted pavement (including lanes and outer shoulders) and the limit of excavation and will hereafter referred in this report as “the highway excavation area”.

Although it is not known at this time where fill material may be placed, it is anticipated that the U.S. 101 Auxiliary Lines will be a balanced project, assuming that the existing soils to be excavated can be used on the project. If some existing soils cannot be used due to the presence of contaminants or soil compaction characteristics, those soils will require off-site use or disposal at an appropriate landfill in compliance with regulatory requirements, and corresponding amounts of additional clean imported soils will be needed.

URS will collect soil samples to evaluate potential soil uses on the project, disposal options off-site, support Right of Way acquisition processes, and to evaluate potential construction worker exposure to lead impacted dust. The ADL in soil analytical results will be evaluated statistically using Caltrans approved statistical methods. Additionally, URS will collect groundwater samples at selected locations for groundwater quality purposes.

URS reviewed the following documents in developing this Work Plan.

- *Initial Site Assessment – Portions of Route 85/US 101 Interchange Project, Mountain View, Santa Clara County, California*, prepared by Kleinfelder, January 28, 2003.
- *Initial Site Assessment - U.S. 101 Auxiliary Lanes Project (Embarcadero Road to Shoreline Boulevard, Palo Alto and Mountain View, California*, prepared by Baseline Environmental Consultants, April 2008.
- *U.S. 101 Auxiliary Lanes-Oregon Expressway to Shoreline Boulevard 04-4A330, Geotechnical Investigation-Field Work Plan*, prepared by URS, October 15, 2008.

REGULATORY ISSUES

Hazardous Waste Regulatory Criteria

The total concentrations of prescribed elements or compounds are regulated as hazardous waste in California if they exceed the Total Threshold Limit Concentration (TTLC) criteria, which can be found in Title 22 of the California Code of Regulations (CCR).

Leachable elements or compounds are also regulated in California based on the Soluble Threshold Leaching Characteristic (STLC) criteria, which can also be found in Title 22 of the CCR. URS will analyze samples for total suspected contaminant concentrations and subsequently evaluate the leachable components for select samples.

The California Waste Extraction Test (WET) is used to evaluate contaminant leachability from soils and other potential wastes for disposal in landfills. The Standard WET uses a citric acid solution as the extracting medium. The De-ionized (DI) WET version uses DI water as the extraction medium and is used to evaluate soil leachability for reuse on-site. Analytical results of the WET extracts will be analyzed and compared to the California STLC criteria for hazardous waste characterization or potential reuse. Analytical results for the DI-WET extracts will be compared to the Maximum Concentration Limits (MCLs) for evaluation of potential impacts to groundwater, if the soils are left in place. The Toxicity Characteristic Leaching Procedure (TCLP) is the Federal Resource Conservation and Recovery Act (RCRA) leaching procedure and is also used to evaluate contaminant leachability for hazardous waste characterization. The TCLP test is not as stringent as the California WET.

These tests will be run iteratively in the following order: WET, DI-WET, and TCLP based on the total metal concentrations in the samples. Samples with total lead concentrations exceeding 50 mg/kg will be extracted with the WET and the DI-WET and analyzed for lead. Samples with lead concentrations exceeding 100 mg/kg will be extracted with the TCLP and analyzed for lead. Evaluation of other contaminants may also require WET and TCLP leachability testing and evaluation if they exceed 10 or 20 times the STLC or TCLP criteria, respectively.

Lead in soil analytical results will be evaluated against the existing DTSC variance (described below), and California and Federal hazardous waste criteria.

Soils that exceed the TTLC and/or the STLC criteria must be managed, transported, and disposed of off-site as a California hazardous waste, if disposed of in California. Alternatively, California hazardous waste can also be disposed of in other states as non-hazardous. Soils that exceed RCRA criteria must be managed, transported, and disposed of off-site as Federal RCRA waste.

Department of Toxic Substances Control (DTSC) Variance for Aerially Deposited Lead (ADL) in Soil on Caltrans Right of Way

The following paragraphs outline the soil handling requirements in the most recently issued Caltrans District 4 lead-impacted soil handling variance by DTSC. If the soil contaminants exceed the prescribed criteria, the soil must be handled as a hazardous waste.

The following bullet points describe potential lead in soil concentrations and the corresponding regulatory restrictions that apply.

- Soil with total lead <50 mg/kg, are not subject to the reuse restrictions of the Caltrans ADL variance.
- Soil with total lead >50 mg/kg and <1411 mg/kg, with <0.5 mg/L extractable lead with the deionized waste extraction test (DI-WET) can be used for fill on-Site as long as it is more than five feet above the water table and must be covered with at least 1.0 foot of non-hazardous cover.
- Soil with >50 mg/kg and <3397 mg/kg total lead and >0.5 mg/L and <50 mg/L extractable lead with the DI WET can be used on the Right of Way (ROW) on-Site as long as it is more than five feet above the water table and must be covered with a pavement structure which will be maintained by Caltrans.
- Soil with >50 mg/kg and <3397 mg/kg total lead and >50 mg/L extractable lead with the DI WET must be disposed off-Site if removed from the Caltrans ROW.
- Soil with >3397 mg/kg total lead must be disposed off-Site if removed from the Caltrans ROW.
- For soil that must be disposed off-Site if removed from the Caltrans ROW:
 - Soil with <5.0 mg/L extractable lead with the standard waste extraction test (WET) is a non-hazardous waste and can be disposed in a non-hazardous waste landfill if removed from the Caltrans ROW.
 - Soil with >5.0 mg/L extractable lead with the standard WET and <5.0 mg/L extractable lead with the TCLP test is a California hazardous waste and must be disposed off-Site in a hazardous waste landfill if removed from the Caltrans ROW, or alternatively can be disposed of out of state, as non-hazardous soil.
 - Soil with >5.0 mg/L extractable lead with the TCLP test is a Federal RCRA waste and must be disposed off-Site in a hazardous waste landfill, if removed from the Caltrans ROW.
- Soil with pH <5.0 can only be reused on-Site if it is used below a paved surface.
- Soil may not be reused on the Caltrans ROW if it is considered hazardous due to the presence of any material other than lead.

PROPOSED INVESTIGATION

The purpose of our screening level investigation is to conduct sampling, chemical analysis, and evaluation of the chemical characteristics of soils to be excavated from the site and groundwater at select locations at the Site.

The evaluation results for soil will be used for the following identification purposes:

- Soil that is not subject to reuse restrictions to be used on-site or off-site for fill.
- Restricted soil to be used on-site for fill under the Caltrans ADL impacted soil variance, from the DTSC, in force during the construction period.
- Hazardous waste that must be removed from the site for off-site disposal at a hazardous waste landfill.
- Non-hazardous soils to be taken off-site for disposal due to excess soils generated by the project or because the geotechnical report indicates that the soils cannot be used for fill due to their poor compaction characteristics.
- Notification and potential required training of on-site workers, if potential contaminant levels warrant it.
- Guidance for development of follow-up soil investigations, if needed.

Based on the above factors, URS proposes to conduct a soil investigation at the highway excavation area, the Matadero Creek bridge and Adobe Creek bridge bent locations and the Permanente box culvert extension area. Soil will be evaluated for ADL, CAM 17 Metals, TPH-d/mo, TPH-g, VOCs and 5 Gasoline Oxygenates, PCBs and Pesticides (OCPs), pH, and Asbestos.

All the soil samples will be analysis and analyzed for total lead. 10 percent of these samples will also be analyzed for CAM 17 metals. Approximately 20 percent of the samples collected will be analyzed for asbestos using PLM Method, and 10 percent of samples will be analyzed for pH. At approximately 10 percent of sample locations, samples will be analyzed for TPH-D/Mo, TPH-G/BTEX, 5 Gas Oxygenates, PCBs and pesticides. TPH-g/BTEX and Gasoline Oxygenates will not be tested in the upper 6 inches due to the volatility of these components, and PCBs and Pesticides (OCPs) will only be tested in the upper 6 inches. Although the final analytical suite will be randomly determined for each soil sample during field work, analytical suites have been already established for soil samples collected at specific locations at the Site including:

- Two of the soil samples collected in the vicinity of the Caltrans yard will be also analyzed for VOCs.
- Soil samples collected at two Right of Way acquisition areas will be analyzed for the full analytical suite.
- Soil samples collected at the retaining wall area scheduled near Old Middlefield Way will be analyzed for the full analytical suite.

The groundwater investigation will be used to evaluate groundwater quality for the following purposes:

- To confirm potential impact to groundwater at those locations discussed at the ISA. Grab groundwater samples will be collected at these locations and analyzed for VOCs.
- To support acquisition processes at Right of Way areas. Grab groundwater samples will be collected at these areas and analyzed for the full analytical suite.
- To evaluate the suitability of dewatering system designs at the bridge locations and at the retaining wall scheduled near the Old Middlefield Way during the construction process. Grab groundwater samples will be collected at these locations and analyzed for the full analytical suite.

Sample locations are shown in the attached drawings.

HEALTH AND SAFETY PLAN

Safety of our staff is a priority. URS personnel have developed a site and project specific Health & Safety Plan (HASP) for personnel conducting the proposed fieldwork and similar geotechnical fieldwork associated with this project. This plan has been reviewed and signed by an office Health & Safety Officer based in San Jose, California. A copy of this HASP has been included as Appendix A.

PERMITS

Caltrans has granted encroachment permit 0408-NSV0710 to VTA and its consultant URS, allowing entry to the State Right of Way including US 101. This encroachment permit allows along US 101 shoulder closures between the hours of 9 AM and 3 PM, and lane closures along US 101 between the hours of 9 PM and 3 AM on weekdays. This permit specifies additional requirements, including work notification, shoulder and lane closure procedures, and personal protective equipment requirements. A copy of this permit has been included as Appendix B.

URS will mark and conduct utility surveys on all proposed sampling locations before the start of the field sampling efforts. An underground utility location contractor will be retained to evaluate the location of underground utilities at each boring location. Underground Service Alert (USA) will be notified of the planned boring locations so participating public utilities can provide the location of underground utilities in the area of the borings. Additionally, URS will review the results of potholing operations performed to determine the location of known utilities to aid in the project design efforts to ensure that borings to not impact these utilities.

A Caltrans-certified traffic control subcontractor will be retained to divert traffic away from the field crew and sampling rig when working along roadways. Shoulder closures, at minimum, will be required for all work adjacent to the outside lanes of US 101 and all work adjacent to entrance and exit ramps. Lane closures on the number one lane of the highway may be required at times. The attached encroachment permit regulates lane and shoulder closure times.

Sampling locations may be marked and surveyed during sampling operations to limit lane and shoulder closures. Sampling locations shown on the attached figures (Figures 2-18) are approximate and may be moved due to field conditions identified during the utility location fieldwork, accessibility, and crew safety considerations.

SAMPLING

URS will retain a drilling subcontractor to assist in the fieldwork sampling including both direct push and hand auger. URS personnel will supervise all fieldwork conducted under this Work Plan and will collect and ship the samples. URS proposes to use direct push sampling techniques to minimize cuttings collection and disposal. Where the direct push equipment cannot be used due to physical or other constraints, we will use hand auger sampling methods.

Boring locations at the Site will be labeled as follow:

- Between Embarcadero Road and San Antonio Road:, Boring locations will be labeled from west to east as N-1-1 through N-1-20 for the northbound side and S-1-1 through S-1-20 for the southbound side.
- Between San Antonio Road and Amphitheater Pkwy: Boring locations will be labeled from west to east as N-2-1 through N-2-15 for the northbound side and S-2-1 through S-2-10 for the southbound side.
- Between Amphitheater Pkwy and State Route 85: Boring locations will be labeled from west to east as N-3-1 through N-3-12 for the northbound side and S-3-1 through S-3-14 for the southbound side.

Sample Locations

- At highway excavation area: URS will collect representative soil samples of the excavation area at intervals perpendicular to the US 101 mainline and ramps. The location of these soil samples relative to the edge of traveled way will be rotated. Approximately 1/3rd of samples will be collected at each of the following areas: the edge of the pavement, midpoint between edge of pavement and limit of excavation. Soil samples will be collected approximately every 400-500 feet at a total of approximately 85 selected locations, as shown on the attached Drawings. The exact number of sample locations and the actual interval distances may change slightly based on field observations, access issues and available space at each location. These locations also include those at the Caltrans Yard area (S-3-12 and S-3-13), the Right of Way acquisition areas (N-3-5 and N-3-10) and the one located at the retaining wall area scheduled near Old Middlefield Way (S-3-11). A total of six groundwater will be collected in the highway excavation area including three groundwater samples at those locations discussed in the ISA (San Antonio Road area at sample S-2-3, Caltrans yard area near Old Middlefield Way at sample S-3-13, and area between Old Middlefield Way and North Shoreline Blvd at sample S-3-14); two groundwater samples at Right of Way acquisition areas (N-3-5 and N-3-10); and one groundwater sample at the scheduled retaining wall area (S-3-11).
- Bridges: Two bridges and a box culvert located along the US 101 mainline are scheduled for widening associated to the freeway widening. These bridges include

Adobe Creek Bridge, Matadero Creek Bridge and Permanente Creek Box Culvert. Bridge bents are scheduled at Adobe Creek and Matadero Creek bridges, while a box culvert extension is scheduled at Permanente Creek. The bridges are paved at the exact locations of the proposed bents, therefore soil samples will be collected at the closest exposed soil location. Soil samples will be collected at a total of 6 selected locations, two locations at each of the two bridges areas and two at the box culvert area, at northbound and southbound, as shown on the attached Drawings. A total of 3 groundwater samples will be collected including one at each of the bridges areas (N-1-8 and S-1-18) and one at the box culvert area (S-3-8).

Each sampling location will be recorded by GPS. All samples collected will be submitted for laboratory analysis. Analytical suite is discussed in Laboratory Analysis section.

Sampling Depths

Although excavations depths for the construction at the highway excavation area may vary between 2 and 5 feet, most excavation will be between 2 and 3 feet below existing grade. Additionally, it is URS experience that ADL impact are not expected at depths greater than 3 feet below ground surface (bgs). Therefore, borings will be advanced to maximum depth of 3 feet bgs or maximum excavation depth if less than 3 feet. Borings will be advanced to first groundwater found at those locations where groundwater sampling is scheduled. According to previous environmental investigation at the site, groundwater is expected at depths between five to eight feet bgs. Actual depth may change if refusal is encountered or utility locations require a change for safe work to proceed.

At each sampling location URS will collect soil samples at 0 to 0.5 ft, 0.5 ft to 1 ft, 1.0 ft. to 1.5 ft, 1.5 ft to 2 ft, and 2.5 ft. to 3.0 ft. Therefore approximately 450 soil samples will be collected and all samples will be analyzed for, at minimum, lead, as further discussed below.

Sample Collection Methods

Soil samples will be collected using three different sampling methods:

- Direct-push borings samples will be collected at those locations where no access problems are expected. This sample collection method can be advanced at a high rate and is intended to be the primarily sample collection method. These samples will be collected by driving an approximately 2-inch diameter sampler equipped with clean acrylic tube liners provided by the drilling subcontractor. Drive sampling equipment will be pressure-washed after each use.
- Hand auger samples will be collected at those locations where access problems are found.
- Geotechnical borings including Standard Penetration Test and/or Modified California Penetration Test methods may be used at those locations where geotechnical and environmental representative samples may be collected jointly.

Soil samples will be collected in clean soil sampling tubes and/or laboratory provided bottles, respectively. Each soil sample tube will be sealed with Teflon and plastic end caps. All samples will be labeled with site-specific unique numbers, placed on ice and shipped daily to a State of California certified analytical laboratory under URS chain of custody procedures.

Groundwater samples will be collected from direct-push borings using disposable bailers. Temporary screened PVC wells may be constructed to facilitate sampling at each location. No permanent installation, development, or surveying of the temporary wells are proposed. Temporary screened PVC will be left up to 4 hours to allow for sample collection. If no groundwater is present after that time boring will be closed and groundwater sample not collected.

At the end of each sampling day, the borings will be backfilled to the surface elevation with neat cement grout as per SCVWD requirements. The limited cuttings and decontamination water derived during the investigation activities will be drummed, sampled and analyzed separately for off-site disposal purposes. The investigation-derived waste (IDW) will be properly labeled and stored at a site, on the Right of Way, approved by Caltrans, until it can be analyzed and characterized for disposal. URS has assumed that no more than two drums of IDW will be generated during this phase of work.

Laboratory Analyses and Analytical Methodology

All the soil samples will be submitted for analysis and analyzed for total lead by EPA Method 6010. Up to 10 percent of these will also be analyzed for CAM 17 metals by EPA Method 6010 (which includes lead), and for pH. Up to 10 percent of the samples collected from intervals below 0.5 ft will be analyzed for TPH-d/mo by EPA Test Method 8015B, TPH-G/BTEX by EPA Test Method 8015B, and 5 Gas Oxygenates by EPA method 8260. Up to 10 percent of samples collected from the 0.5 ft interval will be analyzed for PCBs and pesticides by EPA Test Method 8081/8082. Up to 20 percent of the samples collected will be analyzed for asbestos using PLM Method. Two of the subsurface soil samples collected in the vicinity of the Caltrans yard will be also analyzed for VOCs using EPA Test Methods 8082/8260. Soil samples collected at Right of Way acquisition areas will be analyzed for the full analytical suit. Soil samples collected at the retaining wall area will be analyzed for the full analytical suit.

Groundwater samples will be analyzed for CAM 17 metals by EPA Method 6010 (which includes lead), pH, TPH-d/mo by EPA Test Method 8015B, TPH-G/BTEX by EPA Test Method 8015B, 5 Gas Oxygenates by EPA method 8260, PCBs and pesticides by EPA Test Method 8081/8082, and for VOCs using EPA Test Methods 8082/8260.

All TPH-d and TPH-mo sample extracts will be first extracted with silica gel to remove biogenic sources that could result in false positive results when required to obtain reliable analytical data.

Soil samples with a total lead content exceeding 50 mg/kg will be extracted with the Standard and De-ionized Water WET and analyzed for lead. Soils with total lead content over 100 mg/kg will be extracted with the TCLP test and analyzed for lead. According to URS experience in similar projects, it is estimated that up to 40 percent of the samples initially analyzed for lead may have to be analyzed for lead using WET and DI-WET procedures and that up to 20 percent of the samples initially analyzed for lead may have to be analyzed for lead using the TCLP procedure. Other constituents may also need leachability testing. If so, URS will notify VTA and Caltrans of such samples before ordering the additional leachability testing. All samples will be analyzed on standard turn around time (TAT) of 10 business days. Each iteration of leachability testing will add another 5-10 business days to the analytical schedule.

The goal of this analytical program is to obtain representative information of the quality of the soil to be excavated and groundwater. Therefore, the specific initial analytical suite for each sample will be determined during the field work depending on the actual number of samples collected, their distribution and field observations.

Additional sampling, testing, and statistics may be needed to reduce the volume of hazardous waste identified during the proposed round of investigation.

STATISTICAL ANALYSIS

The following analytical quality control procedures will be used to comply with Caltrans procedures. A calibration blank sample will be run for every ten samples or per batch which ever is more frequent. One sample in 15 will be duplicated in the field for quality control purposes. In the laboratory QC, one in ten field samples will be spiked with lead to ten times the detection limit or at the analyte level.

URS personnel trained in laboratory data review will review each data package submitted by the laboratory for data quality control. The data will then be tabulated and evaluated.

The evaluation will include comparison to the Caltrans District 4/DTSC variance, California's Title 22 hazardous waste regulations, Federal Resource Conservation and Recovery Act (RCRA) regulations, EPA Region IX Preliminary Remediation Goals (PRGs) and the San Francisco Bay Regional Water Quality Control Board (RWQCB) Environmental Screening Levels (ESLs). The 90% Upper Confidence Limit for lead in soil concentrations will be calculated for soil left on site for all soils and layers of soils. The 95% Upper Confidence Limit for lead in soil concentrations will be calculated for soils to be taken off-site. An additional statistical iteration will be conducted to evaluate "hotspot" soil removal, if needed. Recommendations will be made on handling the soil to comply with the regulations. Additional statistical iterations, sample analysis, or sample collection, if needed, can be conducted to evaluate other handling methods under a separate Work Plan.

STRUCTURE INVESTIGATION – ASBESTOS/LEAD BASED PAINT

The outside walls of bridges scheduled for demolition to allow for construction of bridge widening will be visually surveyed for potential Asbestos Containing Materials (P-ACMs). If potential ACMs are identified, samples will be collected and analyzed for asbestos to allow for characterization of these portions of bridges prior to demolition or disposal. Examples of materials that will be included in our visual survey for potential ACMs are abrasion pads between the bridge decks and the support structures and caulking/filler between the intersection of the bridge decks and the adjoining roadway surface. ACM will be initially analyzed by Polarized Light Microscopy (PLM) and 6010B, respectively. Samples with asbestos will be further analyzed by the Point Count Method to refine the asbestos content. URS will subcontract these sample collection and analysis activities to Kellco Macs Laboratory, a State of California certified asbestos analytical laboratory.

The following bridges will be assessed for potential Asbestos Containing Materials: Adobe Creek Bridge, Matadero Creek Bridge and Permanente Creek Culvert.

LIMITATIONS

This Workplan includes soil and groundwater sampling within the proposed Right of Way acquisition areas. This sampling is primarily to evaluate the soil within these areas for reuse and/or disposal. In addition, soil and/or groundwater samples collected within these areas will be screened for additional analytes based upon findings of the ISA document. However, this sampling does not constitute a “Phase II” Environmental Site Investigation for these areas, and it is possible that this sampling will not be sufficient to certify that the property is free from hazardous materials. URS may recommend additional sampling in these areas prior to acquisition, and this additional sampling is not included in this Workplan.

SIGNATURES

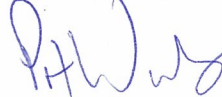

This Work Plan was prepared under the contract provisions between Santa Clara Valley Transportation Authority and URS Corporation. It will be done in accordance with the State of California, Department of Transportation guidelines and policies. By signature below, Caltrans and URS hereby approve the Work Plan and attached Health and Safety Plan (Appendix A).

TO: Santa Clara Valley Transportation Authority
3331 North First Street
San Jose, CA 95134

Attn: John Ristow
 Phone: (408) 321- 5713 , **PERMITTEE**

and subject to the following, **PERMISSION IS HEREBY GRANTED** to:

Perform field surveys, soil investigation and exploration, hazardous material testing, potholing and environmental traffic data measurements and conduct the required services to preclude nesting and roosting of swallows, swifts, and bats on structures for work under District Agreements No. 4-1869-C and No.4-1794-C, and 04239-EA262000, on State Highways 04-SCL-85,87,101,237,880, 152, 17,9, 25,35, 82, 130,156, 280, and 680, Post Mile Various, in Santa Clara County.

A minimum of one week prior to the start of work under this permit, notice shall be given and advance approval of construction detail, operation, public safety and traffic control shall be obtained from State Representative, J. Wong, 500 Queens Lane, San Jose 95112, (408) 452 7131, weekdays, between 7:30 AM and 4:00 PM .

All permitted work requires the permittee to apply for and obtain a work authorization number prior to the start of work. See the attached "Encroachment Permit Project Work Scheduling Procedures" and the attached "Permit Project Work Scheduling Request Form". Additional time beyond the minimum seven day advanced notice required in the above paragraph may be required for obtaining approval .

The following attachments are also included as part of this permit (*Check applicable*):

- Yes No General Provisions
- Yes No Utility Maintenance Provisions
- Yes No Storm Water Special Provisions
- Yes No A Cal-OSHA permit required prior to beginning work:

In addition to fee, the permittee will be billed actual costs for:

- Yes No Review
- Yes No Inspection
- Yes ----- Field Work

(If any Caltrans effort expended)

Yes No The information in the environmental documentation has been reviewed and considered prior to approval of this permit.

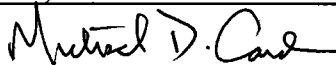

This permit is void unless the work is completed before May 31, 2010

This permit is to be strictly construed and no other work other than specifically mentioned is hereby authorized.
No project work shall be commenced until all other necessary permits and environmental clearances have been obtained.

APPROVED:

BIJAN SARTIPI, District Director

BY: 

MICHAEL D. CONDIE, District Permit Engineer

NAME: Santa Clara Valley Transportation Authority
PERMIT#: 0408-NSV0710
DATE: May 6, 2008

Before any work is begun which will interrupt the normal flow of public traffic, approval shall be obtained from State's representative, and closures shall be in accordance with the appropriate State Standard Plans T-10 through T-14. Where required by the plan, the use of a flashing arrow-board is MANDATORY.

Traffic control is authorized with State's representative permission, between 9:00 A.M. and 3:00 P.M., and between 9:00 P.M. to 3:00 A.M. Monday through Friday, holidays excepted.

For shoulder closures, see Standard Plan Sheet T-10. Parking may be restricted, as needed.

Traffic control on freeways and freeway ramps are restricted to closure of shoulders between 9:00 AM to 3:00 PM, Monday through Friday, holidays excepted.

The site of the work shall be enclosed by suitable barricades, signs and lights, as approved by State's representative, to warn and protect traffic effectively.

When survey operation is being conducted, the permittee shall furnish, place and maintain signs and safety equipment in accordance with the latest edition of the "Manual of Traffic Controls for Construction and Maintenance Work Zones"

Excavation backfill shall be in accordance with the State standards and as directed by the State's representative.

Certain details of work authorized hereby are shown on District Agreements No. 4-1869-C and No.4-1794-C, and 04239-EA262000.

Any damage to the existing State's facilities shall be repaired or replaced immediately

All Permittee's personnel shall wear appropriate personal protective equipment, including hard hats and bright-colored vests, shirts or jackets with retro-reflective material while on State highway right-of-way.

Permittee's Consultants are authorized to perform the works for permittee.

Immediately following completion of the work permitted herein, the permittee shall fill out and mail the notice of completion attached to this permit.

STATE OF CALIFORNIA, DEPARTMENT OF TRANSPORTATION
ENCROACHMENT PERMIT GENERAL PROVISIONS
TR-0045 (REV. 05/2007)

1. **AUTHORITY:** The Department's authority to issue encroachment permits is provided under, Div. 1, Chpt. 3, Art. 1, Sect. 660 to 734 of the Streets and Highways Code.
2. **REVOCAION:** Encroachment permits are revocable on five days notice unless otherwise stated on the permit and except as provided by law for public corporations, franchise holders, and utilities. These General Provisions and the Encroachment Permit Utility Provisions are subject to modification or abrogation at any time. Permittees' joint use agreements, franchise rights, reserved rights or any other agreements for operating purposes in State highway right of way are exceptions to this revocation.
3. **DENIAL FOR NONPAYMENT OF FEES:** Failure to pay permit fees when due can result in rejection of future applications and denial of permits.
4. **ASSIGNMENT:** No party other than the permittee or permittee's authorized agent is allowed to work under this permit.
5. **ACCEPTANCE OF PROVISIONS:** Permittee understands and agrees to accept these General Provisions and all attachments to this permit, for any work to be performed under this permit.
6. **BEGINNING OF WORK:** When traffic is not impacted (see Number 35), the permittee shall notify the Department's representative, two (2) days before the intent to start permitted work. Permittee shall notify the Department's Representative if the work is to be interrupted for a period of five (5) days or more, unless otherwise agreed upon. All work shall be performed on weekdays during regular work hours, excluding holidays, unless otherwise specified in this permit.
7. **STANDARDS OF CONSTRUCTION:** All work performed within highway right of way shall conform to recognized construction standards and current Department Standard Specifications, Department Standard Plans High and Low Risk Facility Specifications, and Utility Special Provisions. Where reference is made to "Contractor and Engineer," these are amended to be read as "Permittee and Department representative."
8. **PLAN CHANGES:** Changes to plans, specifications, and permit provisions are not allowed without prior approval from the State representative.
9. **INSPECTION AND APPROVAL:** All work is subject to monitoring and inspection. Upon completion of work, permittee shall request a final inspection for acceptance and approval by the Department. The local agency permittee shall not give final construction approval to its contractor until final acceptance and approval by the Department is obtained.
10. **PERMIT AT WORKSITE:** Permittee shall keep the permit package or a copy thereof, at the work site and show it upon request to any Department representative or law enforcement officer. If the permit package is not kept and made available at the work site, the work shall be suspended.
11. **CONFLICTING ENCROACHMENTS:** Permittee shall yield start of work to ongoing, prior authorized, work adjacent to or within the limits of the project site. When existing encroachments conflict with new work, the permittee shall bear all cost for rearrangements, (e.g., relocation, alteration, removal, etc.).
12. **PERMITS FROM OTHER AGENCIES:** This permit is invalidated if the permittee has not obtained all permits necessary and required by law, from the Public Utilities Commission of the State of California (PUC), California Occupational Safety and Health Administration (Cal-OSHA), or any other public agency having jurisdiction.
13. **PEDESTRIAN AND BICYCLIST SAFETY:** A safe minimum passageway of 4' shall be maintained through the work area at existing pedestrian or bicycle facilities. At no time shall pedestrians be diverted onto a portion of the street used for vehicular traffic. At locations where safe alternate passageways cannot be provided, appropriate signs and barricades shall be installed at the limits of construction and in advance of the limits of construction at the nearest crosswalk or intersection to detour pedestrians to facilities across the street. Attention is directed to Section 7-1.09 Public Safety of the Department Standard Specifications.
14. **PUBLIC TRAFFIC CONTROL:** As required by law, the permittee shall provide traffic control protection warning signs, lights, safety devices, etc., and take all other measures necessary for traveling public's safety. While providing traffic control, the needs and control of all road users [motorists, bicyclists and pedestrians, including persons with disabilities in accordance with the Americans with Disabilities Act of 1990 (ADA)] shall be an essential part of the work activity.

Day and night time lane closures shall comply with the California Manual on Uniform Traffic Control Devices (Part 6, Temporary Traffic Control), Standard Plans, and Standard Specifications for traffic control systems. These General Provisions are not intended to impose upon the permittee, by third parties, any duty or standard of care, greater than or different from, as required by law.
15. **MINIMUM INTERFERENCE WITH TRAFFIC:** Permittee shall plan and conduct work so as to create the least possible inconvenience to the traveling public; traffic shall not be unreasonably delayed. On conventional highways, permittee shall place properly attired flagger(s) to stop or warn the traveling public in compliance with the California Manual on Uniform Traffic Control Devices (Chapter 6E, Flagger Control).
16. **STORAGE OF EQUIPMENT AND MATERIALS:** The storage of equipment or materials is not allowed within State highway right-of-way, unless specified within the Special Provisions of this specific encroachment permit. If Encroachment Permit Special Provisions allow for the storage of equipment or materials within the State right of way, the equipment and material storage shall comply with Standard Specifications, Standard Plans, Special Provisions, and the Highway Design Manual. The clear recovery zone widths must be followed and are the minimum desirable for the type of facility indicated below: freeways and expressways - 30', conventional highways (no curbs) - 20', conventional highways (with curbs) - 1.5'. If a fixed object cannot be eliminated, moved outside the clear recovery zone, or modified to be made yielding, it should be shielded by a guardrail or a crash cushion.
17. **CARE OF DRAINAGE:** Permittee shall provide alternate drainage for any work interfering with an existing drainage facility in compliance with the Standard Specifications, Standard Plans and/or as directed by the Department's representative.
18. **RESTORATION AND REPAIRS IN RIGHT OF WAY:** Permittee is responsible for restoration and repair of State highway right of way resulting from permitted work (State Streets and Highways Code, Sections 670 et. seq.).

19. **RIGHT OF WAY CLEAN UP:** Upon completion of work, permittee shall remove and dispose of all scraps, brush, timber, materials, etc. off the right of way. The aesthetics of the highway shall be as it was before work started.
20. **COST OF WORK:** Unless stated in the permit, or a separate written agreement, the permittee shall bear all costs incurred for work within the State right of way and waives all claims for indemnification or contribution from the State.
21. **ACTUAL COST BILLING:** When specified in the permit, the Department will bill the permittee actual costs at the currently set hourly rate for encroachment permits.
22. **AS-BUILT PLANS:** When required, permittee shall submit one (1) set of folded as-built plans within thirty (30) days after completion and approval of work in compliance with requirements listed as follows:
1. Upon completion of the work provided herein, the permittee shall send one vellum or paper set of As-Built plans, to the State representative. Mylar or paper sepia plans are not acceptable.
 2. All changes in the work will be shown on the plans, as issued with the permit, including changes approved by Encroachment Permit Rider.
 3. The plans are to be stamped or otherwise noted AS-BUILT by the permittee's representative who was responsible for overseeing the work. Any original plan that was approved with a State stamp, or Caltrans representative signature, shall be used for producing the As-Built plans.
 4. If As-Built plans include signing or striping, the dates of signing or striping removal, relocation, or installation shall be shown on the plans when required as a condition of the permit. When the construction plans show signing and striping for staged construction on separate sheets, the sheet for each stage shall show the removal, relocation, or installation dates of the appropriate staged striping and signing.
 5. As-Built plans shall contain the Permit Number, County, Route, and Post Mile on each sheet.
 6. Disclaimer statement of any kind that differ from the obligations and protections provided by Sections 6735 through 6735.6 of the California Business and Professions Code, shall not be included on the As-Built plans. Such statements constitute non-compliance with Encroachment Permit requirements, and may result in the Department of Transportation retaining Performance Bonds or deposits until proper plans are submitted. Failure to comply may also result in denial of future permits, or a provision requiring a public agency to supply additional bonding.
23. **PERMITS FOR RECORD PURPOSES ONLY:** When work in the right of way is within an area under a Joint Use Agreement (JUA) or a Consent to Common Use Agreement (CCUA), a fee exempt permit is issued to the permittee for the purpose of providing a notice and record of work. The Permittee's prior rights shall be preserved without the intention of creating new or different rights or obligations. "Notice and Record Purposes Only" shall be stamped across the face of the permit.
24. **BONDING:** The permittee shall file bond(s), in advance, in the amount set by the Department. Failure to maintain bond(s) in full force and effect will result in the Department stopping of all work and revoking permit(s). Bonds are not required of public corporations or privately owned utilities, unless permittee failed to comply with the provision and conditions under a prior permit. The surety company is responsible for any latent defects as provided in California Code of Civil Procedures, Section 337.15. Local agency permittee shall comply with requirements established as follows: In recognition that project construction work done on State property will not be directly funded and paid by State, for the purpose of protecting stop notice claimants and the interests of State relative to successful project completion, the local agency permittee agrees to require the construction contractor furnish both a payment and performance bond in the local agency's name with both bonds complying with the requirements set forth in Section 3-1.02 of State's current Standard Specifications before performing any project construction work. The local agency permittee shall defend, indemnify, and hold harmless the State, its officers and employees from all project construction related claims by contractors and all stop notice or mechanic's lien claimants. The local agency also agrees to remedy, in a timely manner and to State's satisfaction, any latent defects occurring as a result of the project construction work.
25. **FUTURE MOVING OF INSTALLATIONS:** Permittee understands and agrees to relocate a permitted installation upon notice by the Department. Unless under prior property right or agreement, the permittee shall comply with said notice at his sole expense.
26. **ARCHAEOLOGICAL/HISTORICAL:** If any archaeological or historical resources are revealed in the work vicinity, the permittee shall immediately stop work, notify the Department's representative, retain a qualified archaeologist who shall evaluate the site, and make recommendations to the Department representative regarding the continuance of work.
27. **PREVAILING WAGES:** Work performed by or under a permit may require permittee's contractors and subcontractors to pay appropriate prevailing wages as set by the Department of Industrial Relations. Inquiries or requests for interpretations relative to enforcement of prevailing wage requirements are directed to State of California Department of Industrial Relations, 525 Golden Gate Avenue, San Francisco, California 94102.
28. **RESPONSIBILITY FOR DAMAGE:** The State of California and all officers and employees thereof, including but not limited to the Director of Transportation and the Deputy Director, shall not be answerable or accountable in any manner for injury to or death of any person, including but not limited to the permittee, persons employed by the permittee, persons acting in behalf of the permittee, or for damage to property from any cause. The permittee shall be responsible for any liability imposed by law and for injuries to or death of any person, including but not limited to the permittee, persons employed by the permittee, persons acting in behalf of the permittee, or for damage to property arising out of work, or other activity permitted and done by the permittee under a permit, or arising out of the failure on the permittee's part to perform his obligations under any permit in respect to maintenance or any other obligations, or resulting from defects or obstructions, or from any cause whatsoever during the progress of the work, or other activity or at any subsequent time, work or other activity is being performed under the obligations provided by and contemplated by the permit.
- The permittee shall indemnify and save harmless the State of California, all officers, employees, and State's contractors, thereof, including but not limited to the Director of Transportation and the Deputy Director, from all claims, suits or actions of every name, kind and description brought for or on account of injuries to or death of any person, including but not limited to the permittee, persons employed by the permittee, persons acting in behalf of the permittee and the public, or damage to property resulting from the performance of work or other activity under the permit, or arising out of the failure on the permittee's part to perform his obligations under any permit in respect to maintenance or any other obligations, or resulting from defects or obstructions, or from any cause whatsoever during the progress of the work, or other activity or at any subsequent time, work or other activity is being performed under the obligations provided by and contemplated by the permit, except as otherwise provided by statute.

The duty of the permittee to indemnify and save harmless includes the duties to defend as set forth in Section 2778 of the Civil Code. The permittee waives any and all rights to any type of expressed or implied indemnity against the State, its officers, employees, and State contractors. It is the intent of the parties that the permittee will indemnify and hold harmless the State, its officers, employees, and State's contractors, from any and all claims, suits or actions as set forth above regardless of the existence or degree of fault or negligence, whether active or passive, primary or secondary, on the part of the State, the permittee, persons employed by the permittee, or acting on behalf of the permittee.

For the purpose of this section, "State's contractors" shall include contractors and their subcontractors under contract to the State of California performing work within the limits of this permit.

29. **NO PRECEDENT ESTABLISHED:** This permit is issued with the understanding that it does not establish a precedent.
30. **FEDERAL CIVIL RIGHTS REQUIREMENTS FOR PUBLIC ACCOMMODATION:**
A. The permittee, for himself, his personal representative, successors in interest, and assigns as part of the consideration hereof, does hereby covenant and agree that:
1. No person on the grounds of race, color, or national origin shall be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination in the use of said facilities.
 2. That in connection with the construction of any improvements on said lands and the furnishings of services thereon, no discrimination shall be practiced in the selection and retention of first-tier subcontractors in the selection of second-tier subcontractors.
 3. That such discrimination shall not be practiced against the public in their access to and use of the facilities and services provided for public accommodations (such as eating, sleeping, rest, recreation), and operation on, over, or under the space of the right of way.
 4. That the permittee shall use the premises in compliance with all other requirements imposed pursuant to Title 15, Code of Federal Regulations, Commerce and Foreign Trade, Subtitle A, Office of the Secretary of Commerce, Part 8 (15 C.F.R. Part 8) and as said Regulations may be amended.
 5. That in the event of breach of any of the above nondiscrimination covenants, the State shall have the right to terminate the permit and to re-enter and repossess said land and the land and the facilities thereon, and hold the same as if said permit had never been made or issued.
31. **MAINTENANCE OF HIGHWAYS:** The permittee agrees, by acceptance of a permit, to properly maintain any encroachment. This assurance requires the permittee to provide inspection and repair any damage, at permittee's expense, to State facilities resulting from the encroachment.
32. **SPECIAL EVENTS:** In accordance with subdivision (a) of Streets and Highways Code Section 682.5, the Department of Transportation shall not be responsible for the conduct or operation of the permitted activity, and the applicant agrees to defend, indemnify, and hold harmless the State and the city or county against any and all claims arising out of any activity for which the permit is issued.

Permittee understands and agrees that it will comply with the obligations of Titles II and III of the Americans with Disabilities Act of 1990 in the conduct of the event, and further agrees to indemnify and save harmless the State of California, all officers and employees thereof, including but not limited to the Director of Transportation, from any claims or liability arising out of or by virtue of said Act.

33. **PRIVATE USE OF RIGHT OF WAY:** Highway right of way shall not be used for private purposes without compensation to the State.

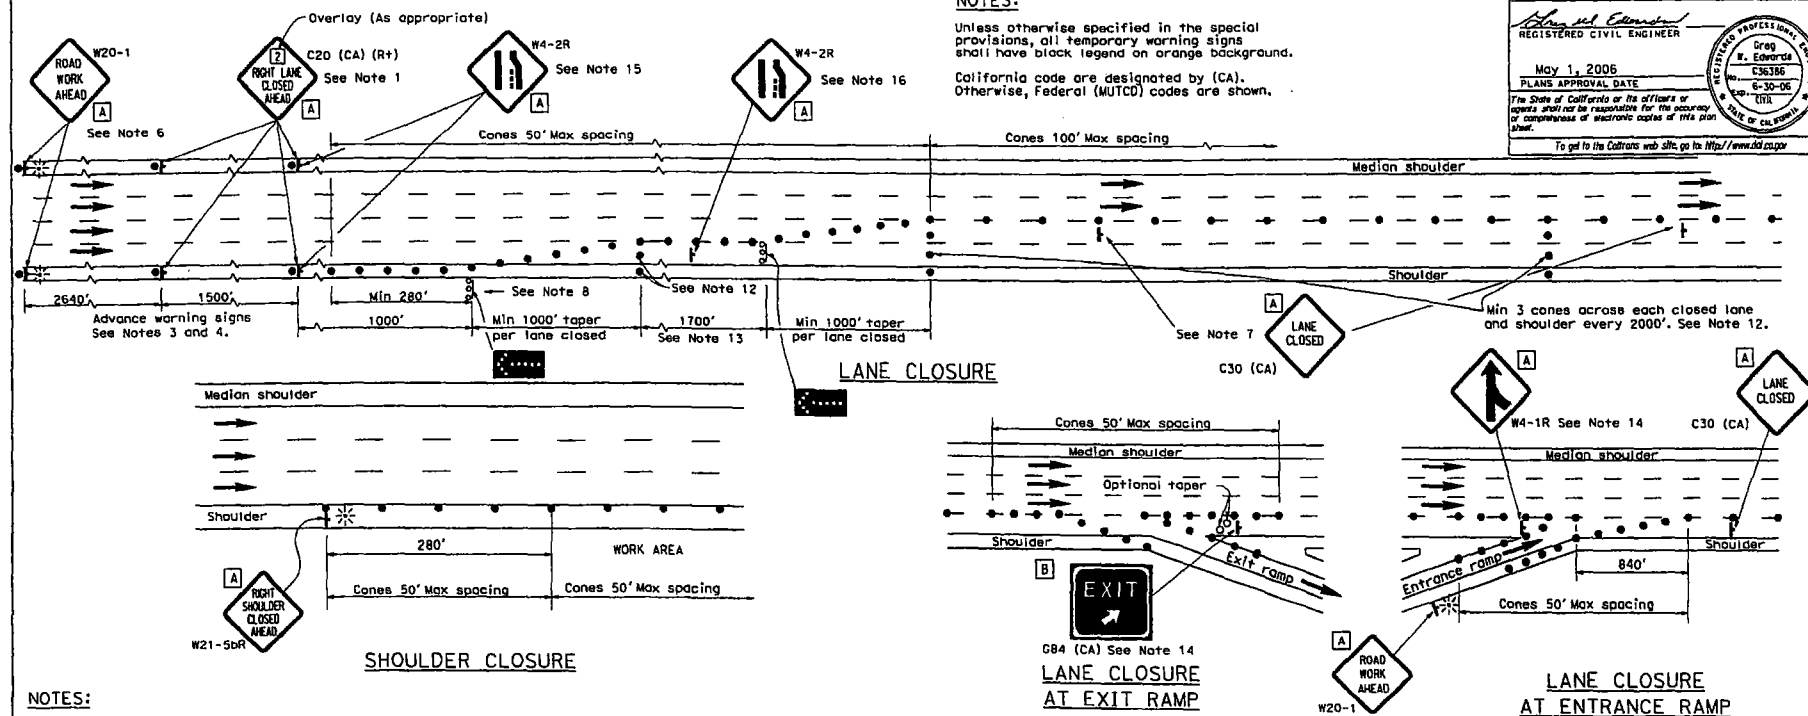

The gifting of public property use and therefore public funds is prohibited under the California Constitution, Article 16.

34. **FIELD WORK REIMBURSEMENT:** Permittee shall reimburse State for field work performed on permittee's behalf to correct or remedy hazards or damaged facilities, or clear debris not attended to by the permittee.
35. **NOTIFICATION OF DEPARTMENT AND TMC:** The permittee shall notify the Department's representative and the Transportation Management Center (TMC) at least 7 days before initiating a lane closure or conducting an activity that may cause a traffic impact. A confirmation notification should occur 3 days before closure or other potential traffic impacts. In emergency situations when the corrective work or the emergency itself may affect traffic, TMC and the Department's representative shall be notified as soon as possible.
36. **SUSPENSION OF TRAFFIC CONTROL OPERATION:** The permittee, upon notification by the Department's representative, shall immediately suspend all lane closure operations and any operation that impedes the flow of traffic. All costs associated with this suspension shall be borne by the permittee.
37. **UNDERGROUND SERVICE ALERT (USA) NOTIFICATION:** Any excavation requires compliance with the provisions of Government Code Section 4216 et. seq., including, but not limited to notice to a regional notification center, such as Underground Service Alert (USA). The permittee shall provide notification at least 48 hours before performing any excavation work within the right of way.

 To get to the Caltrans web site, go to: <http://www.dtd.ca.gov>

NOTES:
 Unless otherwise specified in the special provisions, all temporary warning signs shall have black legend on orange background.
 California code are designated by (CA).
 Otherwise, Federal (MUTCD) codes are shown.

- NOTES:**
- Median lane closures shall conform to the details for outside lane closures except that C20 (CA) (L+) signs shall be used.
 - At least one person shall be assigned to provide full time maintenance of traffic control devices for lane closures.
 - Duplicate sign installations are not required:
 - On opposite shoulder if at least one-half of the available lanes remain open to traffic.
 - In the median if the width of the median shoulder is less than 8' and the outside lanes are to be closed.
 - Each advance warning sign on each side of the roadway shall be equipped with at least two flags for daytime closure. Each flag shall be at least 16" x 16" in size and shall be orange or fluorescent red-orange in color. Flashing beacons shall be placed at the locations indicated for lane closure during hours of darkness.
 - A C14 (CA) "END ROAD WORK" sign, as appropriate, shall be placed at the end of the lane closure unless the end of work area is obvious or ends within a larger project's limits.
 - If the W20-1 sign would follow within 2000' of a stationary W20-1 or C11 (CA) "ROAD WORK NEXT _____ MILES", use a C20 (CA) sign for the first advance warning sign.
 - Place a C30 (CA) sign every 2000' throughout length of lane closure.
 - One flashing arrow sign for each lane closed. The first flashing arrow sign shall be Type I. All others may be either Type I or Type II.
 - A minimum 1500' of sight distance shall be provided where possible for vehicles approaching the first flashing arrow sign. Lane closures shall not begin at top of crest vertical curve or on a horizontal curve.
 - All cones used for lane closures during the hours of darkness shall be fitted with retroreflective bands (or sleeves) as specified in the specifications.
 - Portable delineators, placed at one-half the spacing indicated for traffic cones may be used instead of cones for daytime closures only.
 - Unless otherwise specified in the special provisions, a minimum of 3 cones shall be placed transversely across each closed lane and shoulder at each location where a taper across a traffic lane ends and every 2000' as shown on the "Lane Closure" detail. Two Type II barricades may be used instead of the 3 cones. The transverse alignment of the cones or barricades on the closed shoulder may be shifted from the transverse alignment to provide access to the work.
 - Unless otherwise specified in the special provisions, the 1700' tangent shown along lane lines shall be used between the 1000' tapers required for each closed traffic lane.
 - Unless otherwise specified in the special provisions, the G84 (CA) and W4-1 signs shall be used as shown.
 - When specified in the special provisions, a W4-2 "LANE ENDS" symbol sign is to be used in place of the C20 (CA) "RIGHT LANE CLOSED AHEAD" sign.
 - The W4-2 "LANE ENDS" symbol sign shown at this location is to be used where the W4-2 sign is used as advance warning as described in Note 15.

SIGN PANEL SIZE (Min)
 A 48" x 48"
 B 54" x 48"

TYPICAL LANE CLOSURE

TABLE 1

Approach Speed	* Minimum L	** Max spacing of cones along taper
mph	ft	ft
20 and below	80	20
25	125	25
30	180	30
35	245	35
40	320	40
45	540	45
50	600	50
Over 50	See Note 9	
* Use L for lane widths less than or equal to 12'.		
** See Note 8.		

TABLE 2

Approach Speed	Minimum D	Downgrade Minimum D *		
		-3%	-6%	-9%
mph	ft	ft	ft	ft
25 and below	155	158	165	173
30	200	205	215	227
35	250	257	271	287
40	305	315	333	354
45	360	378	400	427
50	425	446	474	507
Over 50	See Note 9			
* Use on sustained downgrade steeper than -3 percent and longer than 1 mile.				

NOTES:

- Where approach speeds are low, advance warning signs may be placed at 300' spacing and placed closer in urban areas.
- Each advance warning sign shall be equipped with at least two flags for daytime closure. Each flag shall be at least 16" x 16" in size and shall be orange or fluorescent red-orange in color. Flashing beacons shall be placed at the locations indicated for lane closure during hours of darkness.
- A C14 (CA) "END ROAD WORK" sign, as appropriate, shall be placed at the end of the lane closure unless the end of work area is obvious, or ends within a larger project's limits.
- If the W20-1 sign would follow within 2000' of a stationary W20-1 or C11 (CA) "ROAD WORK NEXT" sign, use a C20 (CA) sign for the first advance warning sign.
- All cones used for lane closures during the hours of darkness shall be fitted with retroreflective bands (or sleeves) as specified in the specifications.
- Portable delineators, placed at one-half the spacing indicated for traffic cones, may be used instead of cones for daytime closures only.
- Flashing arrow sign shall be either Type I or Type II.
- The maximum spacing between cones along a tangent shall be 50' and along a taper shall be approximately as shown in Table 1.
- For approach speeds over 50 mph, use the "Traffic Control System for Lane Closure On Freeways And Expressways" plan for lane closure details and requirements.
- When specified in the special provisions, a W4-2 "LANE ENDS" symbol sign is to be used in place of the C20 (CA) "RIGHT LANE CLOSED AHEAD" sign.

Encroachment Permit Work Scheduling Request Form

Submit request to schedule traffic control weekly, 7 days in advance, using this form. Submit to Permit Duty Station by FAX, 510-286-3960, or E-mail: *Permit_Duty_Engineer@dot.ca.gov*. **Reminder!** - Notify Inspector listed on page 1 or 2 of your Permit. Check Permit Special Provisions for authorized **work hours**. Any deviation from the Permit must be requested in writing. **INSTRUCTIONS AND ABBREVIATIONS:** See Procedures on reverse of this form (page 2).

- 1. Permit No.: _____ 2. Expiration Date: _____ 3. Request Date: _____
- 4. Caltrans Inspector: _____ 5. Requested Work Week: _____ to _____
- 6. Route: _____ 7. County: _____ 8. City or township: _____
- 9. PostMiles or Kilopost: From: _____ To: _____ 10. Existing Lanes (in each Dir): Dir _____ Lns _____ / Dir _____ Lns _____
- 11. Describe Location (use landmark if necessary): From: _____ To: _____
- 12. Name of Conventional Highway or Surface St: _____
- 13. (a through k) Fill in or 'x' if applicable: (a) Divided Hwy or Undivided Hwy (b) Full-Closure 1 dir or both dir
 (c) One-way Traffic Control: Only on "Undivided" Hwy (Alternate use of same lane for both directions--hold trfc 5-10 min w/flaggers)
 (d) Connector Ramp: (State Highway #) _____ to (State Highway #) _____ Closed or Lane # _____
 (e) Off/ramp: (Freeway to City St) Ramp Name: _____ Off/ramp Closed or Lane#: _____
 (f) On/ramp: (City St to Freeway) Ramp Name: _____ On/ramp Closed or Lane#: _____
 (g) Divert Trfc or Contra Flow: Reconfigure lanes/divert trfc to Lane# _____ in the _____ Direction; _____ Lane(s) open ea direction.
 (h) Intermittent Traffic Control (i) Various Locations (j) Long-Term (24± hours continuous) ETO

16. Contingency Plan: _____

17. On-site during work (circle if applicable) CHP / PD / Other: _____

18. Name:	Permittee:	Contractor (if different than permittee):
Address:		
On-site Personnel Contact Name(s) & Phone No.	Name:	Name:
	Office:	Office:
	Cell:	Cell:
	FAX:	FAX:

19. **"REAL-TIME" STATUS INSTRUCTIONS - PLEASE MAKE YOUR FIELD PERSONNEL AWARE & RESPONSIBLE!**
Permittee shall STATUS scheduled work DAILY via Caltrans 24-Hour Communication Center at 510-286-6359. Status using Closure ID No(s) at the start of work, (10-97), and again when work is finished for the day, (10-98). To cancel (10-22), phone 510-286-6359 or fax to 510-286-6358 before the scheduled 10-97 time, but no later than 1 hour prior to the scheduled 10-98 time. Any delay in picking up your closure must be reported immediately to 510-286-6359 or Permit Inspector. See item 9 on reverse/page 2.

ENCROACHMENT PERMIT WORK SCHEDULING PROCEDURES

1. **INSTRUCTIONS:** Fill in blanks or check appropriate boxes. Attach maps or diagrams, if available. Enter beginning day through ending day of work week (M-T-W-TH-F-SA-SU). Month/Day: Enter month (1-12) and day (1-31) of requested week. Start & Finish Time: Use 24 hour clock format. Read page 2 of your Permit Special Provisions for hours & days allowed. Separate lane closure #'s are required for each direction and facility. Use separate line for each. Lanes are numbered in direction of travel from left to right, excluding turn pockets; left being #1 or "fast lane". Check boxes under **RESTRICTED LANES** to indicate lanes or parts of highway to be closed. "VL"(Various Lanes) may be checked with note in Comments Section stating number of lanes to remain open at all times.
 2. **ABBREVIATIONS:** Aux=auxiliary, CD=Center Divide; Coll=Collector; Conn=Connector; Contra Flow=Close 1 direction of traffic and divert to lane(s) in opposite direction or a turn lane. Day of Week=(M-T-W-TH-F-SA-SU); Dir=Direction (NB=North, SB=South, WB=West, or EB=East); F/L=fog line; Lns=Lanes; L=Left; Med= Median; Off/R=Off-Ramp; On/R=On-Ramp; Park Strip=Parking area parallel to lane; Pckt=Pocket; Roll=Rolling (for closure such as sweeping); R=Right; Shldr=Shoulder; SR=State Route; V/L=Various Lanes; V/Loc=Various Locations.
 3. Requests for scheduling shall be submitted on this form via FAX to 510-286-3960, or, via E-Mail to Permit_Duty_Engineer@dot.ca.gov, or, through the designated State Representative (page 1 of permit).
 4. All permitted work (with or without traffic control) is subject to advance scheduling on this form, seven (7)days in advance of the work week requested. Submittals and approvals shall continue on a weekly basis.
 5. If work begins weekly on Sunday, the work week shall be Sunday through Saturday. If work week begins on Monday, the work week shall be Monday through Sunday.
 6. Incomplete, illegible, or inaccurate requests may be returned for correction. Assistance for completing the request may be obtained from the designated State Representative.
 7. Every attempt will be made to return timely requests with closure ID or work authorization numbers, to the Permittee by close of business on Thursday, prior to the scheduled work week. When deemed necessary to ensure public convenience, Caltrans may deny and/or reschedule the request.
 8. All requests must include a contingency plan for restoring public traffic (i.e. reopening of a closed lane, ramp and/or shoulder) in the event of (1) CHP or the local authority requires opening due to an unforeseeable incident in the nearby vicinity, or (2) permitted experiences an equipment breakdown, shortage of or lack of production materials or any other failure which would otherwise delay restoring public convenience within the time limits specified in the permit. The contingency plan shall include availability of any proposed standby equipment and stockpiled materials that can be utilized for the immediate opening of closures when ordered by the State representative. Acceptance of the contingency plan by the Engineer shall not relieve the Contractor from the requirement of opening the restricted travel way to accommodate public traffic as specified in the lane closure hour's section of the permit provisions.
 9. Caltrans will review and process the request by entering all information into the State-wide Lane-Closure System (LCS). This process generates a work authorization number*. This number will be entered on the request form and returned to Permittee as approval to proceed AND will be used to "Real-Time Status" on a daily basis. Permittee shall communicate with Caltrans 24-hour District Communication Center (DCC) via telephone at 510-286-6359 twice daily when working, or once daily if cancelled.
 - a. When work begins (first cone down), Permittee shall contact Caltrans DCC and relay: "(Closure ID #*) is 10-97".
 - b. When work ends (last cone removed), Permittee shall contact Caltrans DCC and relay: "(Closure ID #*) is 10-98".
 - c. If the work is cancelled on any scheduled day, Permittee shall contact Caltrans DCC and relay: "(Closure ID #*) is 10-22". A "10-22" (cancellation) can be phoned at anytime before the scheduled "10-97" time, but no later than 1 hour prior to scheduled "10-98" time. You may be asked to fax confirmation of "10-22" to the DCC FAX at 510-286-6358.
 - d. During the work, any unexpected occurrences including delayed openings, accidents, etc., shall be communicated to Caltrans DCC @ 510-286-6359, immediately.
- Avoid possible miscommunication when calling status. Use the **PHONETIC ALPHABET** to state your Closure ID:
A = Adam, B = Boy, C = Charles, D = David, E = Edward, F = Frank, G = George, H = Henry, I = Ida, J = John, K = King, L = Lincoln, M = Mary, N = Nora, O = Ocean, P = Paul, Q = Queen, R = Robert, S = Sam, T = Tom, U = Union, V = Victor, W = William, X = X-ray, Y = Yellow, Z = Zebra. Example: P82CA="Paul 82 Charles Adam"
10. The intent of these procedures is to help ensure public convenience by identifying planned closures on the State Highway system, resolving potential conflicts, and disseminating all available "REAL-TIME" information, via the traffic media to all motorists, including but not limited to the public, CHP, local police and sheriffs' office, and emergency fire and rescue personnel.

* "closure ID number" is the same as "work authorization number"

Appendix D

*California Environmental Protection Agency
Department of Toxic Substances Control*

VARIANCE

Applicant Names:

Variance No. V09HQSCD006

State of California
Department of Transportation
(Caltrans)
1120 N Street
Sacramento, California 95814

Effective Date: July 1, 2009

Expiration Date: July 1, 2014

Modification History:

Pursuant to California Health and Safety Code, Section 25143, the Department of Toxic Substances Control hereby issues the attached Variance consisting of 9 pages to the Department of Transportation.

Beverly Rikala
Team Leader, Operating Facilities Team
Department of Toxic Substances Control

Date:

VARIANCE

1. INTRODUCTION.

a) Pursuant to Health and Safety Code, section 25143, the California Department of Toxic Substances Control (DTSC) grants this variance to the applicant below for waste considered to be hazardous solely because of its lead concentrations and as further specified herein.

b) DTSC hereby grants this variance only from the requirements specified herein and only in accordance with all terms and conditions specified herein.

2. IDENTIFYING INFORMATION.

APPLICANT/OWNER/OPERATOR

State of California
Department of Transportation, (Caltrans)
All Districts

3. TYPE OF VARIANCE.

Generation, Manifest, Transportation, Storage and Disposal.

4. ISSUANCE AND EXPIRATION DATES.

DATE ISSUED: July 1, 2009 EXPIRATION DATE: July 1, 2014

5. APPLICABLE STATUTES AND REGULATIONS. The hazardous waste that is the subject of this variance is fully regulated under Health and Safety Code, section 25100, et seq. and California Code of Regulations, title 22, division 4.5 except as specifically identified in Section 8 of this variance.

6. DEFINITION. For purposes of this variance, "lead-contaminated soil(s)" shall mean soil that meets the criteria for hazardous waste but contains less than 3397 mg/kg total lead and is hazardous primarily because of aerially-deposited lead contamination associated with exhaust emissions from the operation of motor vehicles.

7. FINDINGS/DETERMINATIONS. DTSC has determined that the variance applicant meets the requirements set forth in Health and Safety Code, section 25143 for a variance from specific regulatory requirements as outlined in Section 8 of this variance. The specific determinations and findings made by DTSC are as follows:

a) Caltrans intends to excavate, stockpile, transport, bury and cover large volumes of soil associated with highway construction projects. In the more urbanized highway corridors around the State this soil is contaminated with lead, primarily due to historic emissions from automobile exhausts. In situ sampling and laboratory testing has shown that some of the soil contains concentrations of lead in excess of State

regulatory thresholds, and thus any generated waste from disturbance of the soil would be regulated as hazardous waste. Such soil contains a Total Threshold Limit Concentration (TTLC) of 1000 milligrams per kilogram (mg/kg) or more lead and/or it meets or exceeds the Soluble Threshold Limit Concentration (STLC) for lead of 5 milligrams per liter (mg/l). A Human Health Risk Assessment prepared for this variance concludes that soil contaminated with elevated concentrations of lead can be managed in a way that presents no significant risk to human health.

b) The lead-contaminated soil will be placed only in Caltrans' right-of-way. Depending on concentration levels, the wastes will be covered with a minimum thickness of one (1) foot of non-hazardous soil or asphalt/concrete cover and will always be at least five (5) feet above the highest groundwater elevation. Caltrans will assure that proper health and safety procedures will be followed for workers, including any persons engaged in maintenance work in areas where the waste has been buried and covered.

c) DTSC finds and requires that the lead-contaminated soil excavated, stockpiled, transported, buried and covered pursuant to this variance is a non-RCRA hazardous waste, and that the waste management activity is insignificant as a potential hazard to human health and safety and the environment, when managed in accordance with the conditions, limitations and other requirements specified in this variance.

8. PROVISIONS WAIVED.

Provided Caltrans meets the terms and conditions of this variance, DTSC waives the hazardous waste management requirements of Health and Safety Code, Chapter 6.5 and California Code of Regulations, title 22 for the lead-contaminated soil that Caltrans reuses in projects that would require Caltrans to obtain a permit for a disposal facility and any other generator requirements that concern the transportation, manifesting, storage and land disposal of hazardous waste.

9. SPECIFIC CONDITIONS, LIMITATIONS AND OTHER REQUIREMENTS.

In order for the provisions discussed in section 8 to be waived, lead-contaminated soil must not exceed the contaminant concentrations discussed below and Caltrans management practices must meet all the following conditions:

a) Caltrans implementation of this variance shall comply with all applicable state laws and regulations for water quality control, water quality control plans, waste discharge requirements (including storm water permits), and others issued by the State Water Resources Control Board (SWRCB) and/or a California Regional Water Quality Control Board (RWQCB). Caltrans shall provide written notification to the appropriate RWQCB at least 30 days prior to advertisement for bids of projects that involve invocation of this variance, or as otherwise negotiated with the SWRCB or appropriate RWQCB.

b) The waivers in this variance shall only be applied to lead-contaminated soil that is

not a RCRA hazardous waste and is hazardous primarily because of aerially-deposited lead contamination associated with exhaust emissions from the operation of motor vehicles. The variance is not applicable to any other hazardous waste.

c) Soil containing 1.5 mg/l extractable lead or less (based on a modified waste extraction test using deionized water as the extractant) and 1411 mg/kg or less total lead may be used as fill provided that the lead-contaminated soil is placed a minimum of five (5) feet above the maximum historic water table elevation and covered with at least one (1) foot of nonhazardous soil that will be maintained by Caltrans to prevent future erosion.

d) Soil containing 150 mg/L extractable lead or less (based on a modified waste extraction test using deionized water as the extractant) and 3397 mg/kg or less total lead may be used as fill provided that the lead-contaminated soils are placed a minimum of five (5) feet above the maximum historic water table elevation and protected from infiltration by a pavement structure which will be maintained by Caltrans.

e) Lead-contaminated soil with a pH less than 5.5 but greater than 5.0 shall only be used as fill material under the paved portion of the roadway. Lead-contaminated soil with a pH at or less than 5.0 shall be managed as a hazardous waste.

f) For each project that has the potential to generate waste by disturbing lead-contaminated soil (as defined in 6), Caltrans shall conduct sampling and analysis to adequately characterize the soils containing aerially deposited lead in the areas of planned excavation along the project route. Such sampling and analysis shall include the Toxicity Characteristic Leaching Procedure (TCLP) as prescribed by the United States Environmental Protection Agency to determine whether concentrations of contaminants in soil exceed federal criteria for classification as a hazardous waste.

g) Lead-contaminated soil managed pursuant to this variance shall not be moved outside the designated corridor boundaries (see paragraph t) below. All lead-contaminated soil not buried and covered within the same Caltrans corridor where it originated is not eligible for management under this variance and shall be managed as a hazardous waste.

h) Lead-contaminated soil managed pursuant to this variance shall not be placed in areas where it would become in contact with groundwater or surface water (such as streams and rivers).

i) Lead-contaminated soil managed pursuant to this variance shall be buried and covered only in locations that are protected from erosion that may result from storm water run-on and run-off.

j) The lead-contaminated soil shall be buried and covered in a manner that will prevent accidental or deliberate breach of the asphalt, concrete, and/or cover soil.

k) The presence of lead-contaminated soil shall be incorporated into the projects' as-built drawings. The as-built drawings shall be annotated with the location, representative analytical data, and volume of lead-contaminated soil. The as-built drawings shall also state the depth of the cover. These as-built drawings shall be retained by Caltrans.

l) Caltrans shall ensure that no other hazardous wastes, other than the lead-contaminated hazardous waste soil, are placed in the burial areas.

m) Lead-contaminated soil shall not be buried within ten (10) feet of culverts or locations subject to frequent worker exposure.

n) Excavated lead-contaminated soil not placed into the designated area (fill area, roadbed area) by the end of the working day shall be stockpiled and covered with sheets of polyethylene or at least one foot of non-hazardous soil. The lead-contaminated soil, while stockpiled or under transport, shall be protected from contacting surface water and from being dislodged or transported by wind or storm water. The stockpile covers shall be inspected at least once a week and within 24 hours after rainstorms. If the lead-contaminated soil is stockpiled for more than 4 days from the time of excavation, Caltrans shall restrict public access to the stockpile by using barriers that meet the safety requirements of the construction zone. The lead-contaminated soil shall be stockpiled for no more than 90 days from the time the soil is first excavated. If the contaminated soil is stockpiled beyond the 90 day limit Caltrans shall:

1. notify DTSC in writing of the 90 day exceedance and expected date of removal;
2. perform weekly inspections of the stockpiled material to ensure that there is adequate protection from run-on, runoff, public access, and wind dispersion; and
3. notify DTSC on weekly basis of the stockpile status until the stockpile is removed.

The lead-contaminated soil shall be stockpiled for no more than 180 days from the time the soil is first excavated.

o) Caltrans shall ensure that all stockpiling of lead-contaminated soil remains within the project area of the specified corridor. Stockpiling of lead-contaminated soil within the specified corridor, but outside the project area, is prohibited.

p) Caltrans shall conduct confirmatory sampling of any stockpile area in areas not known or expected to contain lead-contaminated soil after removal of the lead-contaminated soil to ensure that contamination has not been left behind or has not migrated from the stockpiled material to the surrounding soils.

q) Caltrans shall stockpile lead-contaminated soil only on high ground (i.e. no sump

areas or low points) so that stockpiled soil will not come in contact with surface water run-on or run-off.

r) Caltrans shall not stockpile lead-contaminated soil in environmentally and ecologically sensitive areas.

s) Caltrans shall ensure that storm/rain run-off that has come into contact with stockpiled lead-contaminated soil will not flow to storm drains, inlets, or waters of the State.

t) Caltrans may dispose of the lead-contaminated soil only within the operating right-of-way of an existing highway, as defined in Streets and Highways Code, section 23. Caltrans may move lead-contaminated soil from one Caltrans project to another Caltrans project only if the lead-contaminated soil remains within the same designated corridor.

Caltrans shall record any movement of lead-contaminated soil by using a bill of lading. The bill of lading must contain: 1) the US DOT description including shipping name, hazard class and ID number; 2) handling codes; 3) quantity of material; 4) volume of material; 5) date of shipment; 6) origin and destination of shipment; and 7) any specific handling instructions. The bill of lading shall be referenced in and kept on file with the project's as-built drawings. The lead-contaminated soil must be kept covered during transportation.

u) For each specific corridor where this variance is to be implemented, all of the following information shall be submitted in writing to DTSC at least five (5) days before construction of any project begins:

1. plan drawing designating the boundaries of the corridor where lead-contaminated soils will be excavated, stockpiled, buried and covered;
2. a list of the Caltrans projects that the corridor encompasses;
3. a list of Caltrans contractors that will be conducting any phase of work on any project affected by this variance;
4. duration of corridor construction;
5. location where sampling and analytical data used to make lead concentration level determinations are kept (e.g. a particular Caltrans project file);
6. name and phone number (including area code) of project resident engineer and project manager;
7. location where Caltrans and contractor health and safety plan and records are kept;

8. location of project special provisions (including page or section number) for soil excavation, transportation, stockpile, burial and placement of cover material;

9. location of project drawings (including drawing page number) for soil excavation, burial and placement of cover in plan and cross section (for example, "The project plans are located at the resident engineer's office located at 5th and Main Streets, City of Fresno, See pages xxxxx of contract xxxx");

10. updated information if a Caltrans project within the corridor is added, changed or deleted; and

11. type of environmental document prepared for each project, date of adoption, document title, Clearing House number and where the document is available for review. A copy of the Caltrans Categorical Exemption, Categorical Exclusion Form, or if filed, the Notice of Exemption for any project shall be submitted to the DTSC Headquarters Project Manager.

v) Changes in location of lead-contaminated soil placement, quantities or protection measures (field changes) shall be noted in the resident engineer's project log within five (5) days of the field change.

w) Caltrans shall ensure that field changes are in compliance with the requirements of this variance.

x) Operational procedures described in the California Environmental Quality Act (CEQA) Special Initial Study shall be followed by Caltrans for activities conducted under this variance.

y) Caltrans shall implement appropriate health and safety procedures to protect its employees and the public, and to prevent or minimize exposure to potentially hazardous wastes. A project-specific health and safety plan must be prepared and implemented. The monitoring and exposure standards shall be based on construction standards for exposure to lead in California Code of Regulations, title 8, section 1532.1.

z) Caltrans shall provide a district Coordinator for this variance. This Coordinator will be the primary point of contact for information flowing to, or received from, DTSC regarding any matter or submission under this variance. Caltrans shall promptly notify DTSC of the name of Coordinator and any change in the Coordinator.

aa) Caltrans shall conduct regular inspections, consistent with Caltrans' Maintenance Division's current Pavement Inspection and Slope Inspection programs, of the locations where lead-contaminated soil has been buried and/or covered pursuant to this variance. If site inspection reveals deterioration of cover so

that conditions in the variance are not met, Caltrans shall repair or replace the cover.

bb) Caltrans shall develop and implement a record keeping mechanisms to record and retain permanent records of all locations where lead-contaminated soil has been buried per this variance. The records shall be made available to DTSC.

cc) If areas subject to the terms of this variance are sold, relinquished or abandoned (including roadways), all future property owners shall be notified in writing in advance by Caltrans of the requirements of this variance, and Caltrans shall provide the owner with a copy of the variance. A copy of such a notice shall be sent to DTSC and contain the corridor location and project. Caltrans shall also disclose to DTSC and the new owner the location of areas where lead-contaminated soil has been buried. Future property owners shall be subject to the same requirements as Caltrans.

dd) For the purposes of informing the public about instances where the variance is implemented, Caltrans shall:

1. maintain current fact sheets at all Caltrans resident engineer offices and the Caltrans District office. Caltrans shall make the fact sheets available to anyone expressing an interest in variance-related work.
2. maintain a binder(s) containing copies of all reports submitted to DTSC at the District office. Caltrans shall ensure that the binders are readily accessible to the public.
3. carry out the following actions when it identifies additional projects:
 - (A) notify the public via a display advertisement in a newspaper of general circulation in that area.
 - (B) update and distribute the fact sheet to the mailing list and repository locations.

ee) Lead-contaminated soil may be buried only in areas where access is limited or where lead-contaminated soil is covered and contained by a pavement structure.

ff) Dust containing lead-contaminated soil must be controlled. Water or dust palliative may be applied to control dust. If visible dust migration occurs, all excavation, stockpiling and truck loading and burying must be stopped. The granting of this variance confers no relief on Caltrans from compliance with the laws, regulations and requirements enforced by any local air district or the California Air Resources Board.

gg) Sampling and analysis is required to show the lead-contaminated soil meets the variance criteria. All sampling and analysis must be conducted in

accordance with the appropriate methods specified in U.S. EPA SW-846.

hh) DTSC retains the right to require Caltrans or any future owner to remove, and properly dispose of, lead-contaminated soil in the event DTSC determines it is necessary for protection of public health, safety or the environment.

ii) DTSC finds that some projects involving lead-contaminated soil are joint projects between Caltrans and other government entities. In these joint projects, Caltrans may not be the lead agency implementing the project although Caltrans is still involved if the project occurs on its right-of-way.

Caltrans may invoke this variance for joint projects where Caltrans and local government entity are involved provided that 1) the project is within the Caltrans Right-of-Way; 2) Caltrans reviews/ oversees all phases of the project including design, contracting, environmental assessment, construction, operation, and maintenance; and 3) Caltrans oversees the project to verify all variance conditions are complied with. Caltrans will be fully responsible for the variance notification and implementation in these joint projects.

jj) All correspondence shall be directed to the following office:

Hazardous Waste Permitting
Department of Toxic Substances Control
8800 Cal Center Drive
Sacramento, CA 95826

Attn: Caltrans Lead Variance Notification Unit

10. DISCLAIMER.

a) The issuance of this variance does not relieve Caltrans of the responsibility for compliance with Health and Safety Code, chapter 6.5, or the regulations adopted thereunder, and any other laws and regulations other than those specifically identified in Section 8 of this variance. Caltrans is subject to all terms and conditions herein. The granting of this variance confers no relief from compliance with any federal, State or local requirements other than those specifically provided herein.

b) The issuance of this variance does not release Caltrans from any liability associated with the handling of hazardous waste, except as specifically provided herein and subject to all terms and conditions of this variance.

11. VARIANCE MODIFICATION OR REVOCATION. This variance is subject to review at the discretion of DTSC and may be modified or revoked by DTSC upon change of ownership and at any other time pursuant to Health and Safety Code, section 25143.
12. CEQA DETERMINATION. DTSC adopted a Negative Declaration on June 30, 2009.

RE: 101 Aux Lanes

Order No.: 0904088

Dear Patrick Walz:

Torrent Laboratory, Inc. received 36 samples on 4/14/2009 for the analyses presented in the following report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Reported data is applicable for only the samples received as part of the order number referenced above.

Torrent Laboratory, Inc, is certified by the State of California, ELAP #1991. If you have any questions regarding these tests results, please feel free to contact the Project Management Team at (408)263-5258;ext: 204.

Sincerely,

Laboratory Director

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

or other approved signatory

EMSL recommends that soil samples reported as "ND" be tested by the EPA Screening Method/Qualitative. The above report relates only to the items tested. This report may not be reproduced, except in full, without written approval by EMSL Analytical, Inc. The above test must not be used by the client to claim product endorsement by NVLAP nor any agency of the United States Government. Unless otherwise noted, the results in this report have not been blank corrected. Samples received in good condition unless otherwise noted.

RE: 101 Aux Lanes - See narrative for revision details

Order No.: 0904088

Dear Patrick Walz:

Torrent Laboratory, Inc. received 36 samples on 4/14/2009 for the analyses presented in the following report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Reported data is applicable for only the samples received as part of the order number referenced above.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these tests results, please feel free to contact the Project Management Team at (408)263-5258;ext: 204.

Sincerely,

Laboratory Director

Lab Order: 0904088

CASE NARRATIVE

Analytical Comments for Asbestos PLM, Note: Analysis performed by NVLAP Certified sub-contract laboratory. (Certification # 101048-3).

Analytical Comment for Method 6010B for RunNo 19315 and 19317, Note: The % recoveries in the MS/MSD for Lead are outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. No corrective action is required.

REVISIONS:

Per client request, STLC, DI STLC and TCLP analysis was added to specified samples. Due to insufficient sample mass available, no DI STLC or TCLP was performed on requested sample -001 (N-1-2 @ 0.5). Due to limited sample available for all samples, STLC, DI STLC and TCLP was performed using only 25 g of homogenized sample.

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to DI wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/30/2009 @ 12.15 PM and ended on 06/01/2009 @ 12:15 PM

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/30/2009 @ 12.15 PM and ended on 06/01/2009 @ 12:15 PM

Note: Extraction of 25 g sample / 500g TCLP Fluid #1 was performed according to Toxicity Characteristic Leaching Procedure (TCLP) which was rotated in a rotary shaker for 18 hours.

Extraction started on 06/12/2009 @ 4:00 PM and ended on 06/13/2009 @ 10:00 AM

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

or other approved signatory

EMSL recommends that soil samples reported as "ND" be tested by the EPA Screening Method/Qualitative. The above report relates only to the items tested. This report may not be reproduced, except in full, without written approval by EMSL Analytical, Inc. The above test must not be used by the client to claim product endorsement by NVLAP nor any agency of the United States Government. Unless otherwise noted, the results in this report have not been blank corrected. Samples received in good condition unless otherwise noted.

RE: 101 Aux Lanes

Order No.: 0904074

Dear Patrick Walz:

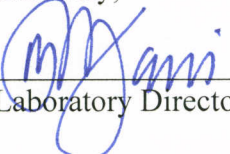

Torrent Laboratory, Inc. received 34 samples on 4/13/2009 for the analyses presented in the following report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Reported data is applicable for only the samples received as part of the order number referenced above.

Torrent Laboratory, Inc, is certified by the State of California, ELAP #1991. If you have any questions regarding these tests results, please feel free to contact the Project Management Team at (408)263-5258;ext: 204.

Sincerely,

Laboratory Director

Torrent Laboratory, Inc.

Date: 23-Apr-09

CLIENT: URS Corporation, San Jose

Project: 101 Aux Lanes

Lab Order: 0904074

CASE NARRATIVE

Analytical Comments for Asbestos PLM, Note: Analysis performed by NVLAP Certified sub-contract laboratory. (Certification # 101048-3).

Note: although pH was measured upon laboratory receipt, the samples were received outside of the recommended holding time (24 hours from collection).

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

EMSL recommends that soil samples reported as "ND" be tested by the EPA Screening Method/Qualitative. The above report relates only to the items tested. This report may not be reproduced, except in full, without written approval by EMSL Analytical, Inc. The above test must not be used by the client to claim product endorsement by NVLAP nor any agency of the United States Government. Unless otherwise noted, the results in this report have not been blank corrected. Samples received in good condition unless otherwise noted.

RE: 101 Aux Lanes - See case narrative for revision details.

Order No.: 0904074

Dear Patrick Walz:

Torrent Laboratory, Inc. received 34 samples on 4/13/2009 for the analyses presented in the following report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Reported data is applicable for only the samples received as part of the order number referenced above.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these tests results, please feel free to contact the Project Management Team at (408)263-5258;ext: 204.

Sincerely,

Laboratory Director

6/18/09

Torrent Laboratory, Inc.

Date: 18-Jun-09

CLIENT: URS Corporation, San Jose
Project: 101 Aux Lanes
Lab Order: 0904074

CASE NARRATIVE

Analytical Comments for Asbestos PLM, Note: Analysis performed by NVLAP Certified sub-contract laboratory. (Certification # 101048-3).

Note: although pH was measured upon laboratory receipt, the samples were received outside of the recommended holding time (24 hours from collection).

REVISIONS: 6/18/09

Per client request, STLC, DI STLC and TCLP analysis was added to specified samples. Due to limited sample available for all samples, STLC, DI STLC and TCLP was performed using only 25 g of homogenized sample.

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to DI wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/30/2009 @ 12.15 PM and ended on 06/01/2009 @ 12:15 PM

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/30/2009 @ 12.15 PM and ended on 06/01/2009 @ 12:15 PM

Note: Extraction of 25 g sample / 500g TCLP Fluid #1 was performed according to Toxicity Characteristic Leaching Procedure (TCLP) which was rotated in a rotary shaker for 18 hours.

Extraction started on 06/12/2009 @ 4:00 PM and ended on 06/13/2009 @ 10:00 AM

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

EMSL recommends that soil samples reported as "ND" be tested by the EPA Screening Method/Qualitative. The above report relates only to the items tested. This report may not be reproduced, except in full, without written approval by EMSL Analytical, Inc. The above test must not be used by the client to claim product endorsement by NVLAP nor any agency of the United States Government. Unless otherwise noted, the results in this report have not been blank corrected. Samples received in good condition unless otherwise noted.

RE: 101 Aux Lanes

Order No.: 0904073

Dear Patrick Walz:

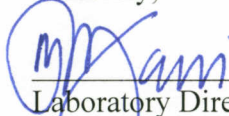

Torrent Laboratory, Inc. received 46 samples on 4/13/2009 for the analyses presented in the following report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Reported data is applicable for only the samples received as part of the order number referenced above.

Torrent Laboratory, Inc, is certified by the State of California, ELAP #1991. If you have any questions regarding these tests results, please feel free to contact the Project Management Team at (408)263-5258;ext: 204.

Sincerely,

Laboratory Director

Lead	SW6010B	4/20/2009	1	1	1.0	27	mg/Kg	5109

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

CLIENT: URS Corporation, San Jose
Work Order: 0904073
Project: 101 Aux Lanes

Torrent Laboratory, Inc.

Date: 19-Jun-09

CLIENT: URS Corporation, San Jose
Project: 101 Aux Lanes
Lab Order: 0904073

CASE NARRATIVE

Note: although pH was measured upon laboratory receipt, the samples were received outside of the recommended holding time (24 hours from collection).

REVISIONS:

Per client request, STLC, DI STLC and TCLP analysis was added to specified samples. Due to insufficient sample mass available, no TCLP was performed on requested sample -021 (S-3-11 @ 1.0-D). Due to limited sample available for all samples, STLC, DI STLC and TCLP was performed using only 25 g of homogenized sample.

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to DI wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/30/2009 @ 12.15 PM and ended on 06/01/2009 @ 12:15 PM

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/30/2009 @ 12.15 PM and ended on 06/01/2009 @ 12:15 PM

Note: Extraction of 25 g sample / 500g TCLP Fluid #1 or Fluid #1 (-030 and -036) was performed according to Toxicity Characteristic Leaching Procedure (TCLP) which was rotated in a rotary shaker for 18 hours.

Extraction started on 06/16/2009 @ 4:45PM and ended on 06/17/2009 @ 10:45 AM

URS Corporation, San Jose

Date Received: 4/13/2009
Date Reported: 6/19/2009

Client Sample ID: S-3-2 @ 2.0
Sample Location: 101 Aux Lanes
Sample Matrix: SOIL
Date/Time Sampled 4/12/2009 9:25:00 PM

Lab Sample ID: 0904073-001
Date Prepared: 4/15/2009

Parameters	Analysis Method	Date Analyzed	RL	Dilution Factor	MRL	Result	Units	Analytical Batch
Lead	SW6010B	4/15/2009	1	1	1.0	32	mg/Kg	5101

Client Sample ID: S-3-2 @ 3.0
Sample Location: 101 Aux Lanes
Sample Matrix: SOIL
Date/Time Sampled 4/12/2009 9:25:00 PM

Lab Sample ID: 0904073-002
Date Prepared: 6/3/2009

Parameters	Analysis Method	Date Analyzed	RL	Dilution Factor	MRL	Result	Units	Analytical Batch
Lead (DI-STLC)	6010B (DI-STLC)	6/3/2009	0.1	1	0.10	ND	mg/L	5250
Lead (STLC)	6010B (STLC)	6/4/2009	0.1	1	0.10	2.7	mg/L	5257
Lead	SW6010B	4/15/2009	1	1	1.0	50	mg/Kg	5101

Client Sample ID: S-3-12 @ 0.5
Sample Location: 101 Aux Lanes
Sample Matrix: SOIL
Date/Time Sampled 4/12/2009 10:25:00 PM

Lab Sample ID: 0904073-003
Date Prepared: 4/15/2009

Parameters	Analysis Method	Date Analyzed	RL	Dilution Factor	MRL	Result	Units	Analytical Batch
Lead	SW6010B	4/15/2009	1	1	1.0	34	mg/Kg	5101

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

CLIENT: URS Corporation, San Jose
Work Order: 0904073
Project: 101 Aux Lanes

RE: Hwy 101-Aux Lane

Order No.: 0903162

Dear Patrick Walz:

Torrent Laboratory, Inc. received 30 samples on 3/26/2009 for the analyses presented in the following report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Reported data is applicable for only the samples received as part of the order number referenced above.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these tests results, please feel free to contact the Project Management Team at (408)263-5258;ext: 204.

Sincerely,

 4/8/09

Torrent Laboratory, Inc.

Date: 08-Apr-09

CLIENT: URS Corporation, San Jose
Project: Hwy 101-Aux Lane
Lab Order: 0903162

CASE NARRATIVE

Analytical Comments for Asbestos, PLM Note: Analysis performed by NVLAP Certified sub-contract laboratory. (Certification # 101048-3).

Analytical Comment for METHOD 6010B_S, 0903162-026A MS/MSD, QC Batch ID 19125, Note:The % recoveries in the MS/MSD for Lead and Nickel are not recoverable. The sample concentration is greater than 4X the spike concentration. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903162-026A MS/MSD, QC Batch ID 19125, Note:The % recoveries in the MS for Barium, Chromium, Copper and Zinc, and in the MSD for Barium are outside of laboratory control limit but are within % RPD limits and % Recovery limits for the LCS/LCSD. No corrective action is required.

Analytical Comment for METHOD 6010B, 0903162-005A MS/MSD, QC Batch ID 19162, Note:The % recoveries in the MS/MSD for Lead are outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. No corrective action is required.

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

EMSL recommends that soil samples reported as "ND" be tested by the EPA Screening Method/Qualitative. The above report relates only to the items tested. This report may not be reproduced, except in full, without written approval by EMSL Analytical, Inc. The above test must not be used by the client to claim product endorsement by NVLAP nor any agency of the United States Government. Unless otherwise noted, the results in this report have not been blank corrected. Samples received in good condition unless otherwise noted.

CLIENT: URS Corporation, San Jose
Project: Hwy 101-Aux Lane
Lab Order: 0903162

CASE NARRATIVE

Analytical Comments for Asbestos, PLM Note: Analysis performed by NVLAP Certified sub-contract laboratory. (Certification # 101048-3).

Analytical Comment for METHOD 6010B_S, 0903162-026A MS/MSD, QC Batch ID 19125, Note:The % recoveries in the MS/MSD for Lead and Nickel are not recoverable. The sample concentration is greater than 4X the spike concentration. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903162-026A MS/MSD, QC Batch ID 19125, Note:The % recoveries in the MS for Barium, Chromium, Copper and Zinc, and in the MSD for Barium are outside of laboratory control limit but are within % RPD limits and % Recovery limits for the LCS/LCSD. No corrective action is required.

Analytical Comment for METHOD 6010B, 0903162-005A MS/MSD, QC Batch ID 19162, Note:The % recoveries in the MS/MSD for Lead are outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. No corrective action is required. Analytical Comments for METHOD 6010B (STLC), SAMPLE 0903162-003AMSD: Pb,Ni are out of control limit.

REVISIONS:

Per client request, STLC, DI STLC and TCLP analysis was added to specified samples. Due to insufficient sample mass available, no TCLP was performed on requested sample -027 (N-2-11@1.0). Due to limited sample available for all samples, STLC, DI STLC and TCLP was performed using only 25 g of homogenized sample.

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to DI wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/27/2009 @ 2.00 PM and ended on 05/29/2009 @ 2:00 PM

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

CLIENT: URS Corporation, San Jose
Project: Hwy 101-Aux Lane
Lab Order: 0903162

CASE NARRATIVE

Extraction started on 05/27/2009 @ 2:00 PM and ended on 05/29/2009 @ 2:00 PM

Note: Extraction of 25 g sample / 500g TCLP Fluid #1 was performed according to Toxicity Characteristic Leaching Procedure (TCLP) which was rotated in a rotary shaker for 18 hours.

Extraction started on 06/12/2009 @ 4:00 PM and ended on 06/13/2009 @ 10:00 AM

RE: Hwy 101-Aux Lane - See narrative for revision details.

Order No.: 0903161

Dear Patrick Walz:

Torrent Laboratory, Inc. received 40 samples on 3/26/2009 for the analyses presented in the following report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Reported data is applicable for only the samples received as part of the order number referenced above.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these tests results, please feel free to contact the Project Management Team at (408)263-5258;ext: 204.

Sincerely,

Laboratory Director

CASE NARRATIVE

Analytical Comments for Asbestos, PLM Note: Analysis performed by NVLAP Certified sub-contract laboratory. (Certification # 101048-3).

Analytical Comment for METHOD 6010B_S, 0903161-007A MS/MSD, QC Batch ID 190138,
Note: The % recoveries in the MS/MSD for Lead are not recoverable. The sample concentration is greater than 4X the spike concentration. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903154-001A MS/MSD, QC Batch ID 19067,
Note: The % recoveries in the MS/MSD for Lead are outside of laboratory control limits and % RPD but are within % RPD limits and % Recovery limits for the LCS/LCSD. A post digestion spike on the parent sample was analyzed and Lead was recovered within control limits indicating probable non-homogeneity of the samples. No corrective action is required.

REVISIONS:

Per client request, STLC, DI STLC and TCLP analysis was added to specified samples. Due to insufficient sample mass available, no TCLP was performed on requested sample -027 (N-2-11@1.0). Due to limited sample available for all samples, STLC, DI STLC and TCLP was performed using only 25 g of homogenized sample.

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to DI wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/19/2009 @ 4.00 PM and ended on 05/21/2009 @ 4:00 PM

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/19/2009 @ 4.00 PM and ended on 05/21/2009 @ 4:00 PM

Note: Extraction of 25 g sample / 500g TCLP Fluid #1 was performed according to Toxicity

CLIENT: URS Corporation, San Jose
Project: Hwy 101-Aux Lane
Lab Order: 0903161

CASE NARRATIVE

Characteristic Leaching Procedure (TCLP) which was rotated in a rotary shaker for 18 hours.

Extraction started on 06/11/2009 @ 5:00 PM and ended on 06/12/2009 @ 11:00 AM
and
Extraction started on 06/12/2009 @ 4:00 PM and ended on 06/13/2009 @ 10:00 AM

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

EMSL recommends that soil samples reported as "ND" be tested by the EPA Screening Method/Qualitative. The above report relates only to the items tested. This report may not be reproduced, except in full, without written approval by EMSL Analytical, Inc. The above test must not be used by the client to claim product endorsement by NVLAP nor any agency of the United States Government. Unless otherwise noted, the results in this report have not been blank corrected. Samples received in good condition unless otherwise noted.

This report relates only to the samples listed above and may not be reproduced except in full, without EMSL's written approval. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the federal government. EMSL is not responsible for sample collection activities or method limitations. Some samples may contain asbestos fibers below the resolution limit of PLM. EMSL recommends that samples reported as none detected or less than the limit of detection undergo additional analysis via TEM. Samples received in good condition unless otherwise noted.

RE:

Order No.: 0903160

Dear Patrick Walz:

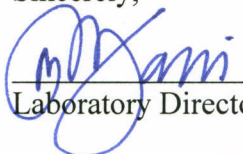

Torrent Laboratory, Inc. received 36 samples on 3/26/2009 for the analyses presented in the following report.

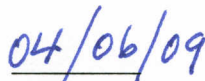

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Reported data is applicable for only the samples received as part of the order number referenced above.

Torrent Laboratory, Inc, is certified by the State of California, ELAP #1991. If you have any questions regarding these tests results, please feel free to contact the Project Management Team at (408)263-5258;ext: 204.

Sincerely,

Laboratory Director

CASE NARRATIVE

Analytical Comment for METHOD 6010B_S, 0903160-024A MS/MSD, QC Batch ID 19136, Note:The % recovery in the MS for and MSD for leadl are outside of laboratory control limits but within % RPD limits and % Recovery limits for the LCS/LCSD. A post digestion spike on the parent sample was analyzed and all parameters were recovered within control limits indicating probable non-homogeneity of the samples. No corrective action is required.

Analytical Comment for METHOD 7471A, 0903160-011MS/MSD, QC Batch ID 19076, Note:The % recoveries in the MS/MSD for Mercury are outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. No corrective action is required.

Analytical Comment for METHOD 6010B, 0903160-011MS/MSD, QC Batch ID 19132, Note:The % recovery in the MS for Barium is outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. No corrective action is required.

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

Lab Order: 0903160

CASE NARRATIVE

Analytical Comment for METHOD 6010B_S, 0903160-024A MS/MSD, QC Batch ID 19136, Note: The % recovery in the MS for and MSD for lead are outside of laboratory control limits but within % RPD limits and % Recovery limits for the LCS/LCSD. A post digestion spike on the parent sample was analyzed and all parameters were recovered within control limits indicating probable non-homogeneity of the samples. No corrective action is required.

Analytical Comment for METHOD 7471A, 0903160-011MS/MSD, QC Batch ID 19076, Note: The % recoveries in the MS/MSD for Mercury are outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. No corrective action is required.

Analytical Comment for METHOD 6010B, 0903160-011MS/MSD, QC Batch ID 19132, Note: The % recovery in the MS for Barium is outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. No corrective action is required. Analytical Comments for METHOD 6010B (STLC), SAMPLE 0903160-028AMSD: Pb is out of control limit.

REVISIONS:

Per client request, STLC, DI STLC and TCLP analysis was added to specified samples. Due to limited sample available for all samples, STLC, DI STLC and TCLP was performed using only 25 g of homogenized sample.

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to DI wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/19/2009 @ 4.00 PM and ended on 05/21/2009 @ 4:00 PM

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/19/2009 @ 4.00 PM and ended on 05/21/2009 @ 4:00 PM

Note: Extraction of 25 g sample / 500g TCLP Fluid #1 was performed according to Toxicity

CLIENT: URS Corporation, San Jose
Project: Hwy 101-Aux Lane
Lab Order: 0903160

CASE NARRATIVE

Characteristic Leaching Procedure (TCLP) which was rotated in a rotary shaker for 18 hours.

Extraction started on 06/11/2009 @ 5:00 PM and ended on 06/12/2009 @ 11:00 AM

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

RE: HWY 101-Aux lane

Order No.: 0903154

Dear Patrick Walz:

Torrent Laboratory, Inc. received 111 samples on 3/25/2009 for the analyses presented in the following report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Reported data is applicable for only the samples received as part of the order number referenced above.

Torrent Laboratory, Inc, is certified by the State of California, ELAP #1991. If you have any questions regarding these tests results, please feel free to contact the Project Management Team at (408)263-5258;ext: 204.

Sincerely,

Laboratory Director

CASE NARRATIVE

Analytical Comments for Asbestos, PLM Note: Analysis performed by NVLAP Certified sub-contract laboratory. (Certification # 101048-3).

Analytical Comment for METHOD 6010B_S, 0903154-001A MS/MSD, QC Batch ID 19070, Note:The % recoveries in the MS/MSD for Lead and Zinc are not recoverable. The sample concentration is greater than 4X the spike concentration. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903154-001A MS/MSD, QC Batch ID 19067, Note:The % recovery in the MS for Barium and Copper and in the MSD for Copper and Nickel are outside of laboratory control limits but within % RPD limits and % Recovery limits for the LCS/LCSD. A post digestion spike on the parent sample was analyzed and all parameters were recovered within control limits indicating probable non-homogeneity of the samples. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903154-097A MS/MSD, QC Batch ID 19065, Note:The % recoveries in the MS/MSD for Lead are not recoverable. The sample concentration is greater than 4X the spike concentration. No corrective action is required.

Analytical Comment for METHOD 7470A, 0903154-086 MS/MSD, QC Batch ID 19062, Note:The % recoveries in the MS/MSD for Mercury are outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. No corrective action is required.

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

EMSL recommends that soil samples reported as "ND" be tested by the EPA Screening Method/Qualitative. The above report relates only to the items tested. This report may not be reproduced, except in full, without written approval by EMSL Analytical, Inc. The above test must not be used by the client to claim product endorsement by NVLAP nor any agency of the United States Government. Unless otherwise noted, the results in this report have not been blank corrected. Samples received in good condition unless otherwise noted.

CASE NARRATIVE

Analytical Comments for Asbestos, PLM Note: Analysis performed by NVLAP Certified sub-contract laboratory. (Certification # 101048-3).

Analytical Comment for METHOD 6010B_S, 0903154-001A MS/MSD, QC Batch ID 19070,
Note:The % recoveries in the MS/MSD for Lead and Zinc are not recoverable. The sample concentration is greater than 4X the spike concentration. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903154-001A MS/MSD, QC Batch ID 19067,
Note:The % recovery in the MS for Barium and Copper and in the MSD for Copper and Nickel are outside of laboratory control limits but within % RPD limits and % Recovery limits for the LCS/LCSD. A post digestion spike on the parent sample was analyzed and all parameters were recovered within control limits indicating probable non-homogeneity of the samples. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903154-097A MS/MSD, QC Batch ID 19065,
Note:The % recoveries in the MS/MSD for Lead are not recoverable. The sample concentration is greater than 4X the spike concentration. No corrective action is required.

Analytical Comment for METHOD 7470A, 0903154-086 MS/MSD, QC Batch ID 19062, Note:The % recoveries in the MS/MSD for Mercury are outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. No corrective action is required.

REVISIONS:

Per client request, STLC, DI STLC and TCLP analysis was added to specified samples. Due to insufficient sample mass available, no DI STLC or TCLP was performed on requested sample -046 (S-3-6 @ 0.5). Due to limited sample available for all samples, STLC, DI STLC and TCLP was performed using only 25 g of homogenized sample.

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to DI wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/17/2009 @ 4:00 PM and ended on 05/19/2009 @ 4:00 PM
and

Extraction started on 05/19/2009 @ 4:00 PM and ended on 05/21/2009 @ 4:00 PM

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

CLIENT: URS Corporation, San Jose
Work Order: 0903154
Project: HWY 101-Aux lane

RE: Hwy 101-Aux Lane

Order No.: 0903138

Dear Patrick Walz:

Torrent Laboratory, Inc. received 86 samples on 3/24/2009 for the analyses presented in the following report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Reported data is applicable for only the samples received as part of the order number referenced above.

Torrent Laboratory, Inc, is certified by the State of California, ELAP #1991. If you have any questions regarding these tests results, please feel free to contact the Project Management Team at (408)263-5258;ext: 204.

Sincerely,

 4/1/09

CASE NARRATIVE

Analytical Comments for Asbestos, PLM Note: Analysis performed by NVLAP Certified sub-contract laboratory. (Certification # 101048-3).

Analytical Comment for METHOD 6010B_S, 0903138-049A MS/MSD, QC Batch ID 19067,
Note:The % recoveries in the MS/MSD for Barium are not recoverable. The sample concentration is greater than 4X the spike concentration. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903138-049A MS/MSD, QC Batch ID 19067,
Note:The % recovery in the MSD for Copper is outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903138-068A MS/MSD, QC Batch ID 19066,
Note:The % recoveries in the MS/MSD for Lead are not recoverable. The sample concentration is greater than 4X the spike concentration. No corrective action is required.

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

EMSL recommends that soil samples reported as "ND" be tested by the EPA Screening Method/Qualitative. The above report relates only to the items tested. This report may not be reproduced, except in full, without written approval by EMSL Analytical, Inc. The above test must not be used by the client to claim product endorsement by NVLAP nor any agency of the United States Government. Unless otherwise noted, the results in this report have not been blank corrected. Samples received in good condition unless otherwise noted.

Torrent Laboratory, Inc.

Date: 18-Jun-09

CLIENT: URS Corporation, San Jose
Project: Hwy 101-Aux Lane
Lab Order: 0903138

CASE NARRATIVE

Analytical Comments for Asbestos, PLM Note: Analysis performed by NVLAP Certified sub-contract laboratory. (Certification # 101048-3).

Analytical Comment for METHOD 6010B_S, 0903138-049A MS/MSD, QC Batch ID 19067,
Note:The % recoveries in the MS/MSD for Barium are not recoverable. The sample concentration is greater than 4X the spike concentration. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903138-049A MS/MSD, QC Batch ID 19067,
Note:The % recovery in the MSD for Copper is outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903138-068A MS/MSD, QC Batch ID 19066,
Note:The % recoveries in the MS/MSD for Lead are not recoverable. The sample concentration is greater than 4X the spike concentration. No corrective action is required.

REVISIONS:

Per client request, STLC, DI STLC and TCLP analysis was added to specified samples. Due to insufficient sample mass available, no TCLP was performed on requested sample -023 (N-1-4 @ 1.0). Due to limited sample available for all samples, STLC, DI STLC and TCLP was performed using only 25 g of homogenized sample.

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to DI wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/15/2009 @ 6.00 PM and ended on 05/17/2009 @ 6:00 PM
and

Extraction started on 05/17/2009 @ 4.00 PM and ended on 05/19/2009 @ 4:00 PM

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

This report relates only to the samples listed above and may not be reproduced except in full, without EMSL's written approval. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the federal government. EMSL is not responsible for sample collection activities or method limitations. Some samples may contain asbestos fibers below the resolution limit of PLM. EMSL recommends that samples reported as none detected or less than the limit of detection undergo additional analysis via TEM. Samples received in good condition unless otherwise noted.

RE: Hwy 101 Aux Lanes

Order No.: 0903131

Dear Patrick Walz:

Torrent Laboratory, Inc. received 65 samples on 3/23/2009 for the analyses presented in the following report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Reported data is applicable for only the samples received as part of the order number referenced above.

Torrent Laboratory, Inc, is certified by the State of California, ELAP #1991. If you have any questions regarding these tests results, please feel free to contact the Project Management Team at (408)263-5258;ext: 204.

Sincerely,

Laboratory Director

Date

Patti Sandrock
QA Officer 

CLIENT: URS Corporation, San Jose
Project: Hwy 101 Aux Lanes
Lab Order: 0903131

CASE NARRATIVE

Analytical Comments for Asbestos, PLM Note: Analysis performed by NVLAP Certified sub-contract laboratory. (Certification # 101048-3).

Analytical Comment for METHOD 6010B_S, 0903131-018A MS/MSD, QC Batch ID 19029, Note: The % recoveries in the MS/MSD for Barium and Chromium are outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. A post digestion spike on the parent sample was analyzed and all parameters were recovered within control limits indicating probably non-homogeneity of the samples. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903131-037A MS/MSD, QC Batch ID 19034, Note: The % recoveries in the MS for Barium, Copper, Nickel and Zinc and in the MSD for Barium, Chromium, Copper, Nickel and Zinc are outside of laboratory control limits but within % RPD limits and % recovery limits for the LCS/LCSD. A post digestion spike on the parent sample was analyzed and all parameters were recovered within control limits indicating probably non-homogeneity of the samples. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903131-037A MS/MSD, QC Batch ID 19034, Note: The % recoveries in the MS/MSD for Lead are not recoverable. The sample concentration is greater than 4X the spike concentration. No corrective action is required.

Analytical Comment for METHOD 6010B_S, 0903131-56A MS/MSD, QC Batch ID 19036, Note: The % recoveries and % RPD in the MS/MSD for Lead are outside of laboratory control limits but are within % recovery limits and % RPD limits for the LCS/LCSD.

Per Client request pH analyzed and reported for samples 011A to 015A.

Note: although pH was measured upon requests, the samples were received outside of the recommended holding time (7 days from collection).

Rev1 4/16/09

Per client request, STLC, DI STLC and TCLP analysis was added to specified samples. Due to insufficient sample mass available, no TCLP was performed on requested sample -001 (N-2-1@0.5). Due to limited sample available for all samples, STLC, DI STLC and TCLP was performed using only 25 g of homogenized sample.

CLIENT: URS Corporation, San Jose
Project: Hwy 101 Aux Lanes
Lab Order: 0903131

CASE NARRATIVE

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to DI wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/15/2009 @ 6.00 PM and ended on 05/17/2009 @ 6:00 PM

Note: Extraction of 25 g sample / 250g 0.2M Sodium Citrate Solution was performed according to DI wet extraction procedure (WET) which was rotated in a rotary shaker for 48 hours.

Extraction started on 05/15/2009 @ 6.00 PM and ended on 05/17/2009 @ 6:00 PM

Note: Extraction of 25 g sample / 500g TCLP Fluid #1 was performed according to Toxicity Characteristic Leaching Procedure (TCLP) which was rotated in a rotary shaker for 18 hours.

Extraction started on 06/09/2009 @ 5.35 PM and ended on 06/10/2009 @ 11:35 AM

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

RE: 101- Aux lanes/Drums

Order No.: 0904168

Dear Patrick Walz:

Torrent Laboratory, Inc. received 3 samples on 4/28/2009 for the analyses presented in the following report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Reported data is applicable for only the samples received as part of the order number referenced above.

Torrent Laboratory, Inc, is certified by the State of California, ELAP #1991. If you have any questions regarding these tests results, please feel free to contact the Project Management Team at (408)263-5258;ext: 204.

Sincerely,

Laboratory Director

TPH (Gasoline)	SW8260B(TPH)	5/5/2009	100	1	100	310x	µg/Kg	G19461
Surr: 4-Bromofluorobenzene	SW8260B(TPH)	5/5/2009	0	1	56.9-133	126	%REC	G19461
Note: x - Sample chromatogram does not resemble gasoline standard pattern. TPH value due to presence of heavy end unidentified compounds within the C5-C12 range quantified as Gasoline.								
pH	SW9045C	4/30/2009	0.05	1	0.0500	12.42	pH Units	R19447

Definitions, legends and Notes

Note	Description
ug/kg	Microgram per kilogram (ppb, part per billion).
ug/L	Microgram per liter (ppb, part per billion).
mg/kg	Milligram per kilogram (ppm, part per million).
mg/L	Milligram per liter (ppm, part per million).
LCS/LCSD	Laboratory control sample/laboratory control sample duplicate.
MDL	Method detection limit.
MRL	Modified reporting limit. When sample is subject to dilution, reporting limit times dilution factor yields MRL.
MS/MSD	Matrix spike/matrix spike duplicate.
N/A	Not applicable.
ND	Not detected at or above detection limit.
NR	Not reported.
QC	Quality Control.
RL	Reporting limit.
% RPD	Percent relative difference.
a	pH was measured immediately upon the receipt of the sample, but it was still done outside the holding time.
sub	Analyzed by subcontracting laboratory, Lab Certificate #

A Creative Joint Venture For Better Environmental Solutions

Sample Acquisition As Directed By the Client Limited Asbestos and Lead Paint Inspection Report

Date: May 8, 2009

KELLCO-MACS Job #: 0904-24

Client: Mr. Patrick Walz
URS Corporation
55 South Market Street
Suite #1500
San Jose, CA 95113

Location: Adobe Creek Bridge, Matadero Creek Bridge &
Permanente Creek Bridge
Mountain View, CA 94043

Date of Inspection: April 27, 2009 & April 28, 2009

Inspectors: Derrik Quach SST #02-3214, DHS Lead #2280
Philip Bradley CAC #01-2966, DHS Lead #4403

Description Of The Inspected Area: The inspection was conducted on three bridges located in Mountain View, CA. The sampling was at the direction of the client. The bridges are concrete with concrete beams and pipe with insulation running under them.

Background

This is a limited asbestos and lead inspection on three bridges located in Mountain View, CA. The sampling was at the direction of the client.

Synopsis

Asbestos was **NOT** found in the tested materials.

Lead paint was found in the following tested materials:

- Flaking Paint – Matadero Creek Bridge East Side
- Paint on Concrete Barrier Wall & Trail South Wall – Adobe Creek Bridge

About the Inspection

The inspection performed was both visual and tactile. Samples were taken of suspect materials located at the exterior of the survey area.

The inspection was limited to those materials readily discerned by the client in a reasonable inspection by a competent inspector. If future work uncovers any non-sampled materials, these should be submitted for asbestos and/or lead paint analysis.

The following numbering convention was used for this inspection:

LETTER	STANDS FOR	EXAMPLE	MEANING
XX	Building DESIGNATION based on information provided on drawings provided to us prior to inspection	ACB MCB PCB	Adobe Creek Bridge Matadero Creek Bridge Permanente Creek Bridge
Y & Optional Z	Building SYSTEM (W: wall; F: Flooring; C: Ceiling; T: TSI; M: Misc)	W	Wall Sample
xx	Sample number and layer	01 01a	Adobe Creek Bridge – Wall Sample – First Sample & Layer Adobe Creek Bridge – Wall Sample – First Sample & Second Layer

- **Asbestos Findings**

Asbestos samples were analyzed in the KELLCO-MACS laboratory, by Polarized Light Microscopy, the EPA's recommended method. Copies of the full laboratory reports are attached. These valuable reports can be utilized as future reference to determine if a particular material was tested.

Photographs of sampled materials are included. Sample locations are noted on the attached not-to-scale drawing.

The determination of a material to be Asbestos Containing Material (ACM) was made either by direct sampling or by homogeneity with at least one positive sample of the same material.

Materials that tested **positive** for asbestos are: **NONE**

Tested materials that were **none detected** for asbestos are:

Lab Sample #	Field Sample #	Field Description
L189105-1	PCB-W-01	NB 101 @ 4' Above Water - Concrete

L189150-15	MCB-15	W. Side Between Bridges - Concrete - Middle Wall Between Bridges, W. End

- **Paint Findings**

Lead samples were analyzed by Atomic Absorption in the KELLCO-MACS laboratory. OSHA requires protection of workers from exposure to any lead. Paint should be considered as containing lead if it is the same color as any positive tested material, unless it has specifically been tested and shown to be **none detected** for lead.

The following materials tested **positive** for lead:

Lab Sample #	Field Sample #	Field Description	PPM	Wt %
P189107-1	ACB-Pb-01	NB 101 - Barriers Wall S End - Paint On Concrete	113	0.0113
P189107-2	ACB-Pb-02	SB 101 - Trail S Wall - Paint On Concrete	138	0.0138
P189151-2	MCB-Pb-02	E. Side Of Bridge - Concrete - Flaking Paint, NE End Of Wall	108	0.0108

Paint of the same color as the above samples should be considered positive unless proven otherwise by direct sampling with results of "None Detected."

The following are materials for which the lead was **none detected**:

Lab Sample #	Field Sample #	Field Description
P189106-1	PCB-Pb-01	Hydro Cap. NB 101 - Paint On Metal
P189106-2	PCB-Pb-02	NB 101 - N Wall Of Bridge - Paint On Concrete
P189106-3	PCB-Pb-03	NB 101 - N Wall Of Creek - Paint On Concrete

Lab Sample #	Field Sample #	Field Description
P189151-1	MCB-Pb-01	E. Side Of Bridge - Concrete - Paint On N. Embankment, 2nd Tier

Although there are some materials that are negative for lead paint, for the purposes of demolition it is recommended that all painted materials be considered as lead containing.

Regulatory Requirements

The Environmental Protection Agency (EPA) defines Asbestos Containing Material as any material that contains greater than 1% asbestos.

Removal or disturbance of any amount of lead paint requires adherence to the Cal-OSHA and DHS regulations, including proper training and certification for workers and supervisors

The OSHA lead (1532) regulations require that a Negative Initial Determination for lead exposure be made with paint that contains greater than 0.06% (600 ppm) of lead. Paint with less than 0.06% lead should still be treated within the OSHA guidelines, but with reasonable work practices should not generate OSHA action levels of lead exposure.

Building components with intact lead paint and no other hazardous materials can be disposed of as non-hazardous construction waste. Paint chips and debris must be disposed of as lead containing hazardous waste.

Comment Regarding All Lead Containing Materials:

Lead is a known health hazard. Lead containing materials in good condition do not necessarily need to be removed if they are not disturbed; they should however be respected.

Painted surfaces that contain lead should be made known to contractors who may disturb them during their work. OSHA guidelines for workers in contact with lead paint apply if ANY detectable lead is found.

Anyone coming in contact with leaded paint should be advised not to disturb it without taking precautionary measures appropriate to avoid lead contamination or lead exposure.

Areas Needing Immediate Corrective Action

Chipping and peeling lead paint should be removed prior to renovation and must be removed prior to demolition of the survey site.

Analytical Procedures

- ***POLARIZED LIGHT MICROSCOPY (PLM)***

Bulk samples were analyzed in accordance with U.S. EPA "Test Method for Determination of Asbestos in Bulk Building Materials, 1993," with inclusion of area percent estimates of the sample components. The use of the McCrone Color Dispersion Staining Technique supplements the analysis when considered useful by the analyst. The samples are prepared with refractive immersion oil and are examined under Polarized Light Microscopy (PLM). The accuracy of the visual estimate method is 1%.

As per the standard "...The accuracy in the determination of the presence or absence of asbestos of greater than 1 area percent asbestos is greater than 99%." ASTM Committee D22.05, 1/18/88, Standard *Method of Testing for Asbestos Containing Materials by Polarized Light Microscopy*. If the sample matrix is reduced to minimize non-asbestos components, the detection limit can be mathematically enhanced, based on the amount of material remaining after matrix reduction. This method is called gravimetric reduction. This method involves ashing and chemical dissolution of the sample.

- ***ATOMIC ABSORPTION FOR LEAD***

Paint samples were collected for atomic absorption (AA) analysis. The detection limit for each sample depends upon many factors including the sensitivity of the instrument and the sample size. In the KELLCO-MACS laboratory utilizing flame AA, the detection limit is normally .01% or 100 parts per million (ppm).

KELLCO-MACS Qualifications

KELLCO-MACS is a creative joint venture offering hazardous materials and AIHA laboratory analyses. Our credentials include:

- The KELLCO-MACS asbestos inspector is licensed with the State of California Department of Occupational Safety and Health (CAL-OSHA).
- The KELLCO-MACS lead inspector is licensed by the Department of Health Services (DHS).
- The laboratory accreditations include:
 - **NVLAP PLM** for Asbestos: NIST National Voluntary Laboratory Accreditation Program certificate of accreditation for bulk **asbestos** analysis by polarized light microscopy (Accreditation #101948-1).
 - **AIHA** Accreditation for **Industrial Hygiene** Analytical Laboratory for PCM, and AA for lead (Accreditation #101786).
 - **AIHA Analyst Proficiency (NIOSH PAT)** (Accreditation # 11172)
 - **AIHA ELLAP** Accreditation for Lead: Accreditation for the **Environmental Lead** Laboratory recognized by the EPA as meeting the requirements of the National Lead Laboratory Accreditation Program established under Title X (Lab ID #11109).

- **ELAP PLM** for Asbestos: California Department of Health Services, Environmental Laboratory Accreditation Program, certificate for bulk asbestos analysis (Certificate #2027)
- **USDA Soil** permit #39484

The following supporting documents are attached to this report:

- Laboratory analytical reports
- Photographs of sample locations
- Floor plan or sketch showing sample locations

Please call KELLCO if there are any questions and/or clarifications regarding this report. We look forward to working with you in the future.

Sincerely,

KELLCO-MACS

Tim C. Cannard CAC #94-1395, DHS Lead #764
Senior Project Manager

This report may not be reproduced except in full and with the permission of MACS Lab, Inc. This report relates only to the item(s) tested. For QC data refer to Calibration Number QA Report. MACS Lab is accredited by the American Industrial Hygiene Association (AIHA) for the analysis of lead in paint and soil (laboratory ID #11172). Some paint samples submitted contain substrate material that can't be removed from the paint layer. This may cause erroneous results. Proper field sampling techniques must be used. Analysis is performed on a flame Atomic Absorption Spectrometer. PPM= parts per million & 10,000 ppm = 1% Note: 1 mg/kg = 1 ppm NOTICE: FOR XRF Confirmation: When the actual sampled area is provided to the laboratory, the results can be calculated in mg/cm² exactly like an XRF instrument result. Otherwise NO XRF comparison can ever be made because the lab analyzes only a portion of a normal sample and the area of a scrape can't be known after the fact. Without the area N/A is reported. Results are not blank corrected.

LCS= Laboratory Control Sample - NIST SRM-1579

RL=Reporting Limit Verification Sample

Duplicate analyses are measurements of the variable of interest (in this case lead) performed identically on two subsamples of the same sample. The results from duplicate analyses are used to evaluate analytical or measurement precision but not the precision of sampling. Spiked samples are prepared by adding a known mass of the target analyte (in this case lead) to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available. Spiked samples are used to determine the effect of the matrix on a method's recovery efficiency. The Method Blank is used to detect contamination from the laboratory. Accuracy is the degree of agreement between an observed value and an accepted reference value such as the LCS NIST SRM-1579 sample. Precision is the degree to which a set of observations or measurements of the same property conform to themselves. NEVER depend upon the laboratory to "fix-up" a poorly taken sample.

AA Analysis Data Report

NOTICE:
 Instrument reading is in absorbance units
 For solids (paint and soil):
 Weight is in grams
 Paint area (if present) is in sq cm
 For air:
 LPM= Liters per minute supplied by client
 Minutes = duration of sample
 m³ (on report) means cubic meter
 For wipe:
 Area = Wipe area supplied by client in sq ft
 ft² (on report) means square foot

Samples received on: April 28, 2009

Samples analyzed on: April 28, 2009

I verify that I have checked the records and the data entered here is accurate and matches the written records.

Sample #	Weight, LPM, or area	Solution vol ml	Instr. reading	Paint area or minutes
1	0.0518	50	0.00020	0
2	0.1184	50	0.00250	0
3	0.1773	50	0.00240	0

This report shows the data associated with the individual samples. This includes the MACS Lab, Inc. sample number, the sample weight digested, LPM, area wiped, dilution (solution volume), instrument reading in absorbance, paint area, time in minutes. By using the data on this page, and the slope and intercept found on the calibration curve page of this report one can calculate the concentration of analyte in the original sample. Be sure to use the calibration curve data for the sample tested (see sample results page for Calib. Number). In the case of paint and soil matrices multiply the slope times the absorbance and add the intercept. Multiply this number by the dilution and then divide by the weight. The result will be expressed in PPM. In the case of dust samples multiply the slope times the absorbance and add the intercept. Multiply this number times the dilution and adjust for the area wiped if it is not 1 sq ft. For air samples multiply the slope times the absorbance and add the intercept. Multiply this number by the dilution. This will be the number of μg of lead on the filter. Divide this number by the liters of air used and compute the concentration in cubic meters. A cubic meter contains 1000 liters. Note: in all cases if the concentration calculated by multiplying the slope times the absorbance and adding the intercept is below the MDL (method detection limit) value for that matrix substitute the MDL for the value calculated. This will be the Reporting Limit in PPM. (note: the MDL is shown only to 2 significant figures on this report which will result in slight differences between our and your calculations for this number).

The slope and intercept can be calculated using the absorbance and concentration (see the Quality Control Report) of the standards used in the analysis. This can be done by using linear regression analysis.

This report may not be reproduced except in full and with the permission of MACS Lab, Inc. This report relates only to the item(s) tested. For QC data refer to Calibration Number QA Report. MACS Lab is accredited by the American Industrial Hygiene Association (AIHA) for the analysis of lead in paint and soil (laboratory ID #11172). Some paint samples submitted contain substrate material that can't be removed from the paint layer. This may cause erroneous results. Proper field sampling techniques must be used. Analysis is performed on a flame Atomic Absorption Spectrometer. PPM= parts per million & 10,000 ppm = 1% Note: 1 mg/kg = 1 ppm NOTICE: FOR XRF Confirmation: When the actual sampled area is provided to the laboratory, the results can be calculated in mg/cm² exactly like an XRF instrument result. Otherwise NO XRF comparison can ever be made because the lab analyzes only a portion of a normal sample and the area of a scrape can't be known after the fact. Without the area N/A is reported. Results are not blank corrected.

EDR PUR-IQ[®] Report

"the intelligent way to conduct historical research"

The EDR PUR-IQ report facilitates historical research planning required to complete the Phase I ESA process. The report identifies the *likelihood* of prior use coverage by searching proprietary EDR-Prior Use Reports[®] comprising nationwide information on: city directories, fire insurance maps, aerial photographs, historical topographic maps, flood maps and National Wetland Inventory maps.

Coverage in the following historical information sources may be used as a guide to develop your historical research strategy:

- 1. City Directory:** Coverage exists for portions of PALO ALTO, CA for 1926-2001
- 2. Fire Insurance Map:** When you order online any EDR Package or the EDR Radius Map with EDR Sanborn Map Search/Print, you receive site specific Sanborn Map coverage information at no charge.
- 3. Aerial Photograph:** Aerial photography coverage may exist for portions of Santa Clara County. Please contact your EDR Account Executive for information about USGS photos available through EDR.
- 4. Topographic Map:** The USGS 7.5 min. quad topo sheet(s) associated with this site:
 - Historical: Coverage exists for Santa Clara County
 - Current: Coverage exists for Palo Alto, CA

EDR's network of professional researchers, located throughout the United States, accesses the most extensive national collections of city directory, fire insurance maps, aerial photographs and historical topographic map resources available for Palo Alto, CA. These collections may be located in multiple libraries throughout the country. To ensure maximum coverage, EDR will often assign researchers at these multiple locations on your behalf.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. PRELIMINARY EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SEARCH RESULTS

Sites were identified.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 11/02/2012 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

PRELIMINARY EXECUTIVE SUMMARY

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 08/19/2011 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Site</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
FORD AEROSPACE (PCB STORAGE LO	3939 FABIAN WAY	1/2 - 1 (0.523 mi.) S	H30	100

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

ACME BIOSCIENCE, INC	3941 E. BAYSHORE ROAD	1/8 - 1/4 (0.173 mi.) SE	C10	34

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

PRELIMINARY EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 12/05/2012 has revealed that there are 8 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 12/17/2012 has revealed that there are 6 LUST sites within approximately 0.5 miles of the target property.

PRELIMINARY EXECUTIVE SUMMARY

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

CA FID UST: The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.

A review of the CA FID UST list, as provided by EDR, and dated 10/31/1994 has revealed that there is 1 CA FID UST site within approximately 0.25 miles of the target property.

<u>Site</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
GUS MOZART	1068 E MEADOW DR	1/8 - 1/4 (0.171 mi.) SSW	B9	33

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

<u>Site</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
GUS MOZART	1068 E MEADOW DR	1/8 - 1/4 (0.171 mi.) SSW	B9	33

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/11/2012 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Site</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
CRYSTAL TECHNOLOGY INC	1035 E MEADOW CIR	1/8 - 1/4 (0.143 mi.) W	A3	13

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 10/01/2012 has revealed that there is 1 Cortese site within approximately 0.5 miles of the target property.

<u>Site</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
SPACE SYSTEMS/LORAL	3825 FABIAN WAY	1/4 - 1/2 (0.251 mi.) SSE	D16	48

PRELIMINARY EXECUTIVE SUMMARY

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTATES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 5 HIST CORTESE sites within approximately 0.5 miles of the target property.

<u>Site</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
 Waste name: CHROMIUM

Waste code: D008
 Waste name: LEAD

Waste code: D011
 Waste name: SILVER

Waste code: D035
 Waste name: METHYL ETHYL KETONE

Waste code: F003
 Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
 Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Case Type: Cleanup Program Site
 Case Worker: MBR
 Local Agency: Not reported
 RB Case Number: 43S0228
 File Location: Regional Board
 Potential Media Affected: Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
 Potential Contaminants of Concern: * Chlorinated Solvents - PCE, * Volatile Organic Compounds (VOC)
 Site History: The Site is currently owned by Far Western Land and Investment, Inc., which leased the property from 1959 to 1990 to the former Ford Aerospace Corporation (FAC). FAC operated a research and development facility. Loral Aerospace Holdings, Inc. purchased the assets of Ford Aerospace Corporation in 1990 and was renamed Space Systems/Loral. There are two buildings that occupy portions of the Site; they are called Buildings 7 and 8. Operations included the use of chlorinated solvents in and around Buildings 7 and 8. Discharges to soil, affecting both soil and groundwater likely occurred through spills of chlorinated solvents. Space Systems/Loral currently uses the property for research and development of communication equipment. Named Dischargers: The former Ford Aerospace Corporation is named as a discharger because of substantial evidence that it discharged

pollutants to soil and groundwater at the Site, including its use of chlorinated solvents, primarily tetrachloroethene (PCE). Space Systems/Loral is named as a discharger because it is the current operator at the Site, and because it acquired FAC. Far Western Land and Investment, Inc. is named as a discharger because it owned the property during and after the time of the activity that resulted in the discharge, had knowledge of the discharge or the activities that caused the discharge, and had the legal ability to prevent the discharge. Far Western Land and Investment, Inc. will be responsible for compliance only if the Board or Executive Officer finds that other named dischargers have failed to comply with the requirements of this Order. If additional information is submitted indicating that other parties caused or permitted any waste to be discharged on the Site where it entered or could have entered waters of the state, the Board will consider adding that party's name to this Order. By private agreement, Ford Motor Company assumed responsibility from Loral Aerospace Holdings, Inc. for compliance with an earlier order (Order No. 89-137). This was described in a letter to the Board from Loral Aerospace Holdings, Inc. dated April 22, 1991. Since April 1991, Ford Motor Company has been the sole entity communicating with Board staff on behalf of Space Systems/Loral on matters related to site investigation and cleanup at the Site and to off-site affected properties. Regulatory Status: This site has been subject to the following Board orders: o Site Cleanup Requirements (Order No. 89-137) adopted August 16, 1989. o Waste Discharge Requirements, NPDES Permit (Order No. 90-109) adopted August 15, 1990. o Amendment to Site Cleanup Requirements (Order No. 93-091) adopted August 18, 1993. o Site Cleanup Requirements (Order No. 96-023) adopted February 28, 1996. o Revised Site Cleanup Requirements (Order No. 99-043) adopted June 16, 1999. o Amendment to Site Cleanup Requirements (Order No. R2-2003-0071) issued August 8, 2003. o Final Site Cleanup Requirements and Recission for Order No. 99-043 and Order No. R2-2003-0071

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Not reported
Site History:	Perkin-Elmer (PE) operated a stainless steel vacuum pump manufacturing facility from 1963 to 1984 at this Site. PE used tetrachloroethene (PCE), sodium hydroxide, ammonia, methanol, and various acid solutions in its operations. Applera subsequently purchased the PE business. Extensive soil and groundwater sampling has been conducted at the Site and the site vicinity since 1999. The results of the extensive soil and groundwater sampling indicate that chlorinated VOCs, including PCE and its break-down products, like trichloroethene, cis-1,2-dichloroethene, and vinyl chloride are present. Maximum concentration of PCE was 5,000 "g/L in a groundwater grab sample collected in September 2007. Size of groundwater plume is approximetally 250 feet wide per 400 feet long. The groundwater at the Site is brackish due to its proximity to the San Francisco Bay. It is not suitable for drinking because it contains high levels of

 Longitude: -122.100995
 Case Type: Cleanup Program Site
 Case Worker: MBR
 Local Agency: Not reported
 RB Case Number: 43S1119
 File Location: Regional Board
 Potential Media Affected: Soil
 Potential Contaminants of Concern: Lead, Chromium, Copper
 Site History: Approximately 13.26 acres containing abandoned structures relating to a former sewage treatment plant, former sewage treatment ponds, and remnants of former tidal sloughs. The Site is surrounded by an empty business park to the northwest, a childcare facility to the north, baylands to the east and southeast and businesses to the south and southeast. City of Los Altos operated a waste water treatment facility on 7 acres from 1958 to 1972. The property has also been used for utility storage, constructing staging and by NUTEK Corporation for irradiation services. Several investigations have taken place, most recently in 2007. Soluble lead (17 mg/l), reactive sulfide (1200 mg/kg), chromium (540 mg/kg), cobalt (220 mg/kg), copper (610 mg/kg), nickel (500 mg/kg), zinc (860 mg/kg) and arsenic (6.4 mg/kg) have been detected above PRGs/CHHSLs. Reactive sulfide is

currently "trapped" in the sludge below the water in the former wastewater treatment ponds. When disturbed, this sludge releases hydrogen sulfide gas that has been detected at levels immediately dangerous to life and health (IDLH). Water in Pond 5 has been found to contain values of arsenic, cobalt, copper, nickel selenium, vanadium and zinc above Estuary Habitat environmental screening level (ESL) concentration limits. No exceedances were found in groundwater sampled at the Site.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type:	Cleanup Program Site
Case Worker:	MBR
Local Agency:	Not reported
RB Case Number:	43S0949
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride
Site History:	From approximately 1968 to 2000. Bell Industries and a subsequent owner manufactured precision metal parts for electronic and aerospace applications at the 2637 Marine Way facility. The manufacturing processes conducted at the site included stamping and finishing. Metal plating was not conducted at the site. As part of the operations, the metal parts were cleaned in a TCE vapor degreaser and waste solvent was sent to a sump located in the back (western) part of the building. By the 1990's the degreasing operations were modified to use either PCE of AK-225. Apparent releases from the sump area resulted in VOC contamination of the soil and groundwater at the site.

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
 Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D006
 Waste name: CADMIUM

Waste code: D007
 Waste name: CHROMIUM

Waste code: D008
 Waste name: LEAD

Waste code: D010
 Waste name: SELENIUM

Waste code: D011
 Waste name: SILVER

Waste code: D035
 Waste name: METHYL ETHYL KETONE

Waste code: F003
 Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
 Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: P030
 Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Biennial Reports:

Last Biennial Reporting Year: 2011

Annual Waste Handled:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 16584

Waste code: D002

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 File Location: Regional Board
 Potential Media Affected: Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
 Potential Contaminants of Concern: * Volatile Organic Compounds (VOC)
 Site History: Remedial Investigation: VOCs have been detected in soil and shallow groundwater at the Site and in shallow groundwater downgradient of the Site. The primary VOCs detected are trichloroethylene (TCE) and its associated degradation products cis-1,2 dichloroethylene (DCE) and vinyl chloride (Ye). In September 2008, TCE, DCE and VC were detected in the onsite A-aquifer at the respective groundwater concentrations of 440 ug/L (ppb), 96 ppb and 1,400 ppb. In October 2008, TCE, DCE and VC were detected in the onsite B-aquifer at the respective groundwater concentrations of 42,000 ppb, 4,300 ppb and 45,000 ppb. The bulk of the contamination is found in the B-aquifer downgradient of the Building. TCE groundwater detections as high as 110,000 ppb were recorded in February 2008 in the B-aquifer north across East Charleston Road directly downgradient of the Site. TCE detections were recorded off-site at concentrations exceeding 1,000 ppb at least 400 feet downgradient and at lower concentrations at least 1,000 feet downgradient of the Site. Seventeen monitoring, extraction, and injection wells have been installed at the Site. Two monitoring wells clusters (MW-01 and MW-02) have been installed on the 901 San Antonio Road property downgradient of the Site by the owners. Monitoring well clusters (F25-1 through F25-4, PBI-2 and PB2-1) installed at 3963/3977 Fabian Way have reported TCE and related TCE breakdown products. One A-aquifer well (MW8) was installed on the 860 East Charleston Road property. Two A-aquifer monitoring wells (MW-4 and MW-5) have been installed upgradient of the Site. The full extent of the groundwater VOC contamination downgradient and cross gradient of the Site in the A- and B- aquifers has not been fully determined. Further investigation is needed to complete the definition of the extent of groundwater pollution at the Site and downgradient of the Site. To the maximum extent possible, proposed remedial actions shall be designed to avoid interference with land uses and operations at downgradient properties. Petroleum hydrocarbons have been detected in

soil at concentrations up to 21,000 ppm at shallow depths (0.5 - 1.0 feet bgs). Lead, chromium and copper have been detected in soils at respective concentrations up to 2,400 ppm, 150 ppm and 97 ppm. The source of the petroleum hydrocarbons and lead is considered to be blow-down from a compressor, and possibly its hydraulic or cooling fluid. Further investigation is needed to accurately determine the extent of contamination in soils in various work areas at the Site. The vapor intrusion pathway to indoor air has not been evaluated at the Site or at properties downgradient of the Site that are not the subject of a Risk Management Plan approved by the Water Board. Soil gas sampling is needed to evaluate this pathway. This site has been subject to the following Water Board Orders. R2-2008-0104 adopted on 12/12/2008 95-222 adopted on 11/15/1995 and rescinded on 12/12/2008 90-016 adopted on 1/17/1990 and rescinded on 11/15/1995

Completed Document Type:	Site Screening
Completed Date:	07/01/1991
Comments:	Site Screening done. This 1/3 acre site was leased by Fairchild Semiconductor Corporation from its owners, Edward & Gladys Schlaager in 1957. Fairchild's operation through 1967 involved use of small quantities of trichlorethylene (TCE) and acetone. Advalloy leased the property in 1968 and purchased it in 1971. Advalloy manufactured lead mounting frames for printed circuit boards at this facility until closure of operation in December 1989. Currently, Advalloy is in bankruptcy and the site is unoccupied. Prompted by discovery of volatile organic compounds in groundwater at a downgradient site, RWQCB advised groundwater investigation at Advalloy site. Shallow monitoring well samples showed the presence of 1,1 dichloroethane, 1,1 dichloroethene, trans-1,2 dichloroethene, trichloroethylene, and ethylbenzene in groundwater. In view of the use of the various solvents at the site and a history of spillages and violations, Advalloy was determined to be a source of groundwater contamination. However, the impacted shallow aquifer has no beneficial use and is not locally interconnected with the deeper aquifer. Despite some potential, release of hazardous chemicals is not evident through routes of surface water, air, or soil.

 Completed Document Type: * Discovery
 Completed Date: 03/27/1992
 Comments: DTSC received EPAs Preliminary Assessment dated 02/07/92. EPA recommends higher-priority SSI under CERCLA. EPA PA: EPA recommends further action because groundwater contamination may be attributed to the storage and use of hazardous materials by a previous Building 2420 tenant, and a release of hazardous chemicals to the air is suspected.
