CHARLESTON-ARASTRADERO CORRIDOR PROJECT

PHASE 1 AND PHASE 2

PROJECT OVERVIEW

The City of Palo Alto will be constructing roadway modifications and streetscape improvements to a continuous segment of Arastradero Road and Charleston Road. Improvements can be seen online on the project website:

www.cityofpaloalto.org/cacorridor

Scope for construction includes the following:

- Construction and landscaping of medians, bulb-outs, and bioretention areas
- Widening of sidewalks and bike paths
- ADA compliant curb ramps
- Traffic signal modifications and upgrades
- Replacement of pavement striping and markings
- Resurfacing Arastradero and Charleston Roads

CONSTRUCTION OVERVIEW

The Contractor will first perform concrete work such as sidewalk, curb and gutter and driveway aprons. This work will require limited parking restrictions and driveway closures during construction. Resident will be notified if closure of their driveway is necessary. Three days before any work begins, you will see No Parking signs on the street restricting parking in work areas. After concrete work, the street will be milled and paved.

PROJECT TIMELINE

PHASE 1:

ARASTRADERO RD: FOOTHILL EXPY TO CLEMO AVE

PHASE 2:

E. CHARLESTON RD: ALMA ST TO MIDDLEFIELD RD

JUNE 2018 TO MAY 2019*

← upcoming construction

PHASE 3: MAY 2019 TO APRIL 2020*

*Approximate schedule. Actual timing of phases will be impacted by various factors such as weather and variable subsurface conditions.

STREET CLOSURE NOTIFICATIONS

- During asphalt milling and paving, streets will need to be partially closed. One lane in each direction will be open to traffic. Paving is scheduled to occur on a Saturday.
- 7 days and 24 hours before asphalt milling begins, you will receive a flyer notifying you of the partial street closure.
- For construction updates and notifications, please visit the project website at www.cityofpaloalto.org/cacorridor

If you will be traveling during the paving time period, please park your vehicles off the street or make arrangements for them to be moved if needed.

Selected areas of construction will be temporarily marked showing the extent of concrete work at intersections. Not all areas of construction will be marked due to possible conflict with existing striping.

← example

If you are planning an upcoming major home construction project which requires the replacement or relocation of utility services, please call us at 650.329.2295 soon!

You may be able to save our time and your money on street cutting fees if we know of your plans in advance. This will allow the Public Works and Utilities Departments to coordinate the timing of your project, so the utility work can be completed before the road is repaved. If we hear from you in time, this can result in a smoother, longer lasting street for everyone.
