

Overall Design

No need for parking other than existing lot

No off-street parking! Pavings for people not cars!

Design has best elements plus some small parking which along Lambert

Community garden plot would benefit from max solar exposure

Native plantings are important to me and should be everywhere ~~the~~ non-lawn plantings go in.

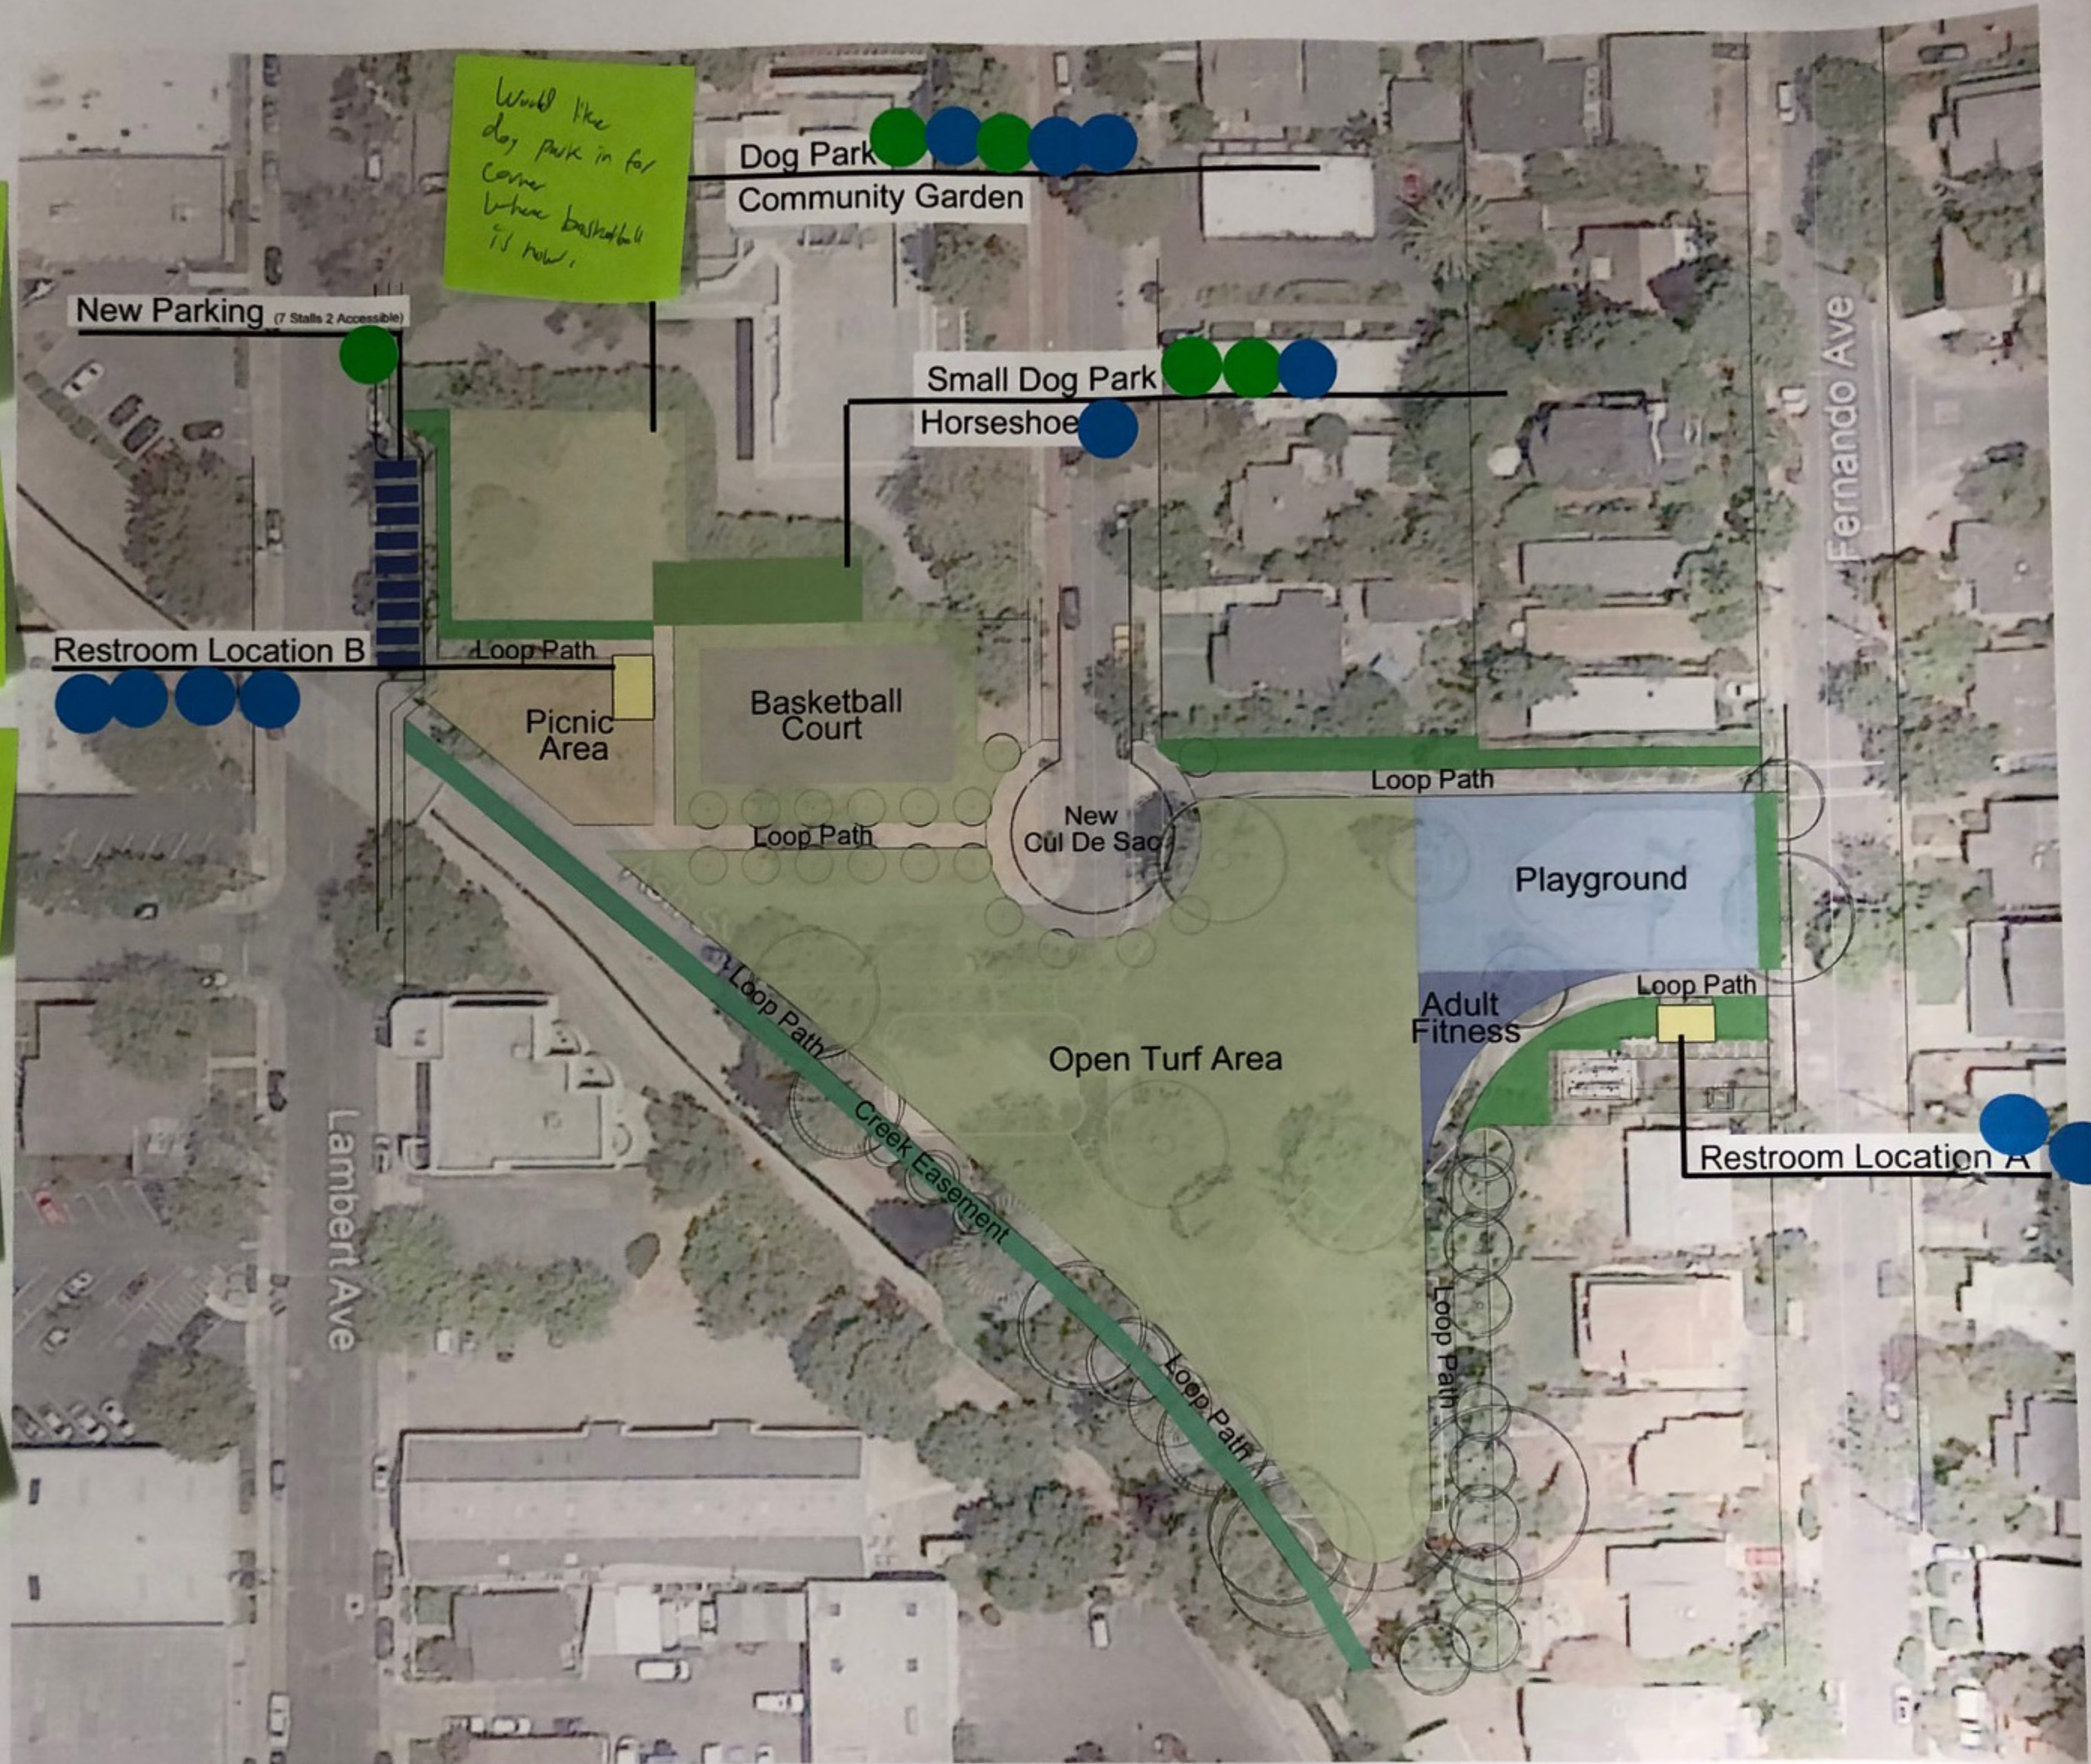

Landscap- only use natives.

P.A. has no park - it is old, and was by popular 'ity' even if it ended up getting few fewer votes.

Why so much space given to a dog park when it was a low priority on the survey?

Need picnic area near playground w/ shade

Would like dog park in far corner where basketball is now.

Boulware Park Schematic Design Option 2

Scale: 1" = 30'

Overall Design

1) Enlarge picnic area

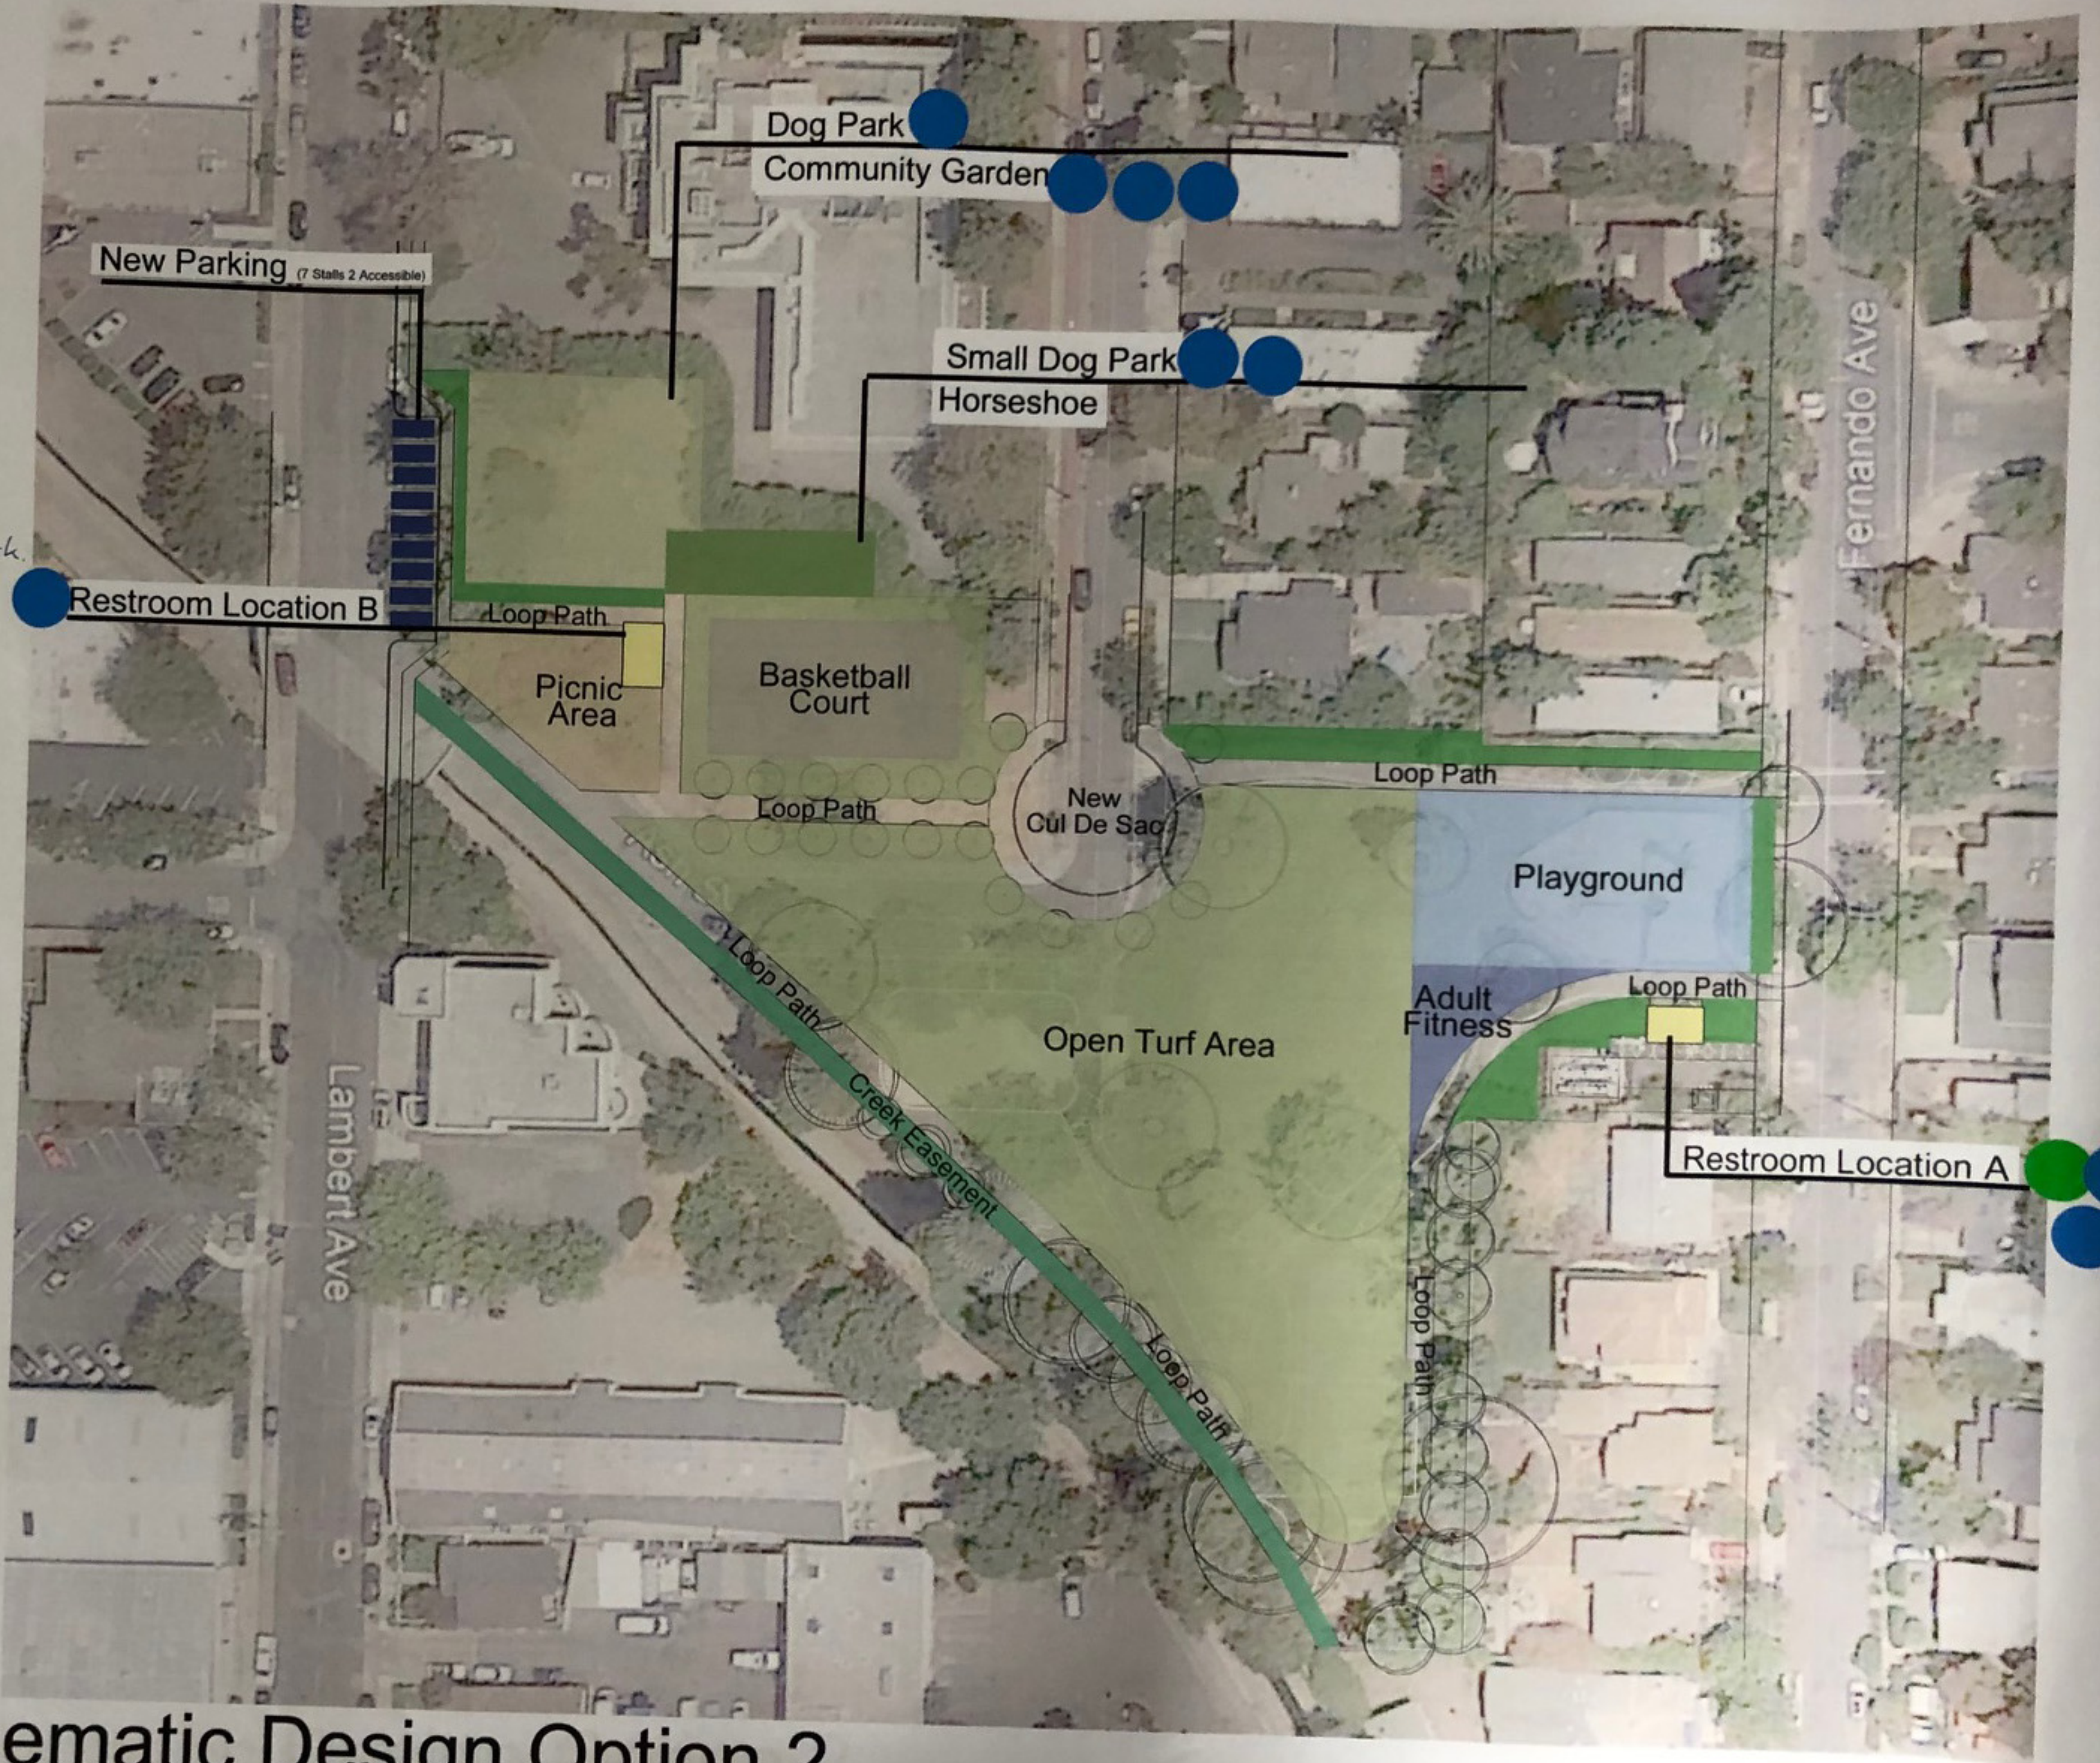

There is sufficient parking without these new stalls - Lambert, Chestnut

2 restrooms - one by playground, one by picnic
Closer to Fry's site is good.

picnic area further from road & traffic
like near triangle of loop path, creek & culdesac.
park slope into creek, make creek play part of park.

DON'T BUILD BUILDINGS ON THE PARK. STAY WITHIN STRICT COST
LIMITS. FINANCING CAN BE INSECURE.

Restroom always near playground.
