

# Robles Park Playground Renovation

8.15.24

Community Play Equipment Update #1

# Summary of Community Playground Equipment Review

---

- An updated playground equipment option for both Robles playgrounds was developed per comments received at community meeting #2 held on 4/4/24 requesting the new proposed play equipment more closely match the existing equipment.
- The following slides show the updated playground equipment for each playground and provides a side-by-side comparison of the existing and the proposed.
- The community is requested to review the updated equipment and provide any further input to the city's Landscape Architect Peter Jensen at [peter.jensen@cityofpalalto.org](mailto:peter.jensen@cityofpalalto.org) or call with questions 650.617.3183
- A possible 3<sup>rd</sup> community meeting could be set if there is no clear community support for the updated options per input received.
- A summary of the input received for this updated playground equipment community review will be provided on the project web site once the community review is completed in October.

# Existing Playground Review

---

## Existing Playground Equipment

# Existing Tot Lot Equipment (Ages 2-5)

## Playground Equipment

- 2 – Tower Landings
