

2024 Monthly Fuel Sales

The Palo Alto Airport is working to reduce the sales of leaded aviation fuel (100LL). An existing tank on the field was refurbished and put back into service for the use of a 94-octane unleaded fuel (94UL). The 94UL has been available for sale at the airport since January 2024.

The Airport continues to develop a plan to transition away from 100LL in a safe manner in compliance with FAA regulations.

Month	100LL	94UL	JetA
January	26,369	41	7,319
February	22,667	132	10,200
March	26,779	139	13,593
April	31,593	175	11,351
May	36,384	387	9,261
June	36,491	285	10,179
July	34,832	155	11,866
Total	215,115	1,314	73,769
